#	Paper	IF	Citations
14	Metabolomics: population epidemiology and concordance in Australian children aged 11-12 years and their parents. <i>BMJ Open</i> , 2019 , 9, 106-117	3	27
13	Plasma Trimethylamine N-Oxide and Its Precursors: Population Epidemiology, Parent-Child Concordance, and Associations with Reported Dietary Intake in 11- to 12-Year-Old Children and Their Parents. <i>Current Developments in Nutrition</i> , 2020 , 4, nzaa103	0.4	10
12	Carotid artery intima-media thickness, distensibility and elasticity: population epidemiology and concordance in Australian children aged 11-12 years old and their parents. <i>BMJ Open</i> , 2019 , 9, 23-33	3	10
11	Vascular function and stiffness: population epidemiology and concordance in Australian children aged 11-12 years and their parents. <i>BMJ Open</i> , 2019 , 9, 34-43	3	9
10	Sleep problems, internalizing and externalizing symptoms, and domains of health-related quality of life: bidirectional associations from early childhood to early adolescence. <i>Sleep</i> , 2021 , 44,	1.1	9
9	Albuminuria: population epidemiology and concordance in Australian children aged 11-12 years and their parents. <i>BMJ Open</i> , 2019 , 9, 75-84	3	6
8	pQCT bone geometry and strength: population epidemiology and concordance in Australian children aged 11-12 years and their parents. <i>BMJ Open</i> , 2019 , 9, 63-74	3	6
7	Hearing, speech reception, vocabulary and language: population epidemiology and concordance in Australian children aged 11 to 12 years and their parents. <i>BMJ Open</i> , 2019 , 9, 85-94	3	6
6	Trimethylamine N-oxide (TMAO) Is not Associated with Cardiometabolic Phenotypes and Inflammatory Markers in Children and Adults. <i>Current Developments in Nutrition</i> , 2021 , 5, nzaa179	0.4	4
5	Genetic variation, intrauterine growth, and adverse pregnancy conditions predict leptin gene DNA methylation in blood at birth and 12 months of age. <i>International Journal of Obesity</i> , 2020 , 44, 45-56	5.5	4
4	Goldilocks Days: optimising children's time use for health and well-being. <i>Journal of Epidemiology and Community Health</i> , 2021 ,	5.1	3
3	Population epidemiology and concordance for plasma amino acids and precursors in 11-12-year-old children and their parents. <i>Scientific Reports</i> , 2021 , 11, 3619	4.9	1
2	Does an inflammatory diet affect mental well-being in late childhood and mid-life? A cross-sectional study. <i>British Journal of Nutrition</i> , 2021 , 1-9	3.6	0
1	Cross-sectional metabolic profiles of mental health in population-based cohorts of 11- to 12-year-olds and mid-life adults: The Longitudinal Study of Australian Children. <i>Australian and New Zealand Journal of Psychiatry</i> , 2020 , 54, 928-937	2.6
