#	ARTICLE	IF	CITATIONS
1	Neurokinin $\epsilon$ 1 receptor antagonist rolapitant suppresses anxiety and alcohol intake produced by repeated withdrawal episodes. <i>FEBS Journal</i> , 2022, 289, 5021-5029.	4.7	0
2	Active immunization against serum alcohol dehydrogenase normalizes brain dopamine metabolism disturbed during chronic alcohol consumption. <i>Alcohol</i> , 2020, 83, 17-28.	1.7	4
3	Cortical Glutamate/GABA Imbalance after Combined Radiation Exposure: Relevance to Human Deep-Space Missions. <i>Neuroscience</i> , 2019, 416, 295-308.	2.3	16
4	A Comparison of mRNA Expression of Dopamine Receptors, Tyrosine Hydroxylase, and Dopamine Transporter in the Mesolimbic System of Rats with Different Levels of Alcohol Consumption. <i>Neurochemical Journal</i> , 2019, 13, 137-144.	0.5	2
5	Experimental Approaches to the Study of Behavioral Impairments Associated with Prenatal Exposure to Alcohol. <i>Neuroscience and Behavioral Physiology</i> , 2019, 49, 894-902.	0.4	1
6	Dopamine D1 $\epsilon$ D2 receptor heterodimers: A literature review. <i>Biochemistry (Moscow) Supplement Series B: Biomedical Chemistry</i> , 2017, 11, 111-119.	0.4	7
7	The selective agonist of dopamine D2 receptors cabergoline decreases alcohol consumption and increases the level of DRD2 mRNA in the brain of rats with chronic alcohol intoxication. <i>Neurochemical Journal</i> , 2017, 11, 72-78.	0.5	2
8	A comparison of the expression of $\alpha$ -synuclein mRNA in the brain of rats with different levels of alcohol consumption. <i>Neurochemical Journal</i> , 2016, 10, 294-299.	0.5	2
9	Gamma-synuclein binds synaptic vesicles but does not interact with SNARE-complex proteins. <i>Doklady Biochemistry and Biophysics</i> , 2014, 456, 108-110.	0.9	1
