

Benjamin Mullish

List of Publications by Citations

Source: <https://exaly.com/author-pdf/622253/benjamin-mullish-publications-by-citations.pdf>

Version: 2024-04-23

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
110	International consensus conference on stool banking for faecal microbiota transplantation in clinical practice. <i>Gut</i> , 2019 , 68, 2111-2121	19.2	169
109	The use of faecal microbiota transplant as treatment for recurrent or refractory infection and other potential indications: joint British Society of Gastroenterology (BSG) and Healthcare Infection Society (HIS) guidelines. <i>Gut</i> , 2018 , 67, 1920-1941	19.2	153
108	The evolution of the use of faecal microbiota transplantation and emerging therapeutic indications. <i>Lancet, The</i> , 2019 , 394, 420-431	40	145
107	Bile acid profiling and quantification in biofluids using ultra-performance liquid chromatography tandem mass spectrometry. <i>Analytical Chemistry</i> , 2015 , 87, 9662-70	7.8	120
106	Microbial bile salt hydrolases mediate the efficacy of faecal microbiota transplant in the treatment of recurrent infection. <i>Gut</i> , 2019 , 68, 1791-1800	19.2	100
105	Optimized Sample Handling Strategy for Metabolic Profiling of Human Feces. <i>Analytical Chemistry</i> , 2016 , 88, 4661-8	7.8	97
104	Effects of Fecal Microbiota Transplantation With Oral Capsules in Obese Patients. <i>Clinical Gastroenterology and Hepatology</i> , 2020 , 18, 855-863.e2	6.9	87
103	Fecal Microbiota Transplantation in Patients With Primary Sclerosing Cholangitis: A Pilot Clinical Trial. <i>American Journal of Gastroenterology</i> , 2019 , 114, 1071-1079	0.7	82
102	Screening of faecal microbiota transplant donors during the COVID-19 outbreak: suggestions for urgent updates from an international expert panel. <i>The Lancet Gastroenterology and Hepatology</i> , 2020 , 5, 430-432	18.8	82
101	1171. Impact on Mortality, Length of Stay, and Antibiotic Use in Allogenic and Autologous Stem Cell Transplant Patients Colonized With Carbapenemase-Producing Enterobacteriaceae. <i>Open Forum Infectious Diseases</i> , 2018 , 5, S353-S354	1	78
100	Review article: depression and the use of antidepressants in patients with chronic liver disease or liver transplantation. <i>Alimentary Pharmacology and Therapeutics</i> , 2014 , 40, 880-92	6.1	72
99	Inhibiting Growth of <i>Clostridioides difficile</i> by Restoring Valerate, Produced by the Intestinal Microbiota. <i>Gastroenterology</i> , 2018 , 155, 1495-1507.e15	13.3	70
98	Reorganisation of faecal microbiota transplant services during the COVID-19 pandemic. <i>Gut</i> , 2020 , 69, 1555-1563	19.2	57
97	Antibiotic therapy and outcome from immune-checkpoint inhibitors 2019 , 7, 287		48
96	infection and antibiotic-associated diarrhoea. <i>Clinical Medicine</i> , 2018 , 18, 237-241	1.9	45
95	Functional microbiomics: Evaluation of gut microbiota-bile acid metabolism interactions in health and disease. <i>Methods</i> , 2018 , 149, 49-58	4.6	44
94	Fecal microbiota and bile acid interactions with systemic and adipose tissue metabolism in diet-induced weight loss of obese postmenopausal women. <i>Journal of Translational Medicine</i> , 2018 , 16, 244	8.5	44

93	Anticoagulation in chronic liver disease. <i>Journal of Hepatology</i> , 2017 , 66, 1313-1326	13.4	36
92	The application of omics techniques to understand the role of the gut microbiota in inflammatory bowel disease. <i>Therapeutic Advances in Gastroenterology</i> , 2019 , 12, 1756284818822250	4.7	36
91	Immunotoxicity from checkpoint inhibitor therapy: clinical features and underlying mechanisms. <i>Immunology</i> , 2020 , 159, 167-177	7.8	35
90	High-Throughput, Machine Learning-Based Quantification of Steatosis, Inflammation, Ballooning, and Fibrosis in Biopsies From Patients With Nonalcoholic Fatty Liver Disease. <i>Clinical Gastroenterology and Hepatology</i> , 2020 , 18, 2081-2090.e9	6.9	35
89	Monitoring the Response of the Human Urinary Metabolome to Brief Maximal Exercise by a Combination of RP-UPLC-MS and (1)H NMR Spectroscopy. <i>Journal of Proteome Research</i> , 2015 , 14, 4610-4622	5.6	32
88	Faecal microbiota transplantation for recurrent infection: An updated systematic review and meta-analysis. <i>EClinicalMedicine</i> , 2020 , 29-30, 100642	11.3	31
87	A randomised controlled study shows supplementation of overweight and obese adults with lactobacilli and bifidobacteria reduces bodyweight and improves well-being. <i>Scientific Reports</i> , 2020 , 10, 4183	4.9	27
86	The gut microbiome: an under-recognised contributor to the COVID-19 pandemic?. <i>Therapeutic Advances in Gastroenterology</i> , 2020 , 13, 1756284820974914	4.7	25
85	Current and future pharmacological therapies for managing cirrhosis and its complications. <i>World Journal of Gastroenterology</i> , 2019 , 25, 888-908	5.6	24
84	In-hospital mortality is associated with inflammatory response in NAFLD patients admitted for COVID-19. <i>PLoS ONE</i> , 2020 , 15, e0240400	3.7	24
83	Effective fecal microbiota transplantation for recurrent <i>Clostridioides difficile</i> infection in humans is associated with increased signalling in the bile acid-farnesoid X receptor-fibroblast growth factor pathway. <i>Gut Microbes</i> , 2019 , 10, 142-148	8.8	24
82	The use of faecal microbiota transplant as treatment for recurrent or refractory <i>Clostridium difficile</i> infection and other potential indications: joint British Society of Gastroenterology (BSG) and Healthcare Infection Society (HIS) guidelines. <i>Journal of Hospital Infection</i> , 2018 , 100 Suppl 1, S1-S31	6.9	23
81	Global Metabolic Stress of Isoeffort Continuous and High Intensity Interval Aerobic Exercise: A Comparative H NMR Metabonomic Study. <i>Journal of Proteome Research</i> , 2016 , 15, 4452-4463	5.6	22
80	Faecal microbiota transplant: a novel biological approach to extensively drug-resistant organism-related non-relapse mortality. <i>Bone Marrow Transplantation</i> , 2017 , 52, 1452-1454	4.4	22
79	Derivation and validation of a cardiovascular risk score for prediction of major acute cardiovascular events in non-alcoholic fatty liver disease; the importance of an elevated mean platelet volume. <i>Alimentary Pharmacology and Therapeutics</i> , 2019 , 49, 1077-1085	6.1	21
78	A Two-Way Interaction between Methotrexate and the Gut Microbiota of Male Sprague-Dawley Rats. <i>Journal of Proteome Research</i> , 2020 , 19, 3326-3339	5.6	18
77	Disease Prevention Not Decolonization: A Model for Fecal Microbiota Transplantation in Patients Colonized With Multidrug-resistant Organisms. <i>Clinical Infectious Diseases</i> , 2021 , 72, 1444-1447	11.6	18
76	Outcomes of Fecal Microbiota Transplantation in Patients With Inflammatory Bowel Diseases and Recurrent <i>Clostridioides difficile</i> Infection. <i>Gastroenterology</i> , 2020 , 159, 1982-1984	13.3	15

75	Rapid resolution of COVID-19 after faecal microbiota transplantation. <i>Gut</i> , 2022 , 71, 230-232	19.2	15
74	Inflammatory Bowel Disease Outcomes Following Fecal Microbiota Transplantation for Recurrent <i>C. difficile</i> Infection. <i>Inflammatory Bowel Diseases</i> , 2021 , 27, 1371-1378	4.5	14
73	Fecal Microbiota Transplantation: The Evolving Risk Landscape. <i>American Journal of Gastroenterology</i> , 2021 , 116, 647-656	0.7	14
72	Comparative epidemiology of <i>Clostridium difficile</i> infection: England and the USA. <i>International Journal for Quality in Health Care</i> , 2017 , 29, 785-791	1.9	13
71	Autotaxin, bile acid profile and effect of ileal bile acid transporter inhibition in primary biliary cholangitis patients with pruritus. <i>Liver International</i> , 2019 , 39, 967-975	7.9	13
70	Fecal microbiota transplant from a rational stool donor improves hepatic encephalopathy: A randomized clinical trial. <i>Hepatology</i> , 2017 , 66, 1354-1355	11.2	13
69	National survey of practice of faecal microbiota transplantation for <i>Clostridium difficile</i> infection in the UK. <i>Journal of Hospital Infection</i> , 2017 , 95, 444-445	6.9	13
68	In search of stool donors: a multicenter study of prior knowledge, perceptions, motivators, and deterrents among potential donors for fecal microbiota transplantation. <i>Gut Microbes</i> , 2020 , 11, 51-62	8.8	13
67	Understanding the mechanisms of efficacy of fecal microbiota transplant in treating recurrent infection and beyond: the contribution of gut microbial-derived metabolites. <i>Gut Microbes</i> , 2020 , 12, 1810531	8.8	12
66	Probiotics reduce self-reported symptoms of upper respiratory tract infection in overweight and obese adults: should we be considering probiotics during viral pandemics?. <i>Gut Microbes</i> , 2021 , 13, 1-9	8.8	12
65	Microbiome manipulation with faecal microbiome transplantation as a therapeutic strategy in <i>Clostridium difficile</i> infection. <i>QJM - Monthly Journal of the Association of Physicians</i> , 2015 , 108, 355-9	2.7	11
64	Ursodeoxycholic acid enriches intestinal bile salt hydrolase-expressing Bacteroidetes in cholestatic pregnancy. <i>Scientific Reports</i> , 2020 , 10, 3895	4.9	11
63	Gaps in knowledge and future directions for the use of faecal microbiota transplant in the treatment of inflammatory bowel disease. <i>Therapeutic Advances in Gastroenterology</i> , 2019 , 12, 1756284819891038	4.7	11
62	Posters (Abstracts 2892348). <i>Hepatology</i> , 2019 , 70, 188-1382	11.2	10
61	Mechanisms underpinning the efficacy of faecal microbiota transplantation in treating gastrointestinal disease. <i>Therapeutic Advances in Gastroenterology</i> , 2020 , 13, 1756284820946904	4.7	10
60	The contribution of bile acid metabolism to the pathogenesis of infection. <i>Therapeutic Advances in Gastroenterology</i> , 2021 , 14, 17562848211017725	4.7	9
59	Impact of fecal microbiota transplantation with capsules on the prevention of metabolic syndrome among patients with obesity. <i>Hormones</i> , 2021 , 20, 209-211	3.1	9
58	The implementation of omics technologies in cancer microbiome research. <i>Ecancermedicalscience</i> , 2018 , 12, 864	2.7	8

57	Intestinal microbiome transfer, a novel therapeutic strategy for COVID-19 induced hyperinflammation?: In reply to, COVID-19: Immunology and treatment options\$ Felsenstein, Herbert McNamara et al. 2020 <i>S Clinical Immunology</i> , 2020 , 218, 108542	9	7
56	Aspartame sensitivity? A double blind randomised crossover study. <i>PLoS ONE</i> , 2015 , 10, e0116212	3.7	7
55	Fecal microbiota transplantation in gastrointestinal and extraintestinal disorders. <i>Future Microbiology</i> , 2020 , 15, 1173-1183	2.9	7
54	Obstacles to establishing an NHS faecal transplant programme. <i>BMJ, The</i> , 2015 , 351, h6043	5.9	6
53	Non-Alcoholic Fatty Liver Disease and Vascular Disease. <i>Current Vascular Pharmacology</i> , 2021 , 19, 269-279	3.3	6
52	Long term outcomes of initial infliximab therapy for inflammatory pouch pathology: a multi-Centre retrospective study. <i>Scandinavian Journal of Gastroenterology</i> , 2018 , 53, 1051-1058	2.4	6
51	Severe cholestatic jaundice after a single administration of ajmaline; a case report and review of the literature. <i>BMC Gastroenterology</i> , 2014 , 14, 60	3	5
50	The gut microbiome: what every gastroenterologist needs to know. <i>Frontline Gastroenterology</i> , 2021 , 12, 118-127	2.6	5
49	Systematic review: the association between the gut microbiota and medical therapies in inflammatory bowel disease. <i>Alimentary Pharmacology and Therapeutics</i> , 2021 ,	6.1	5
48	Changes in IgA-targeted microbiota following fecal transplantation for recurrent infection. <i>Gut Microbes</i> , 2021 , 13, 1-12	8.8	5
47	Identifying the factors influencing outcome in probiotic studies in overweight and obese patients: host or microbiome?. <i>Gut</i> , 2021 , 70, 225-226	19.2	5
46	Daily supplementation with the Lab4P probiotic consortium induces significant weight loss in overweight adults. <i>Scientific Reports</i> , 2021 , 11, 5	4.9	5
45	The use of Faecal Microbiota Transplantation (FMT) in Europe: A Europe-wide survey. <i>Lancet Regional Health - Europe, The</i> , 2021 , 9, 100181		5
44	The potential utility of fecal (or intestinal) microbiota transplantation in controlling infectious diseases.. <i>Gut Microbes</i> , 2022 , 14, 2038856	8.8	5
43	Case 25-2014: A man with ulcerative colitis and bloody diarrhea. <i>New England Journal of Medicine</i> , 2014 , 371, 1848-9	59.2	4
42	Current and future targets for faecal microbiota transplantation. <i>Human Microbiome Journal</i> , 2019 , 11, 100045	5.6	4
41	Antibiotic-Associated Disruption of Microbiota Composition and Function in Cirrhosis Is Restored by Fecal Transplant. <i>Hepatology</i> , 2018 , 68, 1205	11.2	4
40	Fecal microbiota transplantation with ruxolitinib as a treatment modality for steroid-refractory/dependent acute, gastrointestinal graft-versus-host disease: A case series. <i>American Journal of Hematology</i> , 2021 , 96, E461-E463	7.1	4

39	Letter: liver disease and COVID-19-not the perfect storm. <i>Alimentary Pharmacology and Therapeutics</i> , 2020 , 52, 572-574	6.1	3
38	SARS-CoV-2 vaccines and donor recruitment for FMT. <i>The Lancet Gastroenterology and Hepatology</i> , 2021 , 6, 264-266	18.8	3
37	Meeting update: faecal microbiota transplantation--bench, bedside, courtroom?. <i>Frontline Gastroenterology</i> , 2018 , 9, 45-48	2.6	3
36	Fecal Microbiota Transplant Mitigates Adverse Outcomes Seen in Patients Colonized With Multidrug-Resistant Organisms Undergoing Allogeneic Hematopoietic Cell Transplantation. <i>Frontiers in Cellular and Infection Microbiology</i> , 2021 , 11, 684659	5.9	3
35	Understanding the Mechanisms of Efficacy of Fecal Microbiota Transplantation in the Treatment of Clostridium Difficile Infection: The Potential Role of Bilemetabolising Enzymes. <i>Gastroenterology</i> , 2017 , 152, S47	13.3	2
34	7 The Icon Study: Inflammatory Bowel Disease and Recurrent Clostridium Difficile Infection: Outcomes After Fecal Microbiota Transplantation. <i>Gastroenterology</i> , 2019 , 156, S-2-S-3	13.3	2
33	Faecal microbiota transplant for eradication of multidrug-resistant Enterobacteriaceae: a lesson in applying best practice? Re: SA five-day course of oral antibiotics followed by faecal transplantation to eradicate carriage of multidrug-resistant Enterobacteriaceae: A Randomized Clinical Trials <i>Clinical Microbiology and Infection</i> , 2019 , 25, 912-913	9.5	2
32	Sa1924 Effect of Short Chain Fatty Acids on Gut-Brain Axis Using a Microglial Cell Model. <i>Gastroenterology</i> , 2019 , 156, S-455	13.3	2
31	Letter: improvements in mental health after faecal microbiota transplantation-an underexplored treatment-related benefit?. <i>Alimentary Pharmacology and Therapeutics</i> , 2018 , 47, 1562-1563	6.1	2
30	Letter: intestinal microbiota transfer-updating the nomenclature to increase acceptability. <i>Alimentary Pharmacology and Therapeutics</i> , 2020 , 52, 1622-1623	6.1	2
29	A Multi-Factorial Observational Study on Sequential Fecal Microbiota Transplant in Patients with Medically Refractory Infection. <i>Cells</i> , 2021 , 10,	7.9	2
28	: innovations in target discovery and potential for therapeutic success. <i>Expert Opinion on Therapeutic Targets</i> , 2021 , 1-15	6.4	2
27	Letter: faecal microbiota transplantation for IBS. <i>Alimentary Pharmacology and Therapeutics</i> , 2020 , 52, 556-557	6.1	2
26	25 - Microbiome and Metabolic Markers of Clostridium Difficile Recurrence. <i>Gastroenterology</i> , 2018 , 154, S-8-S-9	13.3	2
25	Weight loss in a man from West Africa. <i>S. stercoralis</i> hyperinfection. <i>Gut</i> , 2015 , 64, 1846, 1888	19.2	1
24	Letter: depression and the use of anti-depressants in patients with chronic liver disease or liver transplantation - authorsSreply. <i>Alimentary Pharmacology and Therapeutics</i> , 2015 , 41, 914-5	6.1	1
23	Faecal microbiota transplantations and urinary tract infections - AuthorsSreply. <i>Lancet, The</i> , 2020 , 395, 271	40	1
22	How to Adapt an Intestinal Microbiota Transplantation program to reduce the risk of invasive multidrug-resistant infection. <i>Clinical Microbiology and Infection</i> , 2021 ,	9.5	1

21	Reply to Woodworth, et al. <i>Clinical Infectious Diseases</i> , 2021 , 72, e924-e925	11.6	1
20	Non-selective beta-blocker use in cirrhosis: the additional benefit in preventing secondary infections.. <i>Frontline Gastroenterology</i> , 2022 , 13, 86-88	2.6	1
19	Binge-eating disorder is associated with an unfavorable body mass composition in patients with non-alcoholic fatty liver disease. <i>International Journal of Eating Disorders</i> , 2021 , 54, 2025-2030	6.3	1
18	Multimomics Profiling Reveals Signatures of Dysmetabolism in Urban Populations in Central India. <i>Microorganisms</i> , 2021 , 9,	4.9	1
17	Liver function tests and metabolic-associated fatty liver disease: Changes in upper normal limits, does it really matter?. <i>World Journal of Hepatology</i> , 2021 , 13, 2104-2112	3.4	1
16	Effects of bowel preparation on intestinal bacterial associated urine and faecal metabolites and the associated faecal microbiome.. <i>BMC Gastroenterology</i> , 2022 , 22, 240	3	1
15	Shoulder pain and dysphagia with an unexpected cause. <i>BMJ Case Reports</i> , 2011 , 2011,	0.9	0
14	185 Evaluating Dynamics of Bile Acid Metabolism to Predict Recurrence of Clostridioides difficile Infection. <i>American Journal of Gastroenterology</i> , 2019 , 114, S113-S113	0.7	0
13	NAFLD: Time to apply quantitation in liver biopsies as endpoints in clinical trials. <i>Journal of Hepatology</i> , 2021 , 74, 241-242	13.4	0
12	Gastrointestinal: Duodenal variceal bleeding secondary to thrombophilia-related portal vein thrombosis. <i>Journal of Gastroenterology and Hepatology (Australia)</i> , 2018 , 33, 336	4	
11	Letter: role of mean platelet volume levels in the prediction of major acute cardiovascular events in patients with non-alcoholic fatty liver disease-authorsSreply. <i>Alimentary Pharmacology and Therapeutics</i> , 2019 , 50, 1140-1141	6.1	
10	Review of Rifaximin: A Summary of the Current Evidence and Benefits Beyond Licensed Use. <i>European Medical Journal (Chelmsford, England)</i> ,94-100	7.5	
9	S0650 Fecal Microbiota Transplantation Decolonizes C. difficile in Patients With Inflammatory Bowel Disease and Concomitant C. difficile Infection. <i>American Journal of Gastroenterology</i> , 2020 , 115, S326-S326	0.7	
8	P844 Higher proportions of genera and species in the Firmicutes phylum are associated with a healthy pouch compared with patients with chronic pouchitis. <i>Journal of Crohn's and Colitis</i> , 2020 , 14, S652-S652	1.5	
7	A Guide to the Gut Microbiome and its Relevance to Critical Care. <i>British Journal of Nursing</i> , 2020 , 29, 1106-1112	0.7	
6	Romanian National Guideline on Translating Fecal Microbiota Transplantation Applications related to Clostridioides difficile Infections into the Local Clinical Practice. <i>Journal of Gastrointestinal and Liver Diseases</i> , 2021 , 30, 147-163	1.4	
5	OC-040 National Survey of Practice of Faecal Microbiota Transplantation for Clostridium Difficile Infection in the United Kingdom. <i>Gut</i> , 2016 , 65, A23.2-A24	19.2	
4	PWE-094 Understanding The Efficacy of Faecal Microbiota Transplantation in Clostridium Difficile Infection: Re-Establishment of Gut Microbiota with The Ability to Degrade Bile?. <i>Gut</i> , 2016 , 65, A184.2-A184	18.2	

3 Liver Biopsy **2019**, 395-407

2 837 Short Chain Fatty Acid Profiles Are Altered by Fecal Microbiota Transplantation for the Treatment of Inflammatory Bowel Disease and Recurrent *Clostridioides difficile* Infection. *American Journal of Gastroenterology*, **2019**, 114, S484-S485 0.7

1 Recurrent bacteraemia following variceal haemorrhage. *Gut*, **2020**, 69, 726-780 19.2
