## Jon Olafur Skarphedinsson

List of Publications by Year in descending order

Source: https://exaly.com/author-pdf/6195782/publications.pdf Version: 2024-02-01

#	Article	IF	CITATIONS
1	Repeated measurements of cerebral blood flow in rats. Comparisons between the hydrogen clearance method and laser Doppler flowmetry. Acta Physiologica Scandinavica, 1988, 134, 133-142.	2.2	166
2	Long term orexigenic effect of a novel melanocortin 4 receptor selective antagonist. British Journal of Pharmacology, 1999, 126, 27-34.	5.4	70
3	Sympathetic nerve traffic correlates with the release of nitric oxide in humans: implications for blood pressure control. Journal of Physiology, 1997, 501, 671-675.	2.9	58
4	Food conversion is transiently affected during 4-week chronic administration of melanocortin agonist and antagonist in rats. Journal of Endocrinology, 2002, 173, 517-523.	2.6	43
5	Does sympathetic nerve discharge affect the firing of polymodal C-fibre afferents in humans?. Brain, 1999, 122, 2237-2244.	7.6	38
6	Electrical stimulation of the gastrocnemius muscle in the spontaneously hypertensive rat increases the pain threshold: role of different serotonergic receptors. Acta Physiologica Scandinavica, 1990, 138, 125-131.	2.2	33
7	Melanocortin receptor agonist transiently increases oxygen consumption in rats. NeuroReport, 2001, 12, 3703-3708.	1.2	32
8	Effects of Placental Protein 13 on the Cardiovascular System in Gravid and Non-Gravid Rodents. Fetal Diagnosis and Therapy, 2013, 33, 257-264.	1.4	32
9	Reflex changes in post―and preganglionic sympathetic adrenal nerve activity and postganglionic sympathetic renal nerve activity upon arterial baroreceptor activation and during severe haemorrhage in the rat. Acta Physiologica Scandinavica, 1992, 144, 317-323.	2.2	31
10	Neurophysiological evidence for and characterization of the postâ€ganglionic innervation of the adrenal gland in the rat. Acta Physiologica Scandinavica, 1990, 140, 491-499.	2.2	25
11	The Effects of Naloxone on Cerebral Blood Flow and Cerebral Function during Relative Cerebral Ischemia. Journal of Cerebral Blood Flow and Metabolism, 1989, 9, 515-522.	4.3	23
12	Differential responses in adrenal and renal nerves to CNS osmotic stimulation. Brain Research Bulletin, 1996, 39, 205-209.	3.0	23
13	Functional Role, Structure, and Evolution of the Melanocortinâ€4 Receptor. Annals of the New York Academy of Sciences, 2003, 994, 74-83.	3.8	23
14	Importance of the lactate anion in control of breathing. Journal of Applied Physiology, 1998, 84, 411-416.	2.5	22
15	Relative Cerebral Ischemia in SHR Due to Hypotensive Hemorrhage: Cerebral Function, Blood Flow and Extracellular Levels of Lactate and Purine Catabolites. Journal of Cerebral Blood Flow and Metabolism, 1989, 9, 364-372.	4.3	20
16	Endorphin mechanisms are responsible for the beneficial effects of opioid antagonists on cerebral function during relative cerebral ischaemia in rats. Acta Physiologica Scandinavica, 1988, 132, 281-288.	2.2	19
17	Differential responses in post―and preâ€ganglionic adrenal sympathetic nerve activity and renal sympathetic nerve activity after injection of 2â€deoxyâ€ <scp>d</scp> â€glucose and insulin in rats. Acta Physiologica Scandinavica, 1992, 145, 169-175.	2.2	18
18	Cerebral function during hypotensive haemorrhage in spontaneously hypertensive rats and Wistar Kyoto rats. Acta Physiologica Scandinavica, 1986, 128, 445-452.	2.2	16

#	Article	IF	CITATIONS
19	Evidence for an adrenergic innervation of the adrenal cortical blood vessels in rats. Acta Physiologica Scandinavica, 1993, 149, 23-30.	2.2	10
20	Role of different serotonergic receptors in the longâ€lasting blood pressure depression following muscle stimulation in the spontaneously hypertensive rat. Acta Physiologica Scandinavica, 1990, 139, 305-310.	2.2	9
21	The effects of naloxone on cerebral function in spontaneously hypertensive rats during hypotensive haemorrhage. Acta Physiologica Scandinavica, 1986, 128, 597-604.	2.2	7
22	Electric muscle stimulation in the spontaneously hypertensive rat induces a postâ€stimulatory reduction in activity: role of different opioid receptors. Acta Physiologica Scandinavica, 1990, 140, 507-514.	2.2	6
23	The effects of naloxone on behavioural depression due to hypotensive haemorrhage in unanaesthetized spontaneously hypertensive rats. Acta Physiologica Scandinavica, 1987, 129, 27-34.	2.2	5
24	The effects of hexamethonium on cerebral blood flow and cerebral function during relative cerebral ischaemia in rats. Acta Physiologica Scandinavica, 1996, 158, 21-28.	2.2	4
25	The effects of selective opioid antagonists on somatosensory evoked potentials during relative cerebral ischemia in rats. Life Sciences, 1994, 55, 1365-1374.	4.3	2
26	Hyperphagia modifies FA profiles of plasma phospholipids, plasma FFA, and adipose tissue TAG. Lipids, 2003, 38, 1127-1132.	1.7	1
27	Effect of the Calcium Antagonists Felodipine and Nimodipine on Cortical Blood Flow in the Spontaneously Hypertensive Rat. Journal of Cardiovascular Pharmacology, 1990, 15, S40.	1.9	0
