#	ARTICLE	IF	CITATIONS
1	The important role of non-covalent drug-protein interactions in drug hypersensitivity reactions. <i>Allergy: European Journal of Allergy and Clinical Immunology</i> , 2022, 77, 404-415.	2.7	24
2	Risk Assessment in Drug Hypersensitivity: Detecting Small Molecules Which Outsmart the Immune System. <i>Frontiers in Allergy</i> , 2022, 3, 827893.	1.2	6
3	Anaphylaxis to drugs: Overcoming mast cell unresponsiveness by fake antigens. <i>Allergy: European Journal of Allergy and Clinical Immunology</i> , 2021, 76, 1340-1349.	2.7	12
4	The role of drug, dose, and the tolerance/intolerance of new drugs in multiple drug hypersensitivity syndrome. <i>Allergy: European Journal of Allergy and Clinical Immunology</i> , 2020, 75, 1178-1187.	2.7	18
5	IgE-mediated chlorhexidine allergy – Cross-reactivity with other biguanide disinfectants. <i>Allergy: European Journal of Allergy and Clinical Immunology</i> , 2020, 75, 3237-3247.	2.7	13
6	Drug-related relapses in drug reaction with eosinophilia and systemic symptoms (DRESS). <i>Clinical and Translational Allergy</i> , 2020, 10, 52.	1.4	15
7	Shared Genetic Risk Factors Across Carbamazepine-Induced Hypersensitivity Reactions. <i>Clinical Pharmacology and Therapeutics</i> , 2019, 106, 1028-1036.	2.3	52
8	Immune pathomechanism and classification of drug hypersensitivity. <i>Allergy: European Journal of Allergy and Clinical Immunology</i> , 2019, 74, 1457-1471.	2.7	131
9	Controversies in drug allergy: In vitro testing. <i>Journal of Allergy and Clinical Immunology</i> , 2019, 143, 56-65.	1.5	94
10	Drug hypersensitivity: We need to do more. <i>Journal of Allergy and Clinical Immunology</i> , 2018, 141, 89-91.	1.5	11
11	Multiple Drug Hypersensitivity. <i>International Archives of Allergy and Immunology</i> , 2017, 172, 129-138.	0.9	67
12	T-cell-mediated drug hypersensitivity: immune mechanisms and their clinical relevance. <i>Asia Pacific Allergy</i> , 2016, 6, 77-89.	0.6	38
13	Classification of Drug Hypersensitivity into Allergic, p-i, and Pseudo-Allergic Forms. <i>International Archives of Allergy and Immunology</i> , 2016, 171, 166-179.	0.9	119
14	Flare-up reactions in severe drug hypersensitivity: infection or ongoing T-cell hyperresponsiveness. <i>Clinical Case Reports (discontinued)</i> , 2015, 3, 798-801.	0.2	11
15	Drug Hypersensitivity: How Drugs Stimulate T Cells via Pharmacological Interaction with Immune Receptors. <i>International Archives of Allergy and Immunology</i> , 2015, 168, 13-24.	0.9	71
16	Report from the National Institute of Allergy and Infectious Diseases workshop on drug allergy. <i>Journal of Allergy and Clinical Immunology</i> , 2015, 136, 262-271.e2.	1.5	51
17	Interaction of Small Molecules with Specific Immune Receptors: The p-i Concept and its Consequences. <i>Current Immunology Reviews</i> , 2014, 10, 7-18.	1.2	11
18	Oxypurinol Directly and Immediately Activates the Drug-Specific T Cells via the Preferential Use of HLA-B*58:01. <i>Journal of Immunology</i> , 2014, 192, 2984-2993.	0.4	136

#	ARTICLE	IF	CITATIONS
19	Enhancement of Drug-Specific Lymphocyte Proliferation Using CD25 <sup>hi</sup> -Depleted CD3 <sup>+</sup> Effector Cells. International Archives of Allergy and Immunology, 2014, 163, 198-205.	0.9	27
20	NSAID intolerance: it is not always what it seems. Clinical and Translational Allergy, 2014, 4, P7.	1.4	1
21	The involvement of specific t cells in the pathogenesis of metamizole-induced agranulocytosis. Clinical and Translational Allergy, 2014, 4, P107.	1.4	3
22	T Cells Infiltrate the Liver and Kill Hepatocytes in HLA-B*57:01-Associated Floxacillin-Induced Liver Injury. American Journal of Pathology, 2014, 184, 1677-1682.	1.9	62
23	Drug Allergy. , 2014, , 1274-1295.		10
24	Abacavir Induced T Cell Reactivity from Drug Naïve Individuals Shares Features of Allo-Immune Responses. PLoS ONE, 2014, 9, e95339.	1.1	58
25	IgE-Mediated Allergies. , 2014, , 1-5.		0
26	Lymphocyte Transformation Test. , 2014, , 1-5.		2
27	Consequences of drug binding to immune receptors: Immune stimulation following pharmacological interaction with immune receptors (T-cell receptor for antigen or human leukocyte antigen) with altered peptide-human leukocyte antigen or peptide. Dermatologica Sinica, 2013, 31, 181-190.	0.2	13
28	HLA-B*57:01+ abacavir-naive individuals have specific T cells but no patch test reactivity. Journal of Allergy and Clinical Immunology, 2013, 132, 756-758.	1.5	22
29	Allergy to sulfonamides. Journal of Allergy and Clinical Immunology, 2013, 131, 256-257.e5.	1.5	45
30	Hypersensitivity reactions to non beta-lactam antimicrobial agents, a statement of the WAO special committee on drug allergy. World Allergy Organization Journal, 2013, 6, 18.	1.6	55
31	HLA Haplotype Determines Hapten or p-i T Cell Reactivity to Flucloxacillin. Journal of Immunology, 2013, 190, 4956-4964.	0.4	98
32	In Memoriam - A Tribute to Alain L. de Weck. International Archives of Allergy and Immunology, 2013, 162, 97-98.	0.9	0
33	Sulfamethoxazole Induces a Switch Mechanism in T Cell Receptors Containing TCRV $\alpha$ 20-1, Altering pHLA Recognition. PLoS ONE, 2013, 8, e76211.	1.1	55
34	Activating interactions of sulfanilamides with T cell receptors. Open Journal of Immunology, 2013, 03, 139-157.	0.5	19
35	Drug hypersensitivity. , 2013, , 564-577.		0
36	Maintenance of Skills, Competencies, and Performance in Allergy and Clinical Immunology: Time to Lay the Foundation for a Universal Approach. World Allergy Organization Journal, 2012, 5, 45-51.	1.6	3

#	ARTICLE	IF	CITATIONS
37	Nonimmediate drug allergy: Diagnostic benefit of skin testing and practical approach. <i>Journal of Allergy and Clinical Immunology</i> , 2012, 129, 1170-1171.	1.5	13
38	Avidity determines T cell reactivity in abacavir hypersensitivity. <i>European Journal of Immunology</i> , 2012, 42, 1706-1716.	1.6	85
39	A World Allergy Organization International Survey on Diagnostic Procedures and Therapies in Drug Allergy/Hypersensitivity. <i>World Allergy Organization Journal</i> , 2011, 4, 257-270.	1.6	46
40	Preface. <i>Journal of Allergy and Clinical Immunology</i> , 2011, 127, S59.	1.5	7
41	Enhanced antigenicity leads to altered immunogenicity in sulfamethoxazole-hypersensitive patients with cystic fibrosis. <i>Journal of Allergy and Clinical Immunology</i> , 2011, 127, 1543-1551.e3.	1.5	43
42	Individual IL-3 priming is crucial for consistent in vitro activation of donor basophils in patients with chronic urticaria. <i>Journal of Allergy and Clinical Immunology</i> , 2011, 128, 1227-1234.e5.	1.5	44
43	HLA-A*3101 and Carbamazepine-Induced Hypersensitivity Reactions in Europeans. <i>New England Journal of Medicine</i> , 2011, 364, 1134-1143.	13.9	815
44	Educational case series: Mechanisms of drug allergy. <i>Pediatric Allergy and Immunology</i> , 2011, 22, 559-567.	1.1	21
45	Delayed drug hypersensitivity: models of T cell stimulation. <i>British Journal of Clinical Pharmacology</i> , 2011, 71, 701-707.	1.1	127
46	Ceftobiprole associated agranulocytosis after drug rash with eosinophilia and systemic symptoms induced by vancomycin and rifampicin. <i>British Journal of Clinical Pharmacology</i> , 2011, 71, 297-300.	1.1	14
47	Drug hypersensitivity: Flare-up reactions, cross-reactivity and multiple drug hypersensitivity. <i>Journal of Dermatology</i> , 2011, 38, 216-221.	0.6	61
48	T-cell recognition of chemicals, protein allergens and drugs: towards the development of in vitro assays. <i>Cellular and Molecular Life Sciences</i> , 2010, 67, 4171-4184.	2.4	131
49	Cross-Reactivity in Drug Hypersensitivity Reactions to Sulfasalazine and Sulfamethoxazole. <i>International Archives of Allergy and Immunology</i> , 2010, 153, 152-156.	0.9	52
50	Drug Antigenicity, Immunogenicity, and Costimulatory Signaling: Evidence for Formation of a Functional Antigen through Immune Cell Metabolism. <i>Journal of Immunology</i> , 2010, 185, 6448-6460.	0.4	53
51	The Complex Clinical Picture of Side Effects to Biologicals. <i>Medical Clinics of North America</i> , 2010, 94, 791-804.	1.1	40
52	Preface. <i>Medical Clinics of North America</i> , 2010, 94, xv-xvi.	1.1	2
53	Drug Hypersensitivity Reactions: Pathomechanism and Clinical Symptoms. <i>Medical Clinics of North America</i> , 2010, 94, 645-664.	1.1	100
54	Stimulation of human T cells with sulfonamides and sulfonamide metabolites. <i>Journal of Allergy and Clinical Immunology</i> , 2010, 125, 411-418.e4.	1.5	109

#	ARTICLE	IF	CITATIONS
55	Drug Hypersensitivity Reactions Involving Skin. Handbook of Experimental Pharmacology, 2010, , 29-55.	0.9	37
56	IgE-Mediated Anaphylaxis to Intraarticular Glucocorticoid Preparations. American Journal of Roentgenology, 2009, 193, W156-W157.	1.0	10
57	Correlation of Intravascular Ultrasound Findings With Histopathological Analysis of Thrombus Aspirates in Patients With Very Late Drug-Eluting Stent Thrombosis. Circulation, 2009, 120, 391-399.	1.6	441
58	Preface. Immunology and Allergy Clinics of North America, 2009, 29, xv-xvi.	0.7	0
59	Mechanisms of Drug-Induced Allergy. Mayo Clinic Proceedings, 2009, 84, 268-272.	1.4	105
60	In Vitro Tests in Drug Hypersensitivity Diagnosis. Immunology and Allergy Clinics of North America, 2009, 29, 537-554.	0.7	41
61	Anaphylactoid Reactions to Radiopaque Contrast Dyeâ€“Replyâ€“l. Mayo Clinic Proceedings, 2009, 84, 663.	1.4	0
62	Anaphylactoid Reactions to Radiopaque Contrast Dyeâ€“Replyâ€“l. Mayo Clinic Proceedings, 2009, 84, 663.	1.4	0
63	Drug Allergy. , 2009, , 1205-1226.		10
64	Clinical Manifestations of Allergic Diseases: Drug Hypersensitivity. , 2009, , 403-422.		1
65	Immunological Principles of Drug Hypersensitivity. , 2009, , 393-410.		0
66	Increased Cytotoxic T-Lymphocyte Epitope Variant Cross-Recognition and Functional Avidity Are Associated with Hepatitis C Virus Clearance. Journal of Virology, 2008, 82, 3147-3153.	1.5	55
67	Design, Expression, and Processing of Epitomized Hepatitis C Virus-Encoded CTL Epitopes. Journal of Immunology, 2008, 181, 6361-6370.	0.4	17
68	The p-i Concept: Pharmacological Interaction of Drugs With Immune Receptors. World Allergy Organization Journal, 2008, 1, 96-102.	1.6	59
69	Drug hypersensitivity. , 2008, , 709-724.		0
70	The p-i Concept: Evidence and Implications. , 2007, , 66-73.		5
71	Adverse Side Effects to Biological Agents. , 2007, , 151-165.		6
72	Drug Hypersensitivity Reactions: Classification and Relationship to T-Cell Activation. , 2007, , 168-189.		55

#	ARTICLE	IF	CITATIONS
73	Drug-Induced Interstitial Nephritis. , 2007, , 295-305.		4
74	In vitro Tests of T-Cell-Mediated Drug Hypersensitivity. , 2007, , 380-390.		12
75	Cross-reactivity patterns of T cells specific for iodinated contrast media. Journal of Allergy and Clinical Immunology, 2007, 119, 1529-1536.	1.5	72
76	Predicting drug hypersensitivity by in vitro tests. ALTEX: Alternatives To Animal Experimentation, 2007, 24 Spec No, 49-52.	0.9	1
77	Long-lasting reactivity and high frequency of drug-specific T cells after severe systemic drug hypersensitivity reactions. Journal of Allergy and Clinical Immunology, 2006, 117, 455-462.	1.5	127
78	Activation of T cells by carbamazepine and carbamazepine metabolites. Journal of Allergy and Clinical Immunology, 2006, 118, 233-241.	1.5	121
79	Levocetirizine is an effective treatment in patients suffering from chronic idiopathic urticaria: a randomized, double-blind, placebo-controlled, parallel, multicenter study. International Journal of Dermatology, 2006, 45, 469-474.	0.5	65
80	Noncovalent interactions of drugs with immune receptors may mediate drug-induced hypersensitivity reactions. AAPS Journal, 2006, 8, E160-E165.	2.2	37
81	Pharmacological Interaction of Drugs with Immune Receptors: The p-i Concept. Allergy International, 2006, 55, 17-25.	1.4	189
82	Involvement of Drug-Specific T Cells in Acute Drug-Induced Interstitial Nephritis. Journal of the American Society of Nephrology: JASN, 2006, 17, 2919-2927.	3.0	129
83	In vitro tests of T cell-mediated drug hypersensitivity. Expert Review of Clinical Immunology, 2006, 2, 887-900.	1.3	11
84	Direct T-cell stimulations by drugs "bypassing the innate immune system. Toxicology, 2005, 209, 95-100.	2.0	60
85	T Cell-Regulated Neutrophilic Inflammation in Autoinflammatory Diseases. Journal of Immunology, 2005, 175, 7678-7686.	0.4	118
86	Lymphocyte Transformation Test. , 2005, , 405-408.		1
87	T cell-mediated reactions to iodinated contrast media: Evaluation by skin and lymphocyte activation tests. Journal of Allergy and Clinical Immunology, 2005, 115, 179-185.	1.5	132
88	The Drug Ambassador Project. Allergy and Clinical Immunology International, 2005, 17, 9-18.	0.3	11
89	Cytotoxic T Lymphocytes Derived from Patients with Chronic Hepatitis C Virus Infection Kill Bystander Cells via Fas-FasL Interaction. Journal of Virology, 2004, 78, 2152-2157.	1.5	50
90	Characterization of Human T Cells That Regulate Neutrophilic Skin Inflammation. Journal of Immunology, 2004, 173, 2151-2158.	0.4	154

#	ARTICLE	IF	CITATIONS
91	A chemically inert drug can stimulate T cells in vitro by their T cell receptor in non-sensitised individuals. <i>Toxicology</i> , 2004, 197, 47-56.	2.0	53
92	Cellular mechanisms of T cell mediated drug hypersensitivity. <i>Current Opinion in Immunology</i> , 2004, 16, 732-737.	2.4	59
93	Detection of specific IgE to quinolones. <i>Journal of Allergy and Clinical Immunology</i> , 2004, 113, 155-160.	1.5	135
94	Immune mechanism of drug hypersensitivity. <i>Immunology and Allergy Clinics of North America</i> , 2004, 24, 373-397.	0.7	74
95	A liposomal peptide vaccine inducing CD8+ T cells in HLA-A2.1 transgenic mice, which recognise human cells encoding hepatitis C virus (HCV) proteins. <i>Vaccine</i> , 2004, 23, 58-68.	1.7	45
96	The immunological and clinical spectrum of delayed drug-induced exanthems. <i>Current Opinion in Allergy and Clinical Immunology</i> , 2004, 4, 411-419.	1.1	75
97	Lessons from drug allergy: Against dogmata. <i>Current Allergy and Asthma Reports</i> , 2003, 3, 1-3.	2.4	16
98	Delayed Drug Hypersensitivity Reactions. <i>Annals of Internal Medicine</i> , 2003, 139, 683.	2.0	616
99	Characterization of drug-specific T cells in lamotrigine hypersensitivity. <i>Journal of Allergy and Clinical Immunology</i> , 2003, 111, 1393-1403.	1.5	198
100	Quinolone hypersensitivity. <i>Current Opinion in Allergy and Clinical Immunology</i> , 2003, 3, 275-281.	1.1	48
101	Cross-reactivity with drugs at the T cell level. <i>Current Opinion in Allergy and Clinical Immunology</i> , 2003, 3, 261-267.	1.1	31
102	Drug-induced autoimmunity. <i>Current Opinion in Allergy and Clinical Immunology</i> , 2003, 3, 249-253.	1.1	34
103	Molecular Aspects of Drug Recognition by Specific T Cells. <i>Current Drug Targets</i> , 2003, 4, 1-11.	1.0	69
104	In vitro studies of core peptide-bearing immunopotentiating reconstituted influenza virosomes as a non-live prototype vaccine against hepatitis C virus. <i>International Immunology</i> , 2002, 14, 615-626.	1.8	34
105	Covalent Binding of the Nitroso Metabolite of Sulfamethoxazole Leads to Toxicity and Major Histocompatibility Complex-Restricted Antigen Presentation. <i>Molecular Pharmacology</i> , 2002, 62, 628-637.	1.0	129
106	Pharmacological interaction of drugs with antigen-specific immune receptors: the p-i concept. <i>Current Opinion in Allergy and Clinical Immunology</i> , 2002, 2, 301-305.	1.1	252
107	Acute generalized exanthematous pustulosis, a clue to neutrophil-mediated inflammatory processes orchestrated by T cells. <i>Current Opinion in Allergy and Clinical Immunology</i> , 2002, 2, 325-331.	1.1	126
108	Cellular and Molecular Pathophysiology of Cutaneous Drug Reactions. <i>American Journal of Clinical Dermatology</i> , 2002, 3, 229-238.	3.3	117

#	ARTICLE	IF	CITATIONS
109	Acute Generalized Exanthematous Pustulosis. American Journal of Pathology, 2002, 161, 2079-2086.	1.9	145
110	T cells in drug allergy. Current Allergy and Asthma Reports, 2002, 2, 9-15.	2.4	22
111	Deciphering the immune pathomechanism of cutaneous drug reactions. Allergy: European Journal of Allergy and Clinical Immunology, 2002, 57, 34-36.	2.7	17
112	Modes of presentation of chemical neoantigens to the immune system. Toxicology, 2002, 181-182, 49-54.	2.0	27
113	Macular exanthema appearing 5 days after X-ray contrast medium administration. European Radiology, 2002, 12, S94-S97.	2.3	20
114	Cytotoxic HIV-1 p55gag-specific CD4+ T cells produce HIV-inhibitory cytokines and chemokines. Journal of Clinical Immunology, 2002, 22, 253-262.	2.0	13
115	Peptide vaccines against hepatitis B virus: from animal model to human studies. Molecular Immunology, 2001, 38, 457-465.	1.0	43
116	Perspectives: towards a peptide-based vaccine against hepatitis C virus. Molecular Immunology, 2001, 38, 475-484.	1.0	45
117	Immunohistology of drug-induced exanthema: clues to pathogenesis. Current Opinion in Allergy and Clinical Immunology, 2001, 1, 299-303.	1.1	28
118	Predictive drug allergy testing: an alternative viewpoint. Toxicology, 2001, 158, 31-41.	2.0	35
119	Influence of reduced glutathione on the proliferative response of sulfamethoxazole-specific and sulfamethoxazole-metabolite-specific human CD4+ T-cells. British Journal of Pharmacology, 2001, 132, 623-630.	2.7	88
120	Antigenicity and immunogenicity of sulphamethoxazole: demonstration of metabolism-dependent haptentation and T-cell proliferation in vivo. British Journal of Pharmacology, 2001, 133, 295-305.	2.7	115
121	Degeneracy and additional alloreactivity of drug-specific human $\hat{I}^2$ T cell clones. International Immunology, 2001, 13, 877-885.	1.8	59
122	Immunohistology of drug-induced exanthema: clues to pathogenesis. Current Opinion in Allergy and Clinical Immunology, 2001, 1, 299-303.	1.1	13
123	T-cell involvement in drug-induced acute generalized exanthematous pustulosis. Journal of Clinical Investigation, 2001, 107, 1433-1441.	3.9	314
124	Virological and immunological characteristics of HIV treatment failure. Aids, 2000, 14, 1767-1774.	1.0	26
125	Human afferent lymph from normal skin contains an increased number of mainly memory / effector CD4+ T cells expressing activation, adhesion and co-stimulatory molecules. European Journal of Immunology, 2000, 30, 491-497.	1.6	65
126	T Cells Isolated from Positive Epicutaneous Test Reactions to Amoxicillin and Ceftriaxone are Drug Specific and Cytotoxic. Journal of Investigative Dermatology, 2000, 115, 647-652.	0.3	84

#	ARTICLE	IF	CITATIONS
127	Strong $\hat{I}^2$ and $\hat{I}^3$ TCR response in a patient with disseminated Mycobacterium avium infection and lack of NK cells and monocytopenia. Immunology Letters, 2000, 72, 75-82.	1.1	30
128	Recognition of Sulfamethoxazole and Its Reactive Metabolites by Drug-Specific CD4+ T Cells from Allergic Individuals. Journal of Immunology, 2000, 164, 6647-6654.	0.4	206
129	Down-regulation of IL-12 by topical corticosteroids in chronic atopic dermatitis. Journal of Allergy and Clinical Immunology, 2000, 106, 941-947.	1.5	27
130	Anaphylactic shock after subcutaneous injection of mandragora D3, a homeopathic drug. Journal of Allergy and Clinical Immunology, 2000, 106, 989-990.	1.5	10
131	Evidence for a role for IL-5 and eotaxin in activating and recruiting eosinophils in drug-induced cutaneous eruptions. Journal of Allergy and Clinical Immunology, 2000, 106, 1171-1176.	1.5	118
132	Distinct Serum Cytokine Levels in Drug- and Measles-Induced Exanthema. International Archives of Allergy and Immunology, 1999, 120, 225-229.	0.9	52
133	Molecular Basis of Drug Recognition by Specific T-Cell Receptors. International Archives of Allergy and Immunology, 1999, 119, 173-180.	0.9	29
134	CD80 and CD86 costimulatory molecules on circulating T cells of HIV infected individuals. Immunology Letters, 1999, 65, 197-201.	1.1	27
135	Recognition of Local Anesthetics by $\hat{I}^2$ + T Cells. Journal of Investigative Dermatology, 1999, 112, 197-204.	0.3	29
136	Chronic Idiopathic Urticaria: Natural Course and Association with Helicobacter pylori Infection. International Archives of Allergy and Immunology, 1999, 119, 60-63.	0.9	112
137	Reduced in vivo allergenicity of Bet v 1d isoform, a natural component of birch pollen... Journal of Allergy and Clinical Immunology, 1999, 104, 1239-1243.	1.5	53
138	Coprinus comatus (shaggy cap) is a potential source of aeroallergen that may provoke atopic dermatitis. Journal of Allergy and Clinical Immunology, 1999, 104, 836-841.	1.5	24
139	IgE-binding proliferative responses and skin test reactivity to Cop c 1, the first recombinant allergen from the basidiomycete Coprinus comatus. Journal of Allergy and Clinical Immunology, 1999, 104, 630-636.	1.5	30
140	HAART in HIV-infected patients: restoration of antigen-specific CD4 T-cell responses in vitro is correlated with CD4 memory T-cell reconstitution, whereas improvement in delayed type hypersensitivity is related to a decrease in viraemia. Aids, 1999, 13, 1857-1862.	1.0	101
141	Allergy to antibacterials: the problem with beta-lactams and sulfonamides. , 1998, 7, S23-S36.		0
142	Involvement of T cells in drug-induced allergies. Trends in Pharmacological Sciences, 1998, 19, 308-310.	4.0	29
143	Association of syncytium-inducing phenotype of HIV-1 with CD4 cell count, viral load and sociodemographic characteristics. Aids, 1998, 12, 1341-1346.	1.0	19
144	High IL-5 Production by Human Drug-Specific T Cell Clones. International Archives of Allergy and Immunology, 1997, 113, 177-180.	0.9	63
