

Larry Gerace

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/6192914/larry-gerace-publications-by-year.pdf>
Version: 2024-04-10

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.
The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

10 papers	355 citations	8 h-index	12 g-index
12 ext. papers	422 ext. citations	5.6 avg, IF	2.82 L-index

#	Paper	IF	Citations
10	Luma is not essential for murine cardiac development and function. <i>Cardiovascular Research</i> , 2018 , 114, 378-388	9.9	21
9	Nesprin 1 α is essential for mouse postnatal viability and nuclear positioning in skeletal muscle. <i>Journal of Cell Biology</i> , 2017 , 216, 1915-1924	7.3	39
8	Analysis of Nuclear Lamina Proteins in Myoblast Differentiation by Functional Complementation. <i>Methods in Molecular Biology</i> , 2016 , 1411, 177-94	1.4	3
7	Nuclear import of adenovirus DNA involves direct interaction of hexon with an N-terminal domain of the nucleoporin Nup214. <i>Journal of Virology</i> , 2015 , 89, 1719-30	6.6	46
6	Nuclear envelope protein Lem2 is required for mouse development and regulates MAP and AKT kinases. <i>PLoS ONE</i> , 2015 , 10, e0116196	3.7	25
5	Targeted ablation of nesprin 1 and nesprin 2 from murine myocardium results in cardiomyopathy, altered nuclear morphology and inhibition of the biomechanical gene response. <i>PLoS Genetics</i> , 2014 , 10, e1004114	6	90
4	Identification of Novel Integral Membrane Proteins of the Nuclear Envelope with Potential Disease Links Using Subtractive Proteomics. <i>Novartis Foundation Symposium</i> , 2008 , 63-80		7
3	Nuclear pore complexes: dynamics in unexpected places. <i>Journal of Cell Biology</i> , 2001 , 154, 17-20	7.3	25
2	Nuclear import factors importin alpha and importin beta undergo mutually induced conformational changes upon association. <i>FEBS Letters</i> , 2000 , 484, 291-8	3.8	45
1	Human Nop5/Nop58 is a component common to the box C/D small nucleolar ribonucleoproteins. <i>Rna</i> , 1999 , 5, 1597-604	5.8	54
