

Reha Uzsoy

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/6256576/reha-uzsoy-publications-by-year.pdf>

Version: 2024-04-27

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
172	Constraint violation reduction search for 0-1 mixed integer linear programming problems. <i>Engineering Optimization</i> , 2021 , 53, 609-626	2	
171	Conic programming models for production planning with clearing functions: Formulations and duality. <i>European Journal of Operational Research</i> , 2021 , 292, 953-966	5.6	1
170	Managing product transitions with learning and congestion effects. <i>International Journal of Production Economics</i> , 2021 , 239, 108190	9.3	0
169	A Simple Model of Capacity Contention During New Product Introductions. <i>IEEE Transactions on Semiconductor Manufacturing</i> , 2020 , 33, 240-251	2.6	1
168	Production Planning with Capacitated Resources and Congestion 2020 ,		7
167	Simulation-Based Performance Assessment of Production Planning Models With Safety Stock and Forecast Evolution in Semiconductor Wafer Fabrication. <i>IEEE Transactions on Semiconductor Manufacturing</i> , 2020 , 33, 1-12	2.6	10
166	Planning Models with Stationary Fixed Lead Times 2020 , 77-112		1
165	Production Planning and Control Frameworks 2020 , 29-45		
164	Univariate Clearing Functions 2020 , 143-189		
163	Time-Varying Lead Times and Iterative Multi-Model Approaches 2020 , 113-141		
162	Multivariate Clearing Functions 2020 , 191-220		
161	Workload and Cycle Time in the Production Unit 2020 , 19-28		
160	Applications of Clearing Functions 2020 , 239-262		
159	Lot-Sizing Models Using Multi-dimensional Clearing Functions 2020 , 221-237		
158	Iterative combinatorial auctions for managing product transitions in semiconductor manufacturing. <i>IIE Transactions</i> , 2020 , 52, 413-431	3.3	2
157	A data-driven iterative refinement approach for estimating clearing functions from simulation models of production systems. <i>International Journal of Production Research</i> , 2019 , 57, 6013-6030	7.8	8
156	Problemreduzierungsansätze für die Produktionsplanung unter Verwendung von Auslastungsfunktionen. <i>Automatisierungstechnik</i> , 2019 , 67, 455-467	0.8	

155	Editorial Appreciation to the TSM Community. <i>IEEE Transactions on Semiconductor Manufacturing</i> , 2019 , 32, 362-362	2.6	
154	Optimizing Engineering and Production Lots During Product Transitions in Semiconductor Manufacturing 2019 ,		1
153	Editorial 2018 Best Paper Award. <i>IEEE Transactions on Semiconductor Manufacturing</i> , 2019 , 32, 139-139	2.6	
152	Impact of Scheduling Policies on the Performance of an Additive Manufacturing Production System. <i>Procedia Manufacturing</i> , 2019 , 39, 447-456	1.5	8
151	Valid inequalities for concave piecewise linear regression. <i>Operations Research Letters</i> , 2019 , 47, 52-58	1	6
150	A survey of semiconductor supply chain models Part II: demand planning, inventory management, and capacity planning. <i>International Journal of Production Research</i> , 2018 , 56, 4546-4564	7.8	24
149	Robust optimization approaches for the equitable and effective distribution of donated food. <i>European Journal of Operational Research</i> , 2018 , 269, 516-531	5.6	19
148	Rolling horizon, multi-product production planning with chance constraints and forecast evolution for wafer fabs. <i>International Journal of Production Research</i> , 2018 , 56, 6112-6134	7.8	20
147	Rounding heuristics for multiple product dynamic lot-sizing in the presence of queueing behavior. <i>Computers and Operations Research</i> , 2018 , 100, 54-65	4.6	3
146	Editorial Appreciation to Our Reviewers. <i>IEEE Transactions on Semiconductor Manufacturing</i> , 2018 , 31, 405-405	2.6	
145	A survey of semiconductor supply chain models part I: semiconductor supply chains, strategic network design, and supply chain simulation. <i>International Journal of Production Research</i> , 2018 , 56, 4524-4545	7.8	40
144	A comparison of mixed integer programming formulations of the capacitated lot-sizing problem. <i>International Journal of Production Research</i> , 2018 , 56, 7064-7084	7.8	6
143	A survey of semiconductor supply chain models part III: master planning, production planning, and demand fulfilment. <i>International Journal of Production Research</i> , 2018 , 56, 4565-4584	7.8	29
142	SIMULATION OPTIMIZATION FOR PLANNING PRODUCT TRANSITIONS IN SEMICONDUCTOR MANUFACTURING FACILITIES 2018 ,		3
141	Editorial from the Incoming Editor-in-Chief. <i>IEEE Transactions on Semiconductor Manufacturing</i> , 2018 , 31, 195-195	2.6	
140	Problem Reduction Approaches for Production Planning Using Clearing Functions 2018 ,		1
139	Multi-dimensional clearing functions for aggregate capacity modelling in multi-stage production systems. <i>International Journal of Production Research</i> , 2017 , 55, 4164-4179	7.8	13
138	Modeling for the equitable and effective distribution of food donations under stochastic receiving capacities. <i>IIE Transactions</i> , 2017 , 49, 567-578	3.3	20

137	Load dependent lead time modelling: A robust optimization approach 2017 ,		1
136	An iterative refinement approach to fitting clearing functions to data from simulation models of production systems 2017 ,		3
135	Modeling for the equitable and effective distribution of donated food under capacity constraints. <i>IIE Transactions</i> , 2016 , 48, 252-266		47
134	Modeling the effect of public health resources and alerting on the dynamics of pertussis spread. <i>Health Systems</i> , 2016 , 5, 81-97	2.3	2
133	Computing the number of acute-care beds within NC Certificate of Need. <i>Health Systems</i> , 2016 , 5, 98-108.	3	
132	A metamodel-based Monte Carlo simulation approach for responsive production planning of manufacturing systems. <i>Journal of Manufacturing Systems</i> , 2016 , 38, 114-133	9.1	31
131	Achieving Equity, Effectiveness, and Efficiency in Food Bank Operations: Strategies for Feeding America with Implications for Global Hunger Relief. <i>Profiles in Operations Research</i> , 2016 , 229-256	1	15
130	Identifying potential bottlenecks in production systems using dual prices from a mathematical programming model. <i>International Journal of Production Research</i> , 2016 , 54, 2000-2018	7.8	14
129	Estimating the Costs of Planned Changes Implied by Freezing Production Plans. <i>Profiles in Operations Research</i> , 2016 , 17-44	1	4
128	2016 ,		4
127	Modeling the impact of new product introduction on the output of semiconductor wafer fabrication facilities 2016 ,		5
126	Chance-constrained formulations in rolling horizon production planning: an experimental study. <i>International Journal of Production Research</i> , 2016 , 54, 3927-3942	7.8	20
125	Modeling Cycle Times in Production Planning Models for Wafer Fabrication. <i>IEEE Transactions on Semiconductor Manufacturing</i> , 2016 , 29, 153-167	2.6	35
124	Zero-order production planning models with stochastic demand and workload-dependent lead times. <i>International Journal of Production Research</i> , 2015 , 53, 1661-1679	7.8	14
123	Estimating Clearing Functions for Production Resources Using Simulation Optimization. <i>IEEE Transactions on Automation Science and Engineering</i> , 2015 , 12, 539-552	4.9	24
122	Lead time modeling in production planning 2015 ,		4
121	Simulation-based performance assessment of production planning formulations for semiconductor wafer fabrication 2015 ,		12
120	. <i>IEEE Transactions on Semiconductor Manufacturing</i> , 2015 , 28, 374-384	2.6	24

119	A random keys genetic algorithm for a bicriterion project selection and scheduling problem. <i>International Journal of Planning and Scheduling</i> , 2015 , 2, 110	0.8	2
118	Statistical optimum estimation techniques for combinatorial optimization problems: a review and critique. <i>Journal of Heuristics</i> , 2014 , 20, 329-358	1.9	8
117	A comparison of multiple linear regression approaches for fitting clearing functions to empirical data. <i>International Journal of Production Research</i> , 2014 , 52, 3164-3184	7.8	17
116	An exploratory study of disaggregated clearing functions for production systems with multiple products. <i>International Journal of Production Research</i> , 2014 , 52, 5301-5322	7.8	16
115	The impact of lot-sizing in multiple product environments with congestion. <i>Journal of Manufacturing Systems</i> , 2014 , 33, 436-444	9.1	18
114	Modeling the evolution of dependency between demands, with application to inventory planning. <i>IIE Transactions</i> , 2014 , 46, 55-66		12
113	Assessing the impact of alternative continuous improvement programmes in a flow shop using system dynamics. <i>International Journal of Production Research</i> , 2014 , 52, 3014-3031	7.8	14
112	Integrated Production Planning and Pricing Decisions in Congestion-Prone Capacitated Production Systems. <i>Profiles in Operations Research</i> , 2014 , 29-68	1	1
111	Investigating interventions for increasing colorectal cancer screening: Insights from a simulation model. <i>Socio-Economic Planning Sciences</i> , 2013 , 47, 142-155	3.7	8
110	Modeling and Analysis of Integrated Planning of Production and Engineering Process Improvement. <i>IEEE Transactions on Semiconductor Manufacturing</i> , 2013 , 26, 414-422	2.6	14
109	The impact of simultaneous continuous improvement in setup time and repair time on manufacturing cycle times under uncertain conditions. <i>International Journal of Production Research</i> , 2013 , 51, 447-464	7.8	20
108	Planning Wafer Starts Using Nonlinear Clearing Functions: A Large-Scale Experiment. <i>IEEE Transactions on Semiconductor Manufacturing</i> , 2013 , 26, 602-612	2.6	45
107	A comparison of production planning formulations with exogenous cycle time estimates using a large-scale wafer fab model 2013 ,		1
106	An Experimental Comparison of Production Planning Using Clearing Functions and Iterative Linear Programming-Simulation Algorithms. <i>IEEE Transactions on Semiconductor Manufacturing</i> , 2012 , 25, 104-117	2.6	49
105	Continuous Dynamic Models, Clearing Functions, and Discrete-Event Simulation in Aggregate Production Planning 2012 , 103-126		8
104	Chance-Constraint-Based Heuristics for Production Planning in the Face of Stochastic Demand and Workload-Dependent Lead Times 2012 , 173-208		11
103	Optimization Models of Production Planning Problems. <i>Profiles in Operations Research</i> , 2011 , 437-507	1	33
102	Modelling and analysis of semiconductor manufacturing in a shrinking world: challenges and successes. <i>European Journal of Industrial Engineering</i> , 2011 , 5, 254	1.1	54

101	Production planning with load-dependent lead times and safety stocks for a single product. <i>International Journal of Planning and Scheduling</i> , 2011 , 1, 58	0.8	12
100	The effect of shop floor continuous improvement programs on the lot size/cycle time relationship in a multi-product single-machine environment. <i>International Journal of Advanced Manufacturing Technology</i> , 2011 , 52, 669-681	3.2	28
99	Production planning for semiconductor manufacturing via simulation optimization 2011 ,		15
98	Prioritising production and engineering lots in wafer fabrication facilities: a simulation study. <i>International Journal of Production Research</i> , 2011 , 49, 3105-3125	7.8	18
97	Using a mathematical programming model to examine the marginal price of capacitated resources. <i>International Journal of Production Economics</i> , 2011 , 131, 383-391	9.3	22
96	The Effects of Production Planning on the Dynamic Behavior of a Simple Supply Chain: An Experimental Study. <i>Profiles in Operations Research</i> , 2011 , 43-80	1	5
95	Estudo do efeito de programas de melhoria cont�ua em vari�veis do ch� de f�brica na rela� entre tamanho de lote de produ� e lead time: lead time relationship. <i>Gest� & Produ�</i> , 2010 , 17, 137-148	0.9	5
94	Modelling the response of a public health department to infectious disease 2010 ,		1
93	An Exploratory Analysis of Two Iterative Linear Programming/Simulation Approaches for Production Planning. <i>IEEE Transactions on Semiconductor Manufacturing</i> , 2010 , 23, 442-455	2.6	50
92	Estimating clearing functions from simulation data 2010 ,		13
91	Efeito da redu� do tamanho de lote e de programas de Melhoria Cont�ua no Estoque em Processo (WIP) e na Utiliza�: estudo utilizando uma abordagem h�brida System Dynamics - Factory Physics. <i>Production</i> , 2009 , 19, 214-229	1.3	7
90	Production planning with resources subject to congestion. <i>Naval Research Logistics</i> , 2009 , 56, 142-157	1.5	100
89	Heuristics for capacity planning problems with congestion. <i>Computers and Operations Research</i> , 2009 , 36, 1924-1934	4.6	7
88	A genetic algorithm for a single product network design model with lead time and safety stock considerations. <i>European Journal of Operational Research</i> , 2009 , 197, 599-608	5.6	74
87	An integrated production planning model with load-dependent lead-times and safety stocks. <i>Computers and Chemical Engineering</i> , 2009 , 33, 2159-2163	4	23
86	MINIMIZING TOTAL WEIGHTED COMPLETION TIME ON A SINGLE BATCH PROCESSING MACHINE. <i>Production and Operations Management</i> , 2009 , 6, 57-73	3.6	55
85	Exact and heuristic procedures for capacity expansion problems with congestion. <i>IIE Transactions</i> , 2008 , 40, 1185-1197		7
84	Integrating a decomposition procedure with problem reduction for factory scheduling with disruptions: a simulation study. <i>International Journal of Production Research</i> , 2008 , 46, 5883-5905	7.8	17

83	Modeling and analysis of semiconductor manufacturing in a shrinking world: Challenges and successes 2008 ,		7
82	Integrated Planning of Production and Engineering Process Improvement. <i>IEEE Transactions on Semiconductor Manufacturing</i> , 2008 , 21, 390-398	2.6	16
81	An experimental study of an iterative simulation-optimization algorithm for production planning 2008 ,		9
80	Learning effective dispatching rules for batch processor scheduling. <i>International Journal of Production Research</i> , 2008 , 46, 1431-1454	7.8	56
79	Heuristics for minimizing maximum lateness on a single machine with family-dependent set-up times. <i>Computers and Operations Research</i> , 2008 , 35, 2018-2033	4.6	10
78	Incorporating manufacturing lead times in joint production-marketing models: A review and some future directions. <i>Annals of Operations Research</i> , 2008 , 161, 171-188	3.2	23
77	A single-product network design model with lead time and safety stock considerations. <i>IIE Transactions</i> , 2007 , 39, 411-424		58
76	Outbound supply chain network design with mode selection and lead time considerations. <i>Naval Research Logistics</i> , 2007 , 54, 282-300	1.5	10
75	A genetic algorithm for minimizing maximum lateness on parallel identical batch processing machines with dynamic job arrivals and incompatible job families. <i>Computers and Operations Research</i> , 2007 , 34, 3016-3028	4.6	111
74	Lagrangian heuristics for scheduling new product development projects in the pharmaceutical industry. <i>Journal of Heuristics</i> , 2007 , 13, 403-433	1.9	11
73	Hybrid decomposition heuristics for solving large-scale scheduling problems in semiconductor wafer fabrication. <i>Journal of Scheduling</i> , 2007 , 10, 41-65	1.6	55
72	Determining safety stocks in the presence of workload-dependent lead times 2007 ,		1
71	Supply chain optimisation and protocol environment (SCOPE) for rapid prototyping and analysis of complex supply chains. <i>Production Planning and Control</i> , 2007 , 18, 388-406	4.3	12
70	Using System Dynamics Simulations to Compare Capacity Models for Production Planning 2006 ,		11
69	A problem reduction approach for scheduling semiconductor wafer fabrication facilities. <i>IEEE Transactions on Semiconductor Manufacturing</i> , 2006 , 19, 216-225	2.6	32
68	Tractable nonlinear production planning models for semiconductor wafer fabrication facilities. <i>IEEE Transactions on Semiconductor Manufacturing</i> , 2006 , 19, 95-111	2.6	108
67	Rapid Modeling and Discovery of Priority Dispatching Rules: An Autonomous Learning Approach. <i>Journal of Scheduling</i> , 2006 , 9, 7-34	1.6	137
66	Implementing global factory schedules in the face of stochastic disruptions. <i>International Journal of Production Research</i> , 2005 , 43, 793-818	7.8	33

65	Executing production schedules in the face of uncertainties: A review and some future directions. <i>European Journal of Operational Research</i> , 2005 , 161, 86-110	5.6	436
64	Outbound supply chain network design with mode selection, lead times and capacitated vehicle distribution centers. <i>European Journal of Operational Research</i> , 2005 , 165, 182-206	5.6	127
63	Short-term capacity allocation problem with tool and setup constraints. <i>Naval Research Logistics</i> , 2005 , 52, 754-764	1.5	12
62	Measures of subproblem criticality in decomposition algorithms for shop scheduling. <i>International Journal of Production Research</i> , 2003 , 41, 865-882	7.8	24
61	Observations on the interactions among deadlock avoidance policies and dispatching rules in automated manufacturing systems. <i>International Journal of Production Research</i> , 2003 , 41, 81-95	7.8	7
60	A genetic algorithm to minimize maximum lateness on a batch processing machine. <i>Computers and Operations Research</i> , 2002 , 29, 1621-1640	4.6	112
59	Experimental Evaluation of Heuristic Optimization Algorithms: A Tutorial. <i>Journal of Heuristics</i> , 2001 , 7, 261-304	1.9	199
58	Finite-capacity production planning algorithms for a semiconductor wafer fabrication facility. <i>International Journal of Production Research</i> , 2001 , 39, 825-842	7.8	35
57	Cycle-time improvements for photolithography process in semiconductor manufacturing. <i>IEEE Transactions on Semiconductor Manufacturing</i> , 2001 , 14, 48-56	2.6	83
56	Decomposition methods for reentrant flow shops with sequence-dependent setup times. <i>Journal of Scheduling</i> , 2000 , 3, 155-177	1.6	63
55	Evaluation and comparison of production schedules. <i>Computers in Industry</i> , 2000 , 42, 203-220	11.6	38
54	Integrating Interval Estimates of Global Optima and Local Search Methods for Combinatorial Optimization Problems. <i>Journal of Heuristics</i> , 2000 , 6, 481-500	1.9	11
53	Performance of decomposition procedures for job shop scheduling problems with bottleneck machines. <i>International Journal of Production Research</i> , 2000 , 38, 1271-1286	7.8	45
52	Quantifying the benefits of cycle time reduction in semiconductor wafer fabrication. <i>IEEE Transactions on Electronics Packaging Manufacturing</i> , 2000 , 23, 39-47		27
51	Predictable scheduling of a single machine with breakdowns and sensitive jobs. <i>International Journal of Production Research</i> , 1999 , 37, 4217-4233	7.8	93
50	Optimal disassembly configurations for single and multiple products. <i>Journal of Manufacturing Systems</i> , 1999 , 18, 311-322	9.1	47
49	Media Streams Scheduling for Synchronization in Distributed Multimedia Systems. <i>Journal of Parallel and Distributed Computing</i> , 1999 , 56, 272-295	4.4	4
48	Minimizing total tardiness on a batch processing machine with incompatible job families. <i>IIE Transactions</i> , 1998 , 30, 165-178		2

47	Scheduling a single batch processing machine with secondary resource constraints. <i>Journal of Manufacturing Systems</i> , 1998 , 17, 37-51	9.1	43
46	Benchmarks for shop scheduling problems. <i>European Journal of Operational Research</i> , 1998 , 109, 137-144	5.6	145
45	A capacity allocation problem with integer side constraints. <i>European Journal of Operational Research</i> , 1998 , 109, 170-182	5.6	36
44	Predictable scheduling of a job shop subject to breakdowns. <i>IEEE Transactions on Automation Science and Engineering</i> , 1998 , 14, 365-378		139
43	Maintenance scheduling and staffing policies in a wafer fabrication facility. <i>IEEE Transactions on Semiconductor Manufacturing</i> , 1998 , 11, 316-323	2.6	37
42	Control of a batch-processing machine: A computational approach. <i>International Journal of Production Research</i> , 1998 , 36, 3167-3181	7.8	33
41	Minimizing total tardiness on a batch processing machine with incompatible job families. <i>IIE Transactions</i> , 1998 , 30, 165-178		117
40	Rescheduling on a single machine with part-type dependent setup times and deadlines. <i>Annals of Operations Research</i> , 1997 , 70, 93-113	3.2	70
39	Rolling horizon procedures for the single machine deterministic total completion time scheduling problem with release dates. <i>Annals of Operations Research</i> , 1997 , 70, 115-125	3.2	28
38	A Computational Study of Shifting Bottleneck Procedures for Shop Scheduling Problems. <i>Journal of Heuristics</i> , 1997 , 3, 111-137	1.9	67
37	Performance of decomposition methods for complex workshops under multiple criteria. <i>Computers and Industrial Engineering</i> , 1997 , 33, 261-264	6.4	12
36	A Tabu search approach to scheduling an automated wet etch station. <i>Journal of Manufacturing Systems</i> , 1997 , 16, 102-116	9.1	42
35	Naive Rolling Horizon Procedures for Job Shop Scheduling 1997 , 147-160		
34	Computational Results for Shops with Single and Parallel Machine Workcenters 1997 , 175-189		
33	Workcenter-based Decomposition Procedures for the Classical Job Shop Environment 1997 , 61-90		
32	Review of Decomposition Methods for Factory Scheduling Problems 1997 , 31-45		0
31	Tailored Decomposition Procedures for Semiconductor Testing Facilities 1997 , 161-173		
30	A Generic Decomposition Procedure for Semiconductor Testing Facilities 1997 , 91-106		

29	Time-Based Decomposition Procedures for Single-Machine Subproblems 1997 , 107-128		
28	Decomposition Methods for Complex Factory Scheduling Problems 1997 ,		107
27	Machine Criticality Measures and Subproblem Solution Procedures in Shifting Bottleneck Methods: A Computational Study. <i>Journal of the Operational Research Society</i> , 1996 , 47, 666	2	3
26	Machine Criticality Measures and Subproblem Solution Procedures in Shifting Bottleneck Methods: A Computational Study. <i>Journal of the Operational Research Society</i> , 1996 , 47, 666-667	2	28
25	An iterative heuristic for the single machine dynamic total completion time scheduling problem. <i>Computers and Operations Research</i> , 1996 , 23, 641-651	4.6	11
24	Single-machine scheduling with dynamic arrivals: Decomposition results and an improved algorithm. <i>Naval Research Logistics</i> , 1996 , 43, 709-719	1.5	22
23	Decomposition methods for scheduling semiconductor testing facilities. <i>Flexible Services and Manufacturing Journal</i> , 1996 , 8, 357		31
22	Scheduling and order release in a single-stage production system. <i>Journal of Manufacturing Systems</i> , 1995 , 14, 290-306	9.1	36
21	Scheduling batch processing machines with incompatible job families. <i>International Journal of Production Research</i> , 1995 , 33, 2685-2708	7.8	163
20	Rolling horizon procedures for dynamic parallel machine scheduling with sequence-dependent setup times. <i>International Journal of Production Research</i> , 1995 , 33, 3173-3192	7.8	110
19	Measuring the Quality of Manufacturing Schedules 1995 , 129-154		10
18	Exploiting shop floor status information to schedule complex job shops. <i>Journal of Manufacturing Systems</i> , 1994 , 13, 73-84	9.1	52
17	A robust strategy approach to a strategic mobility problem. <i>European Journal of Operational Research</i> , 1994 , 79, 266-276	5.6	3
16	A REVIEW OF PRODUCTION PLANNING AND SCHEDULING MODELS IN THE SEMICONDUCTOR INDUSTRY PART II: SHOP-FLOOR CONTROL. <i>IIE Transactions</i> , 1994 , 26, 44-55		250
15	Performance evaluation of dispatching rules for semiconductor testing operations. <i>Journal of Electronics Manufacturing</i> , 1993 , 03, 95-105		28
14	Implementation of a decision support system for scheduling semiconductor test operations. <i>Journal of Electronics Manufacturing</i> , 1993 , 03, 121-131		22
13	Minimizing total completion time on a batch processing machine with job families. <i>Operations Research Letters</i> , 1993 , 13, 61-65	1	111
12	Efficient Algorithms for Scheduling Semiconductor Burn-In Operations. <i>Operations Research</i> , 1992 , 40, 764-775	2.3	377

11	A shifting bottleneck algorithm for scheduling semiconductor testing operations. <i>Journal of Electronics Manufacturing</i> , 1992 , 02, 119-134		37
10	Analysis of periodic and event-driven rescheduling policies in dynamic shops. <i>International Journal of Computer Integrated Manufacturing</i> , 1992 , 5, 153-163	4.3	162
9	Computer-Aided Process Planning and Material Requirements Planning: First Steps towards Computer-Integrated Manufacturing. <i>Interfaces</i> , 1992 , 22, 76-86	0.7	9
8	A REVIEW OF PRODUCTION PLANNING AND SCHEDULING MODELS IN THE SEMICONDUCTOR INDUSTRY PART I: SYSTEM CHARACTERISTICS, PERFORMANCE EVALUATION AND PRODUCTION PLANNING. <i>IIE Transactions</i> , 1992 , 24, 47-60		394
7	A new dynamic programming algorithm for the parallel machines total weighted completion time problem. <i>Operations Research Letters</i> , 1992 , 11, 73-75	1	28
6	Scheduling semiconductor test operations: Minimizing maximum lateness and number of tardy jobs on a single machine. <i>Naval Research Logistics</i> , 1992 , 39, 369-388	1.5	60
5	Scheduling Semiconductor Test Operations: Optimization and Approximation 1992 , 179-199		2
4	An experimental expert system for process planning of sheet-metal parts. <i>Computers and Industrial Engineering</i> , 1991 , 20, 59-69	6.4	7
3	. <i>IEEE Transactions on Semiconductor Manufacturing</i> , 1991 , 4, 270-280	2.6	80
2	A genetic algorithm for order acceptance and scheduling in additive manufacturing. <i>International Journal of Production Research</i> , 1-18	7.8	3
