| #  | ARTICLE                                                                                                                                                                                                                    | IF  | CITATIONS |
|----|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 1  | Catheter-directed Thrombolysis and Stenting in the Treatment of Iliac Vein Compression Syndrome with Acute Iliofemoral Deep Vein Thrombosis: Outcome and Follow-up. <i>Annals of Vascular Surgery</i> , 2014, 28, 957-963. | 0.4 | 54        |
| 2  | Hypermethylation of EDNRB promoter contributes to the risk of colorectal cancer. <i>Diagnostic Pathology</i> , 2013, 8, 199.                                                                                               | 0.9 | 53        |
| 3  | Exosomes Derived from Human Induced Pluripotent Stem Cells-Endothelial Cells Promotes Postnatal Angiogenesis in Mice Bearing Ischemic Limbs. <i>International Journal of Biological Sciences</i> , 2019, 15, 158-168.      | 2.6 | 47        |
| 4  | Retrograde popliteal approach for challenging occlusions of the femoral-popliteal arteries. <i>Journal of Vascular Surgery</i> , 2013, 58, 84-89.                                                                          | 0.6 | 41        |
| 5  | Role of CDH13 promoter methylation in the carcinogenesis, progression, and prognosis of colorectal cancer. <i>Medicine (United States)</i> , 2017, 96, e5956.                                                              | 0.4 | 36        |
| 6  | Elevated CpG island methylation of GCK gene predicts the risk of type 2 diabetes in Chinese males. <i>Gene</i> , 2014, 547, 329-333.                                                                                       | 1.0 | 34        |
| 7  | Four Genetic Polymorphisms of Lymphotoxin-Alpha Gene and Cancer Risk: A Systematic Review and Meta-Analysis. <i>PLoS ONE</i> , 2013, 8, e82519.                                                                            | 1.1 | 24        |
| 8  | Meta-Analysis of Low Density Lipoprotein Receptor ( <i>LDLR</i> ) rs2228671 Polymorphism and Coronary Heart Disease. <i>BioMed Research International</i> , 2014, 2014, 1-6.                                               | 0.9 | 22        |
| 9  | BCL11A gene DNA methylation contributes to the risk of type 2 diabetes in males. <i>Experimental and Therapeutic Medicine</i> , 2014, 8, 459-463.                                                                          | 0.8 | 19        |
| 10 | Enteral nutrition improves clinical outcome and reduces costs of acute mesenteric ischaemia after recanalisation in the intensive care unit. <i>Clinical Nutrition</i> , 2019, 38, 398-406.                                | 2.3 | 18        |
| 11 | Neutrophil-Lymphocyte Ratio and Platelet-Lymphocyte Ratio Predict Severity and Prognosis of Lower Limb Arteriosclerosis Obliterans. <i>Annals of Vascular Surgery</i> , 2020, 64, 221-227.                                 | 0.4 | 17        |
| 12 | The association between methylated <i>CDKN2A</i> and cervical carcinogenesis, and its diagnostic value in cervical cancer: a meta-analysis. <i>Therapeutics and Clinical Risk Management</i> , 2016, Volume 12, 1249-1260. | 0.9 | 15        |
| 13 | Downregulation of Pin1 in human atherosclerosis and its association with vascular smooth muscle cell senescence. <i>Journal of Vascular Surgery</i> , 2018, 68, 873-883.e5.                                                | 0.6 | 15        |
| 14 | Meta-analyses between 18 candidate genetic markers and overweight/obesity. <i>Diagnostic Pathology</i> , 2014, 9, 56.                                                                                                      | 0.9 | 13        |
| 15 | Thrombospondin-4 ablation reduces macrophage recruitment in adipose tissue and neointima and suppresses injury-induced restenosis in mice. <i>Atherosclerosis</i> , 2016, 247, 70-77.                                      | 0.4 | 12        |
| 16 | MiR-3202 Promoted H5V Cell Apoptosis by Directly Targeting Fas Apoptotic Inhibitory Molecule 2 (FAIM2) in High Glucose Condition. <i>Medical Science Monitor</i> , 2017, 23, 975-983.                                      | 0.5 | 11        |
| 17 | Identifying and Validating a Combined mRNA and MicroRNA Signature in Response to Imatinib Treatment in a Chronic Myeloid Leukemia Cell Line. <i>PLoS ONE</i> , 2014, 9, e115003.                                           | 1.1 | 10        |
| 18 | RNA Splicing of the <i>Abi1</i> Gene by MBNL1 contributes to macrophage-like phenotype modulation of vascular smooth muscle cell during atherogenesis. <i>Cell Proliferation</i> , 2021, 54, e13023.                       | 2.4 | 9         |

| #  | ARTICLE                                                                                                                                                                                                                                                                                | IF  | CITATIONS |
|----|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 19 | STAT4 deficiency protects against neointima formation following arterial injury in mice. <i>Journal of Molecular and Cellular Cardiology</i> , 2014, 74, 284-294.                                                                                                                      | 0.9 | 8         |
| 20 | Viabahn Stent Graft for the Endovascular Treatment of Occlusive Lesions in the Femoropopliteal Artery: A Retrospective Cohort Study with 4-Year Follow-Up. <i>Annals of Vascular Surgery</i> , 2020, 66, 573-579.                                                                      | 0.4 | 8         |
| 21 | Multiple scalp metastases from colonic neuroendocrine carcinoma: case report and literature review. <i>BMC Cancer</i> , 2014, 14, 305.                                                                                                                                                 | 1.1 | 5         |
| 22 | Role of MicroRNAs in the Development of Hepatocellular Carcinoma in Nonalcoholic Fatty Liver Disease. <i>Anatomical Record</i> , 2019, 302, 193-200.                                                                                                                                   | 0.8 | 5         |
| 23 | Mutual regulation between $\hat{1}^2$ -TRCP mediated REST protein degradation and Kv1.3 expression controls vascular smooth muscle cell phenotype switch. <i>Atherosclerosis</i> , 2020, 313, 102-110.                                                                                 | 0.4 | 4         |
| 24 | One-Year Clinical Outcome and Risk Factor Analysis of Directional Atherectomy Followed With Drug-Coated Balloon for Femoropopliteal Artery Disease. <i>Journal of Endovascular Therapy</i> , 2021, 28, 152660282110305.                                                                | 0.8 | 4         |
| 25 | Clinical efficacy of one-stage thrombus removal via contralateral femoral and ipsilateral tibial venous access for pharmacomechanical thrombectomy in entire-limb acute deep vein thrombosis. <i>Journal of Vascular Surgery: Venous and Lymphatic Disorders</i> , 2021, 9, 1128-1135. | 0.9 | 4         |
| 26 | Loss of GRB2 associated binding protein 1 in arteriosclerosis obliterans promotes host autophagy. <i>Chinese Medical Journal</i> , 2021, 134, 73-80.                                                                                                                                   | 0.9 | 4         |
| 27 | Warfarin-induced life-threatening bleeding associated with a CYP3A4 loss-of-function mutation in an acute limb ischemia patient: Case report and review of the literature. <i>Experimental and Therapeutic Medicine</i> , 2017, 14, 1157-1162.                                         | 0.8 | 2         |
| 28 | SREBP1 suppresses the differentiation and epithelial function of hiPSC-derived endothelial cells by inhibiting the microRNA199b-5p pathway. <i>Stem Cell Research</i> , 2021, 51, 102174.                                                                                              | 0.3 | 2         |
| 29 | Ultrasound effect on vascular smooth muscle cells in vitro: A preliminary parametric study. , 2016, , .                                                                                                                                                                                |     | 1         |
| 30 | Endovascular recanalization of superior vena cava, brachiocephalic, and subclavian venous occlusions caused by nonmalignant lesions. <i>Chinese Medical Journal</i> , 2012, 125, 1767-71.                                                                                              | 0.9 | 0         |
| 31 | Adjunctive Distal Overlapping Drug-Eluting Stent Placement Improves the Patency of Stent Grafts for Femoropopliteal Occlusive Disease. <i>Journal of Vascular and Interventional Radiology</i> , 2022, , .                                                                             | 0.2 | 0         |
