#	ARTICLE	IF	CITATIONS
1	Metabolomics: population epidemiology and concordance in Australian children aged 11–12 years and their parents. <i>BMJ Open</i> , 2019, 9, 106-117.	1.9	48
2	Sleep problems, internalizing and externalizing symptoms, and domains of health-related quality of life: bidirectional associations from early childhood to early adolescence. <i>Sleep</i> , 2021, 44, .	1.1	33
3	Plasma Trimethylamine N-Oxide and Its Precursors: Population Epidemiology, Parent–Child Concordance, and Associations with Reported Dietary Intake in 11- to 12-Year-Old Children and Their Parents. <i>Current Developments in Nutrition</i> , 2020, 4, nzaa103.	0.3	18
4	Vascular function and stiffness: population epidemiology and concordance in Australian children aged 11–12 years and their parents. <i>BMJ Open</i> , 2019, 9, 34-43.	1.9	15
5	Goldilocks Days: optimising children’s time use for health and well-being. <i>Journal of Epidemiology and Community Health</i> , 2022, 76, 301-308.	3.7	15
6	Trimethylamine N-oxide (TMAO) Is not Associated with Cardiometabolic Phenotypes and Inflammatory Markers in Children and Adults. <i>Current Developments in Nutrition</i> , 2021, 5, nzaa179.	0.3	15
7	Carotid artery intima–media thickness, distensibility and elasticity: population epidemiology and concordance in Australian children aged 11–12 years old and their parents. <i>BMJ Open</i> , 2019, 9, 23-33.	1.9	14
8	Albuminuria: population epidemiology and concordance in Australian children aged 11–12 years and their parents. <i>BMJ Open</i> , 2019, 9, 75-84.	1.9	11
9	Hearing, speech reception, vocabulary and language: population epidemiology and concordance in Australian children aged 11 to 12 years and their parents. <i>BMJ Open</i> , 2019, 9, 85-94.	1.9	11
10	Population epidemiology and concordance for plasma amino acids and precursors in 11–12-year-old children and their parents. <i>Scientific Reports</i> , 2021, 11, 3619.	3.3	8
11	pQCT bone geometry and strength: population epidemiology and concordance in Australian children aged 11–12 years and their parents. <i>BMJ Open</i> , 2019, 9, 63-74.	1.9	7
12	Can adult polygenic scores improve prediction of body mass index in childhood?. <i>International Journal of Obesity</i> , 2022, 46, 1375-1383.	3.4	7
13	Plasma B Vitamins: Population Epidemiology and Parent-Child Concordance in Children and Adults. <i>Nutrients</i> , 2021, 13, 821.	4.1	5
14	Genetic variation, intrauterine growth, and adverse pregnancy conditions predict leptin gene DNA methylation in blood at birth and 12 months of age. <i>International Journal of Obesity</i> , 2020, 44, 45-56.	3.4	4
15	Does an inflammatory diet affect mental well-being in late childhood and mid-life? A cross-sectional study. <i>British Journal of Nutrition</i> , 2022, 127, 939-947.	2.3	2
16	Cross-sectional metabolic profiles of mental health in population-based cohorts of 11- to 12-year-olds and mid-life adults: The Longitudinal Study of Australian Children. <i>Australian and New Zealand Journal of Psychiatry</i> , 2020, 54, 928-937.	2.3	1
17	Does inflammation mediate the association between obesity and hearing status in mid-childhood and mid-life?. <i>International Journal of Obesity</i> , 2022, , .	3.4	1
18	Oral health: Epidemiology and concordance in Australian children and parents. <i>Community Dentistry and Oral Epidemiology</i> , 2021, , .	1.9	0
