#	ARTICLE	IF	CITATIONS
1	Creation of a collection of different biological sample types from elderly patients to study the relationship of clinical, systemic, tissue and cellular biomarkers of accumulation of senescent cells during aging. Cardiovascular Therapy and Prevention (Russian Federation), 2022, 20, 3051.	0.4	2
2	Biological vascular age and its relationship with cardiovascular risk factors. Cardiovascular Therapy and Prevention (Russian Federation), 2022, 21, 2877.	0.4	0
3	Comprehensive physical rehabilitation of patients with heart failure: impact on clinical and functional status and analysis of problems related to the enrollment. Russian Journal of Cardiology, 2022, 27, 4814.	0.4	0
4	Possibility of blood test parameters usage in the evaluation of COVID-19 patients' inflammatory status. Journal of Clinical Practice, 2022, 13, 14-21.	0.2	1
5	Review of polymorphisms, associated with cardiovascular diseases. Russian Journal of Geriatric Medicine, 2021, , 333-338.	0.3	2
6	Possible role of anti-IL17 drugs in the management of COVID-19: our own experience and literature review. Immunologiya, 2021, 42, 243-253.	0.1	1
7	Proactive anti-inflammatory therapy with colchicine in the treatment of advanced stages of new coronavirus infection. The first results of the COLORIT study. Kardiologiya, 2021, 61, 15-27.	0.3	41
8	Additional Features in the Treatment of Patients with Chronic Heart Failure. From EMPA-REG OUTCOME Study to EMPEROR-REDUCED Study. Resolution of the On-line Scientific Meeting of Moscow Experts. Rational Pharmacotherapy in Cardiology, 2021, 17, 165-168.	0.3	0
9	Conceptual approaches to finding effective treatment for a new coronavirus infection at different stages. Vestnik Rossiiskoi Akademii Meditsinskikh Nauk, 2021, 76, 43-50.	0.2	2
10	Antithrombotic therapy in the elderly and senile age: the consensus opinion of experts of the Russian Association of Gerontologists and Geriatricians and the National Society of Preventive Cardiology. Cardiovascular Therapy and Prevention (Russian Federation), 2021, 20, 2847.	0.4	3
11	Health benefits of aerobic exercise: known mechanisms and research potential. Cardiovascular Therapy and Prevention (Russian Federation), 2021, 20, 2878.	0.4	2
12	The prevalence of hyperestrogenism and testosterone deficiency in obese men. Āndokrinologiya i Novosti, Mneniya, Obuzhenie, 2021, 10, 41-47.	0.0	2
13	Changes in anthropometric characteristics, androgen and estrogen levels during correction of male hypogonadism with testosterone or hCG: results of a retrospective comparative study. Obesity and Metabolism, 2021, 18, 268-275.	0.4	0
14	Variable association of 24-h peripheral and central hemodynamics and stiffness with hypertension-mediated organ damage: the VASOTENS Registry. Journal of Hypertension, 2020, 38, 701-715.	0.3	16
15	Results of Open-Label non-Randomized Comparative Clinical Trial: ĀcBromhexine and Spironolactone for Coronavirus Infection requiring hospitalization (BISCUIT). Kardiologiya, 2020, 60, 4-15.	0.3	20
16	Integrative respiratory and skeletal musculature training in patients with functional class II-IV chronic heart failure and low or intermediate left ventricular ejection fraction: Design and rationale. Siberian Medical Journal, 2020, 35, 123-130.	0.3	1
17	Ambulatory blood pressure and arterial stiffness web-based telemonitoring in patients at cardiovascular risk. First results of the VASOTENS (Vascular health ASsessment Of The hypertENSive) Trial. Over	0.3	14
18	A modern view on the mechanisms of diabetic cardiomyopathy development and the its modification options. Russian Journal of Cardiology, 2019, , 142-147.	0.4	3

#	ARTICLE	IF	CITATIONS
19	Ambulatory pulse wave monitoring: current and future. Opinion paper of Russian Experts. Cardiovascular Therapy and Prevention (Russian Federation), 2018, 17, 95-109.	0.4	3
20	P42 24-HOUR CENTRAL BLOOD PRESSURE IS MORE STRONGLY ASSOCIATED TO TARGET ORGAN DAMAGE THAN BRACHIAL BLOOD PRESSURE: FIRST RESULTS OF THE VASOTENS REGISTRY. Artery Research, 2017, 20, 67.	0.3	0
21	Angina and Future Cardiovascular Events in Stable Patients With Coronary Artery Disease: Insights From the Reduction of Atherothrombosis for Continued Health (REACH) Registry. Journal of the American Heart Association, 2016, 5, .	1.6	53
22	Vascular Health Assessment of The Hypertensive Patients (VASOTENS) Registry: Study Protocol of an International, Web-Based Telemonitoring Registry for Ambulatory Blood Pressure and Arterial Stiffness. JMIR Research Protocols, 2016, 5, e137.	0.5	16
23	P4.5 VASCULAR HEALTH ASSESSMENT OF THE HYPERTENSIVE PATIENTS (VASOTENS) REGISTRY: RATIONALE, DESIGN AND METHODS OF AN INTERNATIONAL REGISTRY FOR AMBULATORY BLOOD PRESSURE AND ARTERIAL STIFFNESS TELEMONITORING. Artery Research, 2015, 12, 16.	0.3	0
24	Establishing reference values for central blood pressure and its amplification in a general healthy population and according to cardiovascular risk factors. European Heart Journal, 2014, 35, 3122-3133.	1.0	249
25	Prognostic value of changes in arterial stiffness in men with coronary artery disease. Vascular Health and Risk Management, 2010, 6, 1015.	1.0	36
26	Left ventricular remodelling: common process in patients with different primary myocardial disorders. International Journal of Cardiology, 1999, 68, 281-287.	0.8	50
27	Association of AGT, ACE, NOS3 polymorphism with subclinical arterial wall changes and cardiovascular diseases risk factors.. Journal of Clinical Practice, 0, , .	0.2	1
