#	Article	IF	CITATIONS
1	Size matters: how sample size affects the reproducibility and specificity of gene set analysis. Human Genomics, 2019, 13, 42.	2.9	30
2	Template-guided DNA recombination. Theoretical Computer Science, 2005, 330, 237-250.	0.9	22
3	Comparative Analyses of Gene Co-expression Networks: Implementations and Applications in the Study of Evolution. Frontiers in Genetics, 2021, 12, 695399.	2.3	21
4	Families of languages defined by ciliate bio-operations. Theoretical Computer Science, 2004, 320, 51-69.	0.9	14
5	The effect of end-markers on counter machines and commutativity. Theoretical Computer Science, 2016, 627, 71-81.	0.9	13
6	Useful Templates and Iterated Template-Guided DNA Recombination in Ciliates. Theory of Computing Systems, 2006, 39, 619-633.	1.1	10
7	Juxtapose: a gene-embedding approach for comparing co-expression networks. BMC Bioinformatics, 2021, 22, 125.	2.6	10
8	L-system models for image-based phenomics: case studies of maize and canola. In Silico Plants, 2022, 4, .	1.9	9
9	On the uniqueness of shuffle on words and finite languages. Theoretical Computer Science, 2009, 410, 3711-3724.	0.9	8
10	Variations of checking stack automata: Obtaining unexpected decidability properties. Theoretical Computer Science, 2018, 738, 1-12.	0.9	8
11	On store languages of language acceptors. Theoretical Computer Science, 2018, 745, 114-132.	0.9	6
12	Algorithms for Inferring Context-Sensitive L-Systems. Lecture Notes in Computer Science, 2018, , 117-130.	1.3	6
13	Algorithmic decomposition of shuffle on words. Theoretical Computer Science, 2012, 454, 38-50.	0.9	5
14	A Fast and Reliable Hybrid Approach for Inferring L-systems. , 2018, , .		5
15	On the Density of Context-Free and Counter Languages. International Journal of Foundations of Computer Science, 2018, 29, 233-250.	1.1	5
16	Deletion operations on deterministic families of automata. Information and Computation, 2017, 256, 237-252.	0.7	4
17	On counting functions and slenderness of languages. Theoretical Computer Science, 2019, 777, 356-378.	0.9	4
18	Insertion operations on deterministic reversal-bounded counter machines. Journal of Computer and System Sciences, 2019, 104, 244-257.	1.2	4

IAN MCQUILLAN

#	Article	IF	CITATIONS
19	A Novel Technique Combining Image Processing, Plant Development Properties, and the Hungarian Algorithm, to Improve Leaf Detection in Maize. , 2020, , .		4
20	Generalizations of Checking Stack Automata: Characterizations and Hierarchies. International Journal of Foundations of Computer Science, 2021, 32, 481-508.	1.1	4
21	Insertion Operations on Deterministic Reversal-Bounded Counter Machines. Lecture Notes in Computer Science, 2015, , 200-211.	1.3	4
22	Gene Set Databases. , 2019, , .		4
23	New Techniques for Inferring L-systems Using Genetic Algorithm. Lecture Notes in Computer Science, 2018, , 13-25.	1.3	4
24	Algorithmic properties of ciliate sequence alignment. Theoretical Computer Science, 2010, 411, 919-925.	0.9	3
25	On the complexity and decidability of some problems involving shuffle. Information and Computation, 2018, 259, 214-224.	0.7	3
26	Inferring Stochastic L-Systems Using a Hybrid Greedy Algorithm. , 2018, , .		3
27	On families of full trios containing counter machine languages. Theoretical Computer Science, 2019, 799, 71-93.	0.9	3
28	Relationships between bounded languages, counter machines, finite-index grammars, ambiguity, and commutative regularity. Theoretical Computer Science, 2021, 862, 97-118.	0.9	3
29	On finite-index indexed grammars and their restrictions. Information and Computation, 2021, 279, 104613.	0.7	3
30	Techniques for inferring context-free Lindenmayer systems with genetic algorithm. Swarm and Evolutionary Computation, 2021, 64, 100893.	8.1	3
31	Space Complexity of Stack Automata Models. International Journal of Foundations of Computer Science, 2021, 32, 801-823.	1.1	3
32	On the Shuffle Automaton Size for Words. Electronic Proceedings in Theoretical Computer Science, EPTCS, 0, 3, 79-89.	0.8	3
33	On Bounded Semilinear Languages, Counter Machines, and Finite-Index ETOL. Lecture Notes in Computer Science, 2016, , 138-149.	1.3	3
34	On Finite-Index Indexed Grammars and Their Restrictions. Lecture Notes in Computer Science, 2017, , 287-298.	1.3	3
35	Descrambling Order Analysis in Ciliates. Lecture Notes in Computer Science, 2017, , 206-219.	1.3	3
36	Semilinearity of Families of Languages. International Journal of Foundations of Computer Science, 2020, 31, 1179-1198.	1.1	3

Ian McQuillan

#	Article	IF	CITATIONS
37	Exploiting High-Throughput Indoor Phenotyping to Characterize the Founders of a Structured B. napus Breeding Population. Frontiers in Plant Science, 2021, 12, 780250.	3.6	3
38	Parallelizing Peptide-Spectrum scoring using modern graphics processing units. , 2011, , .		2
39	Speed improvements of peptide-spectrum matching using Single-Instruction Multiple-Data instructions. Proteomics, 2011, 11, 3779-3785.	2.2	2
40	Run for Third!: A Defense of Aggressive Base Running. Math Horizons, 2016, 23, 14-15.	0.0	2
41	Computational identification of harmful mutation regions to the activity of transposable elements. BMC Genomics, 2017, 18, 862.	2.8	2
42	Sample Size and Reproducibility of Gene Set Analysis. , 2018, , .		2
43	DNA Methylation Data to Predict Suicidal and Non-Suicidal Deaths: A Machine Learning Approach. , 2018, , .		2
44	Generalizations of Checking Stack Automata: Characterizations and Hierarchies. Lecture Notes in Computer Science, 2018, , 416-428.	1.3	2
45	On Families of Full Trios Containing Counter Machine Languages. Lecture Notes in Computer Science, 2016, , 216-228.	1.3	2
46	Pineplot. , 2019, , .		2
47	Theoretical and computational properties of transpositions. Natural Computing, 2011, 10, 795-804.	3.0	1
48	Computational modelling of interruptional activities between transposable elements using grammars and the linear ordering problem. Soft Computing, 2016, 20, 19-35.	3.6	1
49	State grammars with stores. Theoretical Computer Science, 2019, 798, 23-39.	0.9	1
50	Silver: Forging almost Gold Standard Datasets. Genes, 2021, 12, 1523.	2.4	1
51	Space Complexity of Stack Automata Models. Lecture Notes in Computer Science, 2020, , 137-149.	1.3	1
52	State Grammars with Stores. Lecture Notes in Computer Science, 2018, , 163-174.	1.3	1
53	CSA-X: Modularized Constrained Multiple Sequence Alignment. Lecture Notes in Computer Science, 2017, , 143-154.	1.3	1
54	Variations of Checking Stack Automata: Obtaining Unexpected Decidability Properties. Lecture Notes in Computer Science, 2017, , 235-246.	1.3	1
