

Marilda Mazzali

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/620921/marilda-mazzali-publications-by-year.pdf>

Version: 2024-04-28

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

74
papers

6,281

#	Paper	IF	Citations
74	Twin pregnancy after kidney transplantation: case report and systematic review. <i>Jornal Brasileiro De Nefrologia: Orgao Oficial De Sociedades Brasileira E Latino-Americana De Nefrologia</i> , 2021 , 43, 121-126	1.5	2
73	Exploring the causes of the high incidence of delayed graft function after kidney transplantation in Brazil: a multicenter study. <i>Transplant International</i> , 2021 , 34, 1093-1104	3	8
72	Recurrence of IgA Nephropathy after Kidney Transplantation in Adults. <i>Clinical Journal of the American Society of Nephrology: CJASN</i> , 2021 , 16, 1247-1255	6.9	4
71	Evaluation of Trypanosoma cruzi parasitic load by real-time PCR and blood culture in long-term kidney transplant recipients.. <i>Journal of Infection in Developing Countries</i> , 2021 , 15, 1774-1781	2.3	
70	Safety and Efficacy of a 3-Year Therapy With Cinacalcet in Persistent Hyperparathyroidism After Renal Transplant. <i>Transplantation Proceedings</i> , 2020 , 52, 1284-1286	1.1	1
69	Treatment of Antibody-Mediated Rejection After Kidney Transplantation: Immunological Effects, Clinical Response, and Histological Findings. <i>Annals of Transplantation</i> , 2020 , 25, e925488	1.4	1
68	Therapy for persistent hypercalcemic hyperparathyroidism post-renal transplant: cinacalcet versus parathyroidectomy. <i>Jornal Brasileiro De Nefrologia: Orgao Oficial De Sociedades Brasileira E Latino-Americana De Nefrologia</i> , 2020 , 42, 315-322	1.5	3
67	Recurrence of FSGS after Kidney Transplantation in Adults. <i>Clinical Journal of the American Society of Nephrology: CJASN</i> , 2020 , 15, 247-256	6.9	40
66	Yellow fever disease in a renal transplant recipient: Case report and literature review. <i>Transplant Infectious Disease</i> , 2019 , 21, e13151	2.7	3
65	Pregnancy Among Women with Kidney Transplantation: A 20-Years Single-Center Registry. <i>Revista Brasileira De Ginecologia E Obstetricia</i> , 2019 , 41, 419-424	1.1	3
64	Renal transplant patients with preformed anti-HLA antibodies: early biopsy findings and clinical outcomes. <i>Jornal Brasileiro De Nefrologia: Orgao Oficial De Sociedades Brasileira E Latino-Americana De Nefrologia</i> , 2019 , 42, 201-210	1.5	2
63	Optimizing the clinical utility of sirolimus-based immunosuppression for kidney transplantation. <i>Clinical Transplantation</i> , 2019 , 33, e13464	3.8	4
62	Effects of a Physiotherapeutic Protocol in Respiratory Function, Aerobic Capacity and Quality of Life After Kidney Transplantation. <i>Transplantation Proceedings</i> , 2018 , 50, 750-753	1.1	2
61	Immunization in end stage renal disease: The perception of waiting list patients. <i>Transplant Infectious Disease</i> , 2018 , 20, e12831	2.7	6
60	Effect of Preformed or De Novo Anti-HLA Antibodies on Function and Graft Survival in Kidney Transplant Recipients. <i>Annals of Transplantation</i> , 2018 , 23, 457-466	1.4	9
59	Spirolactone in Post-Transplant Proteinuria: A Safe Alternative Therapy. <i>Transplantation Proceedings</i> , 2017 , 49, 813-816	1.1	2
58	Early Vascular Thrombosis After Kidney Transplantation: Can We Predict Patients at Risk?. <i>Transplantation Proceedings</i> , 2017 , 49, 817-820	1.1	7

57	Urinary tract infection in renal transplant recipients: incidence, risk factors, and impact on graft function. <i>Transplantation Proceedings</i> , 2014 , 46, 1757-9	1.1	28
56	C4d deposits in borderline rejection: an early marker for chronic renal dysfunction?. <i>Transplantation Proceedings</i> , 2014 , 46, 1710-2	1.1	4
55	Bladder function evaluation before renal transplantation in nonurologic disease: is it necessary?. <i>Urology</i> , 2014 , 83, 406-10	1.6	10
54	What are the key arguments against uric acid as a true risk factor for hypertension?. <i>Hypertension</i> , 2013 , 61, 948-51	8.5	44
53	Prevalence of urinary decoy cells and associated risk factors in a Brazilian kidney, pancreas, and kidney-pancreas transplant population. <i>Transplantation Proceedings</i> , 2012 , 44, 2394-6	1.1	4
52	Sirolimus in renal transplantation: analysis of safety and efficacy in a nonprotocol conversion group. <i>Transplantation Proceedings</i> , 2012 , 44, 2348-51	1.1	4
51	Guidelines for maintenance of adult patients with brain death and potential for multiple organ donations: the Task Force of the Brazilian Association of Intensive Medicine the Brazilian Association of Organs Transplantation, and the Transplantation Center of Santa Catarina. <i>Transplantation Proceedings</i> , 2012 , 44, 2260-7	1.1	18
50	Can pre-liver transplantation renal insufficiency using a creatinine clearance calculator predict long-term survival?. <i>Transplantation Proceedings</i> , 2012 , 44, 2452-4	1.1	3
49	Nutritional status and body composition in patients early after renal transplantation. <i>Transplantation Proceedings</i> , 2012 , 44, 2366-8	1.1	13
48	Use of uric acid-lowering agents limits experimental cyclosporine nephropathy. <i>Nephron Experimental Nephrology</i> , 2012 , 120, e12-9		24
47	Anemia in chronic renal disease: evaluation of inflammatory activity on erythropoiesis and iron metabolism in patients not submitted to dialysis treatment. <i>Clinical Laboratory</i> , 2012 , 58, 695-704	2	4
46	Diretrizes para manutençã de mltiplos fgbs no potencial doador adulto falecido: Parte III. Recomendacões fgbs especficas. <i>Revista Brasileira De Terapia Intensiva</i> , 2011 , 23, 410-425	1.2	7
45	Uric acid and transplantation. <i>Seminars in Nephrology</i> , 2011 , 31, 466-71	4.8	24
44	Guidelines for potential multiple organ donors (adult). Part III: organ-specific recommendations. <i>Revista Brasileira De Terapia Intensiva</i> , 2011 , 23, 410-25	1.2	3
43	Uric acid and hypertension: cause or effect?. <i>Current Rheumatology Reports</i> , 2010 , 12, 108-17	4.9	97
42	Administration of neural precursor cells ameliorates renal ischemia-reperfusion injury. <i>Nephron Experimental Nephrology</i> , 2009 , 112, e20-8		9
41	Tuberculosis in renal transplant recipients: a Brazilian center registry. <i>Transplantation Proceedings</i> , 2009 , 41, 883-4	1.1	19
40	Delayed graft function in renal transplant recipients: risk factors and impact on 1-year graft function: a single center analysis. <i>Transplantation Proceedings</i> , 2009 , 41, 849-51	1.1	42

39	Kidney transplant anastomosis: internal or external iliac artery?. <i>Urology Journal</i> , 2009 , 6, 260-6	0.9	20
38	A Role for galectin-3 in renal tissue damage triggered by ischemia and reperfusion injury. <i>Transplant International</i> , 2008 , 21, 999-1007	3	55
37	Improved renal function after kidney transplantation is associated with heme oxygenase-1 polymorphism. <i>Clinical Transplantation</i> , 2008 , 22, 609-16	3.8	24
36	Systemic lupus erythematosus after renal transplantation: is complement a good marker for graft survival?. <i>Transplantation Proceedings</i> , 2008 , 40, 746-8	1.1	12
35	Skin malignancies in renal transplant recipients: a Brazilian center registry. <i>Transplantation Proceedings</i> , 2008 , 40, 767-8	1.1	11
34	Changes in serological markers of hepatitis B virus after renal transplantation. <i>Transplantation Proceedings</i> , 2008 , 40, 749-51	1.1	3
33	Posttransplant diabetes mellitus: incidence and risk factors. <i>Transplantation Proceedings</i> , 2008 , 40, 764-6	1.1	37
32	Inhibition of COX 1 and 2 prior to renal ischemia/reperfusion injury decreases the development of fibrosis. <i>Molecular Medicine</i> , 2008 , 14, 724-30	6.2	49
31	The effects of rapamycin in the progression of renal fibrosis. <i>Transplantation Proceedings</i> , 2007 , 39, 457-9	1.1	12
30	Effect of panel-reactive antibody in predicting crossmatch selection of cadaveric kidney recipients. <i>Transplantation Proceedings</i> , 2007 , 39, 429-31	1.1	7
29	Uric acid and hypertension. <i>Current Hypertension Reports</i> , 2006 , 8, 111-5	4.7	64
28	Uric acid--a uremic toxin?. <i>Blood Purification</i> , 2006 , 24, 67-70	3.1	53
27	Serum uric acid: a risk factor and a target for treatment?. <i>Journal of the American Society of Nephrology: JASN</i> , 2006 , 17, S69-73	12.7	113
26	Nosocomial infections in renal transplant patients: risk factors and treatment implications associated with urinary tract and surgical site infections. <i>Journal of Hospital Infection</i> , 2006 , 63, 117-23	6.9	81
25	Polymorphisms at exon 4 of p53 and the susceptibility to herpesvirus types 6 and 1 infection in renal transplant recipients. <i>Transplant International</i> , 2006 , 19, 732-7	3	12
24	Uric acid and transplantation. <i>Seminars in Nephrology</i> , 2005 , 25, 50-5	4.8	46
23	Urine cytology as a screening method for polyoma virus active infection. <i>Transplantation Proceedings</i> , 2004 , 36, 899-901	1.1	11
22	Hyperuricemia causes glomerular hypertrophy in the rat. <i>American Journal of Nephrology</i> , 2003 , 23, 2-7	4.6	198

21	The accuracy of (99m)Tc-DTPA scintigraphy in the evaluation of acute renal graft complications. <i>International Braz J Urol: Official Journal of the Brazilian Society of Urology</i> , 2003 , 29, 507-16	2	6
20	Chronic liver disease in kidney recipients with hepatitis C virus infection. <i>Clinical Transplantation</i> , 2003 , 17, 195-9	3.8	12
19	Microvascular and tubulointerstitial injury associated with chronic hypoxia-induced hypertension. <i>Kidney International</i> , 2003 , 63, 2088-93	9.9	54
18	Is there a pathogenetic role for uric acid in hypertension and cardiovascular and renal disease?. <i>Hypertension</i> , 2003 , 41, 1183-90	8.5	933
17	Angiotensin II type 1 receptor blockade ameliorates tubulointerstitial injury induced by chronic potassium deficiency. <i>Kidney International</i> , 2002 , 61, 951-8	9.9	29
16	Effects of cyclosporine in osteopontin null mice. <i>Kidney International</i> , 2002 , 62, 78-85	9.9	34
15	Uric acid, hominoid evolution, and the pathogenesis of salt-sensitivity. <i>Hypertension</i> , 2002 , 40, 355-60	8.5	413
14	Hyperuricemia induces a primary renal arteriopathy in rats by a blood pressure-independent mechanism. <i>American Journal of Physiology - Renal Physiology</i> , 2002 , 282, F991-7	4.3	573
13	A role for uric acid in the progression of renal disease. <i>Journal of the American Society of Nephrology: JASN</i> , 2002 , 13, 2888-97	12.7	968
12	Elevated uric acid increases blood pressure in the rat by a novel crystal-independent mechanism. <i>Hypertension</i> , 2001 , 38, 1101-6	8.5	923
11	Hypokalemia induces renal injury and alterations in vasoactive mediators that favor salt sensitivity. <i>American Journal of Physiology - Renal Physiology</i> , 2001 , 281, F620-9	4.3	79
10	Post-cyclosporine-mediated hypertension and nephropathy: amelioration by vascular endothelial growth factor. <i>American Journal of Physiology - Renal Physiology</i> , 2001 , 280, F727-36	4.3	90
9	Hyperuricemia exacerbates chronic cyclosporine nephropathy. <i>Transplantation</i> , 2001 , 71, 900-5	1.8	90
8	Impaired angiogenesis in the remnant kidney model: I. Potential role of vascular endothelial growth factor and thrombospondin-1. <i>Journal of the American Society of Nephrology: JASN</i> , 2001 , 12, 1434-1447	12.7	258
7	Impaired angiogenesis in the remnant kidney model: II. Vascular endothelial growth factor administration reduces renal fibrosis and stabilizes renal function. <i>Journal of the American Society of Nephrology: JASN</i> , 2001 , 12, 1448-1457	12.7	317
6	Vascular endothelial growth factor accelerates renal recovery in experimental thrombotic microangiopathy. <i>Kidney International</i> , 2000 , 58, 2390-9	9.9	165
5	Involvement of Macrophage Migration Inhibitory Factor (MIF) in Experimental Uric Acid Nephropathy. <i>Molecular Medicine</i> , 2000 , 6, 837-848	6.2	35
4	Percutaneous renal graft biopsy: a clinical, laboratory and pathological analysis. <i>Sao Paulo Medical Journal</i> , 1999 , 117, 57-62	1.6	2

3	Standardization of cellular immunoenzyme assay for anti-HLA class I antibodies evaluation: comparison with complement-dependent cytotoxicity methods. <i>Transplantation Proceedings</i> , 1999 , 31, 2989-93	1.1	2
2	Use of aminophylline and enalapril in posttransplant polycythemia. <i>Transplantation</i> , 1998 , 65, 1461-4	1.8	22
1	Nonrecurrent hemolytic uremic syndrome (HUS de novo) as cause of acute renal failure after renal transplant. <i>Renal Failure</i> , 1997 , 19, 271-7	2.9	3
