#	ARTICLE	IF	CITATIONS
1	Goodbye to the SIRS, the reason why we do not need you. American Journal of Emergency Medicine, 2018, 36, 1317-1318.	1.6	12
2	Lactate levels in arterial and venous blood may be correlated but not equivalent. Journal of Critical Care, 2017, 40, 267-268.	2.2	4
3	Infection should be an essential element of sepsis and the superiority of the newest sepsis definition. American Journal of Emergency Medicine, 2017, 35, 797-798.	1.6	3
4	Quick sepsis-related organ failure assessment (qSOFA) predicting outcomes in patients with infection, some lingering doubts. American Journal of Emergency Medicine, 2017, 35, 649.	1.6	3
5	Accuracy and reliability of brain natriuretic peptide (BNP) in predicting the prognosis of non-cardiac patients with sepsis. Journal of Critical Care, 2018, 44, 475-476.	2.2	3
6	The comparisons and limitations of Sepsis 2.0 and Sepsis 3.0. Journal of Critical Care, 2018, 47, 350-351.	2.2	3
7	Some questions on the use of Xuebijing in treating patients with sepsis. American Journal of Emergency Medicine, 2017, 35, 925-926.	1.6	2
8	“Small-study effects” in meta-analysis should not be ignored. Journal of Critical Care, 2017, 39, 283-284.	2.2	2
9	Evolving cutoff values of “hyperlactatemia” and the role of infection. American Journal of Emergency Medicine, 2017, 35, 1373-1374.	1.6	2
10	Human leukocyte antigen-DR expression might predict outcomes in severe sepsis, but diabetes mellitus cannot be ignored. Critical Care, 2017, 21, 149.	5.8	2
11	Concerns about the study of septic predictor index as a novel tool in detecting thermally injured patients susceptible to sepsis. Surgery, 2018, 164, 1126-1134.	1.9	2
12	What is the meaning of “early CAG”? Resuscitation, 2020, 146, 285-286.	3.0	2
13	Appraising the Accuracy of Ischaemia-Modified Albumin in Diagnosing Stroke: A Systematic Review and Meta-Analysis. Cerebrovascular Diseases, 2021, 50, 365-370.	1.7	2
14	Diagnostic Accuracy of Serum Amyloid A in Acute Appendicitis: A Systematic Review and Meta-Analysis. Surgical Infections, 2022, 23, 380-387.	1.4	2
15	“HLA-DR less than 400 mAb/cell would be better than the threshold value of 1000 mAb/cell in predicting mortality in pediatric septic patients. Journal of Critical Care, 2017, 39, 289-290.	2.2	1
16	Early goal-directed therapy is not equivalent to goal-oriented therapy or protocol-directed therapy. Journal of Critical Care, 2017, 38, 371.	2.2	1
17	Obesity and infection, accompanying phenomenon or causal association?. Clinical Microbiology and Infection, 2018, 24, 668.	6.0	1
18	Sepsis Screening Tools in the Era of Sepsis 3.0. Surgical Infections, 2018, 19, 553-553.	1.4	1

#	ARTICLE	IF	CITATIONS
19	Doubts on the meta-analysis of serum procalcitonin levels as a diagnostic marker for septic arthritis. American Journal of Emergency Medicine, 2018, 36, 2104-2105.	1.6	1
20	Targeted end point of CVP of 15 mm Hg would be better than that of 12 mm Hg in the patients with mechanical ventilation. American Journal of Emergency Medicine, 2018, 36, 331-332.	1.6	1
21	An appropriate mean arterial pressure (MAP) does not always mean hemodynamic stability in septic shock patients. Journal of Critical Care, 2018, 43, 397-398.	2.2	1
22	The role of corticosteroid in septic shock patients. Journal of Critical Care, 2018, 43, 384-385.	2.2	1
23	Updated Knowledge About the Diagnosis and Treatment of Sepsis and Septic Shock. Journal of Emergency Nursing, 2018, 44, 444-445.	1.0	1
24	What is the criterion of 'high' pentraxin-3 (PTX-3) cutoff in patients with sepsis?. Journal of Infection, 2018, 77, 75-81.	3.3	1
25	Fluid resuscitation in pre-hospital patients with septic shock: One size does not fit all. American Journal of Emergency Medicine, 2019, 37, 168-169.	1.6	1
26	Some doubts on the meta-analysis of the clinical significance of thrombocytopenia complicating sepsis. Journal of Infection, 2019, 79, 277-287.	3.3	1
27	Some Doubts on the Study of Clinical Prognoses of Patients with a Bloodstream Infection Caused by Ampicillin-Susceptible but Penicillin-Resistant Enterococcus faecalis. Antimicrobial Agents and Chemotherapy, 2019, 63, .	3.2	1
28	Definitions for sepsis in pediatrics should be different from the adults. Journal of Critical Care, 2017, 39, 288.	2.2	0
29	Could we compare two totally different groups of patients without adjustment?. Journal of Critical Care, 2017, 40, 310-311.	2.2	0
30	Sepsis-associated cardiac arrest, caused or being caused?. Journal of Critical Care, 2017, 40, 289-290.	2.2	0
31	Authors respond to Both qSOFA score and bedside plasma lactate are the predictors of mortality for patients with infections in ED. American Journal of Emergency Medicine, 2017, 35, 915-916.	1.6	0
32	Some questions on Shenfu injection for patients with sepsis. American Journal of Emergency Medicine, 2017, 35, 930-931.	1.6	0
33	The impact of emergency department crowding on outcomes, other aspects should not be ignored. American Journal of Emergency Medicine, 2017, 35, 1561-1562.	1.6	0
34	The interventions in the control group should not be ignored. Journal of Critical Care, 2017, 42, 346-347.	2.2	0
35	Clinical study of a new Modified Early Warning System scoring system, some lingering doubts. Journal of Critical Care, 2017, 40, 303-304.	2.2	0
36	Classifying reasons for mortality in septic patients by limited categories, still a long way to go. Journal of Critical Care, 2018, 44, 466-467.	2.2	0

#	ARTICLE	IF	CITATIONS
37	Acute appendicitis caused by <i>Schistosoma japonicum</i> . <i>Journal of Infection and Public Health</i> , 2018, 11, 143-144.	4.1	0
38	Major contraindication to the endotoxemia activity assay in septic shock patients. <i>Journal of Critical Care</i> , 2018, 43, 380-381.	2.2	0
39	3-hour bundle is good, but 1-hour bundle may be better. <i>American Journal of Infection Control</i> , 2018, 46, 1317-1318.	2.3	0
40	It is SOFA score rather than quick SOFA (qSOFA) score that constitutes the clinical criteria of sepsis. <i>American Journal of Infection Control</i> , 2018, 46, 1315.	2.3	0
41	Positive qSOFA might predict the bad prognosis of patients during rapid response team reviews, but is that qSOFA right?. <i>Resuscitation</i> , 2018, 127, e9.	3.0	0
42	QSOFA score in identifying the septic patients according to Sepsis 1.0 or Sepsis 2.0, putting new wine into old bottles?. <i>American Journal of Emergency Medicine</i> , 2019, 37, 357-358.	1.6	0
43	1-hour bundle, an updated version of 3-hour bundle. <i>American Journal of Emergency Medicine</i> , 2019, 37, 542.	1.6	0
44	Female Patients with Sepsis Are Not Always Associated with a Higher Mortality Than Male Septic Patients. <i>American Journal of Medicine</i> , 2019, 132, e720.	1.5	0
45	Methodological issues in the study of inter-hospital transfer in low-volume and high-volume emergency departments and survival outcomes after out-of-hospital cardiac arrest. <i>Resuscitation</i> , 2019, 144, 207-208.	3.0	0
46	Prevalence of Infective Endocarditis in <i>Enterococcus faecalis</i> Bacteremia, <i>Methodology Issues</i> . <i>Journal of the American College of Cardiology</i> , 2019, 74, 2434.	2.8	0
47	The Wide Gap between the Knowledge of Adult and Pediatric Sepsis. <i>Surgical Infections</i> , 2019, 20, 251-251.	1.4	0
48	Some Questions on the Study of Renin-Angiotensin System Inhibition Following Transcatheter Aortic Valve Replacement. <i>Journal of the American College of Cardiology</i> , 2020, 75, 125.	2.8	0
49	Intravenous Interferon $\beta$ -1a for Severe ARDS. <i>JAMA - Journal of the American Medical Association</i> , 2020, 324, 515.	7.4	0
50	Methodological Issues on the Study of Eosinopenia as an Adverse Marker of Clinical Outcomes in Patients With Acute Myocardial Infarction. <i>American Journal of Medicine</i> , 2020, 133, e446.	1.5	0
51	Be Careful with Adverse Events Caused by Cefoperazone-Sulbactam. <i>Antimicrobial Agents and Chemotherapy</i> , 2020, 64, .	3.2	0
52	Some Unrecognized Biases in the Study of Patients Undergoing Multivessel Coronary Artery Bypass Grafting Surgery. <i>Journal of the American College of Cardiology</i> , 2020, 75, 1367-1368.	2.8	0
53	Ignored Biases in the Study of Oral Anticoagulants in Patients With Atrial Fibrillation and Stage 4 or 5 Chronic Kidney Disease. <i>American Journal of Medicine</i> , 2020, 133, e387.	1.5	0
54	Methodological Issues on the Study of the Significance of Longitudinal Clinical Congestion Pattern in Chronic Heart Failure. <i>American Journal of Medicine</i> , 2020, 133, e329.	1.5	0

#	ARTICLE	IF	CITATIONS
55	The significance of door-to-balloon time in the patients with ST-elevation myocardial infarction. Resuscitation, 2020, 148, 277-280.	3.0	0
56	Premature Menopause and Risk for Cardiovascular Disease. JAMA - Journal of the American Medical Association, 2020, 323, 1616.	7.4	0
57	Risk factors associated with cardiac arrest. Resuscitation, 2020, 151, 215-216.	3.0	0
