#	ARTICLE	IF	CITATIONS
1	Cluster expansion of the wavefunction. Electron correlations in ground and excited states by SAC (symmetry-adapted-cluster) and SAC CI theories. Chemical Physics Letters, 1979, 67, 329-333.	2.6	563
2	Cluster expansion of the wavefunction. Calculation of electron correlations in ground and excited states by SAC and SAC CI theories. Chemical Physics Letters, 1979, 67, 334-342.	2.6	323
3	Cluster expansion of the wavefunction, valence and rydberg excitations, ionizations, and inner-valence ionizations of CO ₂ and N ₂ O studied by the sac and sac CI theories. Chemical Physics, 1983, 75, 425-441.	2.0	269
4	Direct Determination of the Quantum-Mechanical Density Matrix Using the Density Equation. Physical Review Letters, 1996, 76, 1039-1042.	7.9	250
5	Variational calculations of fermion second-order reduced density matrices by semidefinite programming algorithm. Journal of Chemical Physics, 2001, 114, 8282-8292.	3.1	239
6	Equation for the direct determination of the density matrix. Physical Review A, 1976, 14, 41-50.	2.5	235
7	Description of two- and many-electron processes by the SAC-CI method. Chemical Physics Letters, 1991, 177, 331-337.	2.6	181
8	Excited and ionized states of free base porphyrin studied by the symmetry adapted cluster configuration interaction (SAC-CI) method. Journal of Chemical Physics, 1996, 104, 2321-2329.	3.1	164
9	Solving the Schrödinger equation for helium atom and its isoelectronic ions with the free iterative complement interaction (ICI) method. Journal of Chemical Physics, 2007, 127, 224104.	3.1	142
10	Theoretical Studies on the Color-Tuning Mechanism in Retinal Proteins. Journal of Chemical Theory and Computation, 2007, 3, 605-618.	5.4	134
11	Red Light in Chemiluminescence and Yellow-Green Light in Bioluminescence: A Color-Tuning Mechanism of Firefly, <i>Photinus pyralis</i> , Studied by the Symmetry-Adapted Cluster Configuration Interaction Method. Journal of the American Chemical Society, 2007, 129, 8756-8765.	14.2	127
12	Structure of the exact wave function. Journal of Chemical Physics, 2000, 113, 2949-2956.	3.1	117
13	Quasirelativistic theory for the magnetic shielding constant. I. Formulation of Douglas-Kroll-Hess transformation for the magnetic field and its application to atomic systems. Journal of Chemical Physics, 2003, 118, 1015-1026.	3.1	108
14	Quasirelativistic theory for magnetic shielding constants. II. Gauge-including atomic orbitals and applications to molecules. Journal of Chemical Physics, 2003, 118, 1027-1035.	3.1	103
15	Electrostatic force theory for a molecule and interacting molecules. I. Concept and illustrative applications. Journal of the American Chemical Society, 1973, 95, 345-354.	14.2	100
16	Scaled Schrödinger Equation and the Exact Wave Function. Physical Review Letters, 2004, 93, 030403.	7.9	96
17	Electronic excitation spectra of furan and pyrrole: Revisited by the symmetry adapted cluster configuration interaction method. Journal of Chemical Physics, 2000, 113, 7853-7866.	3.1	88
18	SAC-CI Method: Theoretical Aspects and Some Recent Topics. Computational Chemistry - Reviews of Current Trends, 1997, , 62-124.	0.4	86

#	ARTICLE	IF	CITATIONS
19	Formulation and implementation of direct algorithm for the symmetry-adapted cluster and symmetry-adapted cluster configuration interaction method. <i>Journal of Chemical Physics</i> , 2008, 128, 094105.	3.1	84
20	Electronic excitations of the green fluorescent protein chromophore in its protonation states: SAC/SAC-CI study. <i>Journal of Computational Chemistry</i> , 2003, 24, 1421-1431.	3.4	83
21	Ab initio molecular orbital model of scanning tunneling microscopy. <i>Journal of Chemical Physics</i> , 1996, 104, 2410-2417.	3.1	80
22	Density matrix variational theory: Application to the potential energy surfaces and strongly correlated systems. <i>Journal of Chemical Physics</i> , 2002, 116, 5432-5439.	3.1	79
23	Excited states of GFP chromophore and active site studied by the SAC-CI method: Effect of protein environment and mutations. <i>Journal of Computational Chemistry</i> , 2007, 28, 2443-2452.	3.4	78
24	Helical Structure and Circular Dichroism Spectra of DNA: A Theoretical Study. <i>Journal of Physical Chemistry A</i> , 2013, 117, 42-55.	2.5	77
25	Dipped adcluster model study for molecular and dissociative chemisorptions of O ₂ on Ag surface. <i>Journal of Chemical Physics</i> , 1993, 98, 2423-2436.	3.1	75
26	Multireference cluster expansion theory: MR-CI theory. <i>Journal of Chemical Physics</i> , 1985, 83, 713-722.	3.1	73
27	Excited States of Free Base Phthalocyanine Studied by the SAC-CI Method. <i>Journal of Physical Chemistry A</i> , 1997, 101, 446-451.	2.5	72
28	Cluster expansion of the wave function. Electron correlations in singlet and triplet excited states, ionized states, and electron attached states by SAC and SAC-CI theories. <i>International Journal of Quantum Chemistry</i> , 1981, 20, 1301-1313.	2.0	71
29	Cluster expansion of the wave function. Valence and Rydberg excitations and ionizations of ethylene. <i>Journal of Chemical Physics</i> , 1984, 80, 3703-3709.	3.1	71
30	Dipped adcluster model for chemisorptions and catalytic reactions on a metal surface. <i>Journal of Chemical Physics</i> , 1987, 87, 4995-5001.	3.1	67
31	Mechanism of color tuning in retinal protein: SAC-CI and QM/MM study. <i>Chemical Physics Letters</i> , 2005, 414, 239-242.	2.6	67
32	Analytical energy gradient of the ground, excited, ionized and electron-attached states calculated by the SAC/SAC-CI method. <i>Chemical Physics Letters</i> , 1997, 280, 79-84.	2.6	66
33	Exponentially generated configuration interaction theory. Descriptions of excited, ionized, and electron attached states. <i>Journal of Chemical Physics</i> , 1991, 94, 6716-6727.	3.1	65
34	Exponentially generated wave functions. <i>Journal of Chemical Physics</i> , 1985, 83, 5743-5748.	3.1	64
35	Structure of the exact wave function. II. Iterative configuration interaction method. <i>Journal of Chemical Physics</i> , 2001, 115, 2000-2006.	3.1	59
36	On the Unrestricted Hartree-Fock Wavefunction. <i>Journal of Chemical Physics</i> , 1969, 51, 3175-3180.	3.1	58

#	ARTICLE	IF	CITATIONS
37	Theoretical study on the ground and excited states of MnO^{4-} . Journal of Chemical Physics, 1991, 95, 8287-8291.	3.1	58
38	Energy gradient method for the ground, excited, ionized, and electron-attached states calculated by the SAC (symmetry-adapted cluster)/SAC-CI (configuration interaction) method. Chemical Physics, 1999, 242, 177-193.	2.0	57
39	Mechanism of methanol synthesis on Cu(100) and Zn/Cu(100) surfaces: Comparative dipped adcluster model study. International Journal of Quantum Chemistry, 2000, 77, 341-349.	2.0	55
40	Analytically Solving the Relativistic Dirac-Coulomb Equation for Atoms and Molecules. Physical Review Letters, 2005, 95, 050407.	7.9	54
41	Discovery of a General Method of Solving the Schrödinger and Dirac Equations That Opens a Way to Accurately Predictive Quantum Chemistry. Accounts of Chemical Research, 2012, 45, 1480-1490.	16.1	53
42	Excited and ionized states of aniline: Symmetry adapted cluster configuration interaction theoretical study. Journal of Chemical Physics, 2002, 117, 2045-2052.	3.1	52
43	Deepening and Extending the Quantum Principles in Chemistry. Bulletin of the Chemical Society of Japan, 2005, 78, 1705-1724.	3.3	51
44	General method of solving the Schrödinger equation of atoms and molecules. Physical Review A, 2005, 72, .	2.5	51
45	A Mechanism for the Palladium-Catalyzed Regioselective Silaboration of Allene: A Theoretical Study. Organometallics, 2008, 27, 1736-1742.	2.5	47
46	Electronic excitation and ionization spectra of azabenzenes: Pyridine revisited by the symmetry-adapted cluster configuration interaction method. Journal of Chemical Physics, 2001, 114, 5117-5123.	3.1	46
47	Origin of color tuning in human red, green, and blue cone pigments: SAC-CI and QM/MM study. Chemical Physics Letters, 2008, 462, 318-320.	2.6	46
48	Free iterative-complement-interaction calculations of the hydrogen molecule. Physical Review A, 2005, 72, .	2.5	45
49	Solving non-Born-Oppenheimer Schrödinger equation for hydrogen molecular ion and its isotopomers using the free complement method. Journal of Chemical Physics, 2009, 130, 024102.	3.1	45
50	Dipped adcluster model for chemisorptions and catalytic reactions on a metal surface: Image force correction and applications to Pd-O_2 adclusters. Journal of Chemical Physics, 1991, 95, 640-647.	3.1	43
51	Symmetry-adapted cluster-configuration interaction method applied to high-spin multiplicity. Journal of Chemical Physics, 1993, 98, 7179-7184.	3.1	43
52	Structure of the exact wave function. III. Exponential ansatz. Journal of Chemical Physics, 2001, 115, 2465-2475.	3.1	43
53	Solving the Schrödinger equation of helium and its isoelectronic ions with the exponential integral (Ei) function in the free iterative complement interaction method. Physical Chemistry Chemical Physics, 2008, 10, 4486.	2.8	42
54	Artificial color tuning of firefly luminescence: Theoretical mutation by tuning electrostatic interactions between protein and luciferin. Chemical Physics Letters, 2009, 469, 191-194.	2.6	39

#	ARTICLE	IF	CITATIONS
55	Inverse Schrödinger equation and the exact wave function. <i>Physical Review A</i> , 2002, 65, .	2.5	38
56	Analytical energy gradients of the excited, ionized and electron-attached states calculated by the SAC-CI general-R method. <i>Chemical Physics Letters</i> , 2001, 347, 493-498.	2.6	37
57	Ionized and excited states of ferrocene: Symmetry adapted cluster configuration interaction study. <i>Journal of Chemical Physics</i> , 2002, 117, 6533-6537.	3.1	37
58	Structure of the exact wave function. V. Iterative configuration interaction method for molecular systems within finite basis. <i>Journal of Chemical Physics</i> , 2002, 117, 9-12.	3.1	37
59	Iterative CI general singles and doubles (ICIGSD) method for calculating the exact wave functions of the ground and excited states of molecules. <i>Journal of Chemical Physics</i> , 2005, 122, 194108.	3.1	37
60	On the orbital theories in the spin correlation problems. II. Unrestricted and spin extended Hartree-Fock theories. <i>Journal of Chemical Physics</i> , 1973, 59, 2586-2595.	3.1	36
61	Relativistic effects and the halogen dependencies in the ^{13}C chemical shifts of CH_4^nIn , CH_4^nBr_m , CCl_4^nIn , and CBr_4^nIn ($n=0-4$). <i>Journal of Computational Chemistry</i> , 2001, 22, 528-536.	3.4	36
62	On the color-tuning mechanism of Human-Blue visual pigment: SAC-CI and QM/MM study. <i>Chemical Physics Letters</i> , 2006, 432, 252-256.	2.6	36
63	Calculation of isotropic hyperfine coupling constants by the symmetry adapted cluster expansion configuration interaction theory. <i>Journal of Chemical Physics</i> , 1988, 89, 4185-4192.	3.1	35
64	Self-Condensation Reaction of Lithium (Alkoxy)silylenoid: A Model Study by ab Initio Calculation. <i>Organometallics</i> , 1998, 17, 4573-4577.	2.5	35
65	How Accurately Does the Free Complement Wave Function of a Helium Atom Satisfy the Schrödinger Equation?. <i>Physical Review Letters</i> , 2008, 101, 240406.	7.9	35
66	Color Tuning Mechanism of Human Red, Green, and Blue Cone Pigments: SAC-CI Theoretical Study. <i>Bulletin of the Chemical Society of Japan</i> , 2009, 82, 1140-1148.	3.3	35
67	Analytical energy gradient of the symmetry-adapted-cluster configuration-interaction general-R method for singlet to septet ground and excited states. <i>Journal of Chemical Physics</i> , 2004, 120, 2593-2605.	3.1	34
68	Symmetry-adapted-cluster/symmetry-adapted-cluster configuration interaction methodology extended to giant molecular systems: Ring molecular crystals. <i>Journal of Chemical Physics</i> , 2007, 126, 084104.	3.1	34
69	SAC-CI GENERAL-R METHOD: THEORY AND APPLICATIONS TO THE MULTI-ELECTRON PROCESSES. , 2002, , 293-319.		33
70	Peralkylated Tetrasilanes: Conformational Dependence of the Photoelectron Spectrum. <i>Journal of Physical Chemistry A</i> , 2002, 106, 2369-2373.	2.5	33
71	Direct determination of second-order density matrix using density equation: Open-shell system and excited state. <i>Journal of Chemical Physics</i> , 2000, 112, 8772-8778.	3.1	32
72	Fine theoretical spectroscopy using symmetry adapted cluster-configuration interaction general-R method: Outer- and inner-valence ionization spectra of CS_2 and OCS . <i>Journal of Chemical Physics</i> , 2002, 117, 3248-3255.	3.1	32

#	ARTICLE	IF	CITATIONS
73	Structure of the exact wave function. IV. Excited states from exponential ansatz and comparative calculations by the iterative configuration interaction and extended coupled cluster theories. Journal of Chemical Physics, 2002, 116, 1811-1824.	3.1	31
74	LiH potential energy curves for ground and excited states with the free complement local Schrödinger equation method. Chemical Physics Letters, 2010, 496, 347-350.	2.6	29
75	Potential energy curves of the ground, excited, and ionized states of Ar ₂ studied by the symmetry adapted cluster-configuration interaction theory. Journal of Chemical Physics, 1990, 92, 6084-6092.	3.1	28
76	Electronic mechanism of the surface enhanced Raman scattering. Journal of Chemical Physics, 1995, 103, 2286-2294.	3.1	28
77	Solving the Schrödinger and Dirac equations of hydrogen molecular ion accurately by the free iterative complement interaction method. Journal of Chemical Physics, 2008, 128, 124103.	3.1	28
78	Accurate solutions of the Schrödinger and Dirac equations of H_2^+ , HD^+ , and HT^+ : With and without Born-Oppenheimer approximation and under magnetic field. Chemical Physics, 2012, 401, 62-72.	2.0	26
79	Similarities and Differences between RNA and DNA Double-Helical Structures in Circular Dichroism Spectroscopy: A SAC-CI Study. Journal of Physical Chemistry A, 2016, 120, 9008-9018.	2.5	26
80	Spin-spin coupling between the two unpaired electrons in bis(tetrathiafulvalenyl)ketone dications. Advanced Materials, 1993, 5, 741-743.	21.5	25
81	Hyperfine splitting constants studied by the symmetry adapted cluster-configuration interaction method. Journal of Chemical Physics, 1994, 100, 5821-5828.	3.1	25
82	Quasirelativistic study of ¹²⁵ Te nuclear magnetic shielding constants and chemical shifts. Journal of Computational Chemistry, 2001, 22, 1502-1508.	3.4	25
83	Theoretical studies on the catalytic activity of Ag surface for the oxidation of olefins. International Journal of Quantum Chemistry, 1997, 65, 839-855.	2.0	24
84	Theoretical study for the excited states of MoO_4^{2-} and MoSe_2^{4-} . Journal of Chemical Physics, 1990, 93, 1865-1875.	3.1	23
85	Force in SCF theories. Second derivative of potential energy. Journal of Chemical Physics, 1982, 77, 1961-1968.	3.1	20
86	Outer- and inner-valence ionization spectra of NH_3 , PH_3 , and AsH_3 : symmetry-adapted cluster configuration interaction general-R study. Journal of Chemical Physics, 2002, 116, 1934-1943.	3.1	20
87	Free-complement local-Schrödinger-equation method for solving the Schrödinger equation of atoms and molecules: Basic theories and features. Journal of Chemical Physics, 2015, 142, 084117.	3.1	20
88	Energetics of the Electron Transfer from Bacteriopheophytin to Ubiquinone in the Photosynthetic Reaction Center of Rhodospseudomonas Viridis: Theoretical Study. Journal of Physical Chemistry B, 2003, 107, 838-847.	2.7	19
89	SAC and SAC-CI Calculations of Excitation and Circular Dichroism Spectra of Straight-Chain and Cyclic Dichalcogens. Journal of Physical Chemistry A, 2006, 110, 10053-10062.	2.5	19
90	SOLVING THE SCHRÖDINGER AND DIRAC EQUATIONS FOR A HYDROGEN ATOM IN THE UNIVERSE'S STRONGEST MAGNETIC FIELDS WITH THE FREE COMPLEMENT METHOD. Astrophysical Journal, 2010, 725, 528-533.	4.6	19

#	ARTICLE	IF	CITATIONS
91	Mixed- ϵ exponentially generated wave function method for ground, excited, ionized, and electron attached states of a molecule. <i>Journal of Chemical Physics</i> , 1991, 95, 4296-4305.	3.1	18
92	Roles of proteins in the electron transfer in the photosynthetic reaction center of <i>Rhodospseudomonas viridis</i> : bacterioopheophytin to ubiquinone. <i>Journal of Computational Chemistry</i> , 2001, 22, 265-272.	3.4	16
93	Theoretical investigation on the valence ionization spectra of Cl ₂ O, ClOOCl, and F ₂ O by correlation-based configuration interaction methods. <i>Journal of Chemical Physics</i> , 2003, 118, 5811-5820.	3.1	16
94	Circular Dichroism and Absorption Spectroscopy for Three-Membered Ring Compounds Using Symmetry-Adapted Cluster-Configuration Interaction (SAC-CI) Method. <i>Bulletin of the Chemical Society of Japan</i> , 2009, 82, 1215-1226.	3.3	16
95	Solving the Schrödinger equation of atoms and molecules: Chemical-formula theory, free-complement chemical-formula theory, and intermediate variational theory. <i>Journal of Chemical Physics</i> , 2018, 149, 114105.	3.1	16
96	CASSCF study of bonding in NiCO and FeCO. <i>International Journal of Quantum Chemistry</i> , 1999, 72, 221-231.	2.0	15
97	General coalescence conditions for the exact wave functions: Higher-order relations for two-particle systems. <i>Journal of Chemical Physics</i> , 2013, 139, 044114.	3.1	15
98	Non-Born-Oppenheimer potential energy curve: Hydrogen molecular ion with highly accurate free complement method. <i>Journal of Chemical Physics</i> , 2013, 139, 074105.	3.1	15
99	SOLVING THE NON-BORN-OPPENHEIMER SCHRÖDINGER EQUATION FOR THE HYDROGEN MOLECULAR ION WITH THE FREE COMPLEMENT METHOD. II. HIGHLY ACCURATE ELECTRONIC, VIBRATIONAL, AND ROTATIONAL EXCITED STATES. <i>Astrophysical Journal</i> , 2013, 770, 144.	4.6	15
100	Indicator of the Stacking Interaction in the DNA Double-Helical Structure: ChiraSac Study. <i>Journal of Physical Chemistry A</i> , 2015, 119, 8269-8278.	2.5	15
101	Solving the Schrödinger equation of atoms and molecules with the free-complement chemical-formula theory: First-row atoms and small molecules. <i>Journal of Chemical Physics</i> , 2018, 149, 114106.	3.1	15
102	Theoretical model studies for surface-molecule interacting systems. <i>International Journal of Quantum Chemistry</i> , 1992, 44, 725-736.	2.0	14
103	Conformational Dependence of the Circular Dichroism Spectrum of \pm -Hydroxyphenylacetic Acid: A ChiraSac Study. <i>Journal of Physical Chemistry A</i> , 2013, 117, 14065-14074.	2.5	14
104	Circular Dichroism Spectra of Uridine Derivatives: ChiraSac Study. <i>Journal of Physical Chemistry A</i> , 2014, 118, 2931-2941.	2.5	14
105	Analytical evaluations of exponentially correlated unlinked one-center, three- and four-electron integrals. <i>Physical Review A</i> , 2012, 85, .	2.5	13
106	Solving the Schrödinger equation of hydrogen molecules with the free-complement variational theory: essentially exact potential curves and vibrational levels of the ground and excited states of the Σ symmetry. <i>Physical Chemistry Chemical Physics</i> , 2019, 21, 6327-6340.	2.8	13
107	The Hellmann-Feynman theorem applied to long-range forces. <i>Theoretica Chimica Acta</i> , 1976, 41, 119-131.	0.8	12
108	Equation for the direct determination of the density matrix: Time-dependent density equation and perturbation theory. <i>Theoretical Chemistry Accounts</i> , 1999, 102, 97-104.	1.4	12
