#	ARTICLE	IF	CITATIONS
1	The role of intraspecific competition between plants in a nursery pollination system – Comments on Villacañas de Castro and Hoffmeister 2020. <i>Ecology and Evolution</i> , 2020, 10, 11869-11874.	1.9	0
2	The role of parasitoids in a nursery-pollinator system: A population dynamics model. <i>Ecological Modelling</i> , 2019, 396, 50-58.	2.5	9
3	How does climate change affect regeneration of Mediterranean high-mountain plants? An integration and synthesis of current knowledge. <i>Plant Biology</i> , 2018, 20, 50-62.	3.8	35
4	Ten years of progress in the study of <i>Hadena-Caryophyllaceae</i> nursery pollination. A review in light of new Mediterranean data. <i>Flora: Morphology, Distribution, Functional Ecology of Plants</i> , 2017, 232, 63-72.	1.2	13
5	Comparative analyses of flower scent in <i>Sileneae</i> reveal a contrasting phylogenetic signal between night and day emissions. <i>Ecology and Evolution</i> , 2016, 6, 7869-7881.	1.9	16
6	Soil under nurse plants is always better than outside: a survey on soil amelioration by a complete guild of nurse plants across a long environmental gradient. <i>Plant and Soil</i> , 2016, 408, 31-41.	3.7	42
7	Circadian rhythm of a <i>Silene</i> species favours nocturnal pollination and constrains diurnal visitation. <i>Annals of Botany</i> , 2016, 118, 907-918.	2.9	22
8	Diel Variation in Flower Scent Reveals Poor Consistency of Diurnal and Nocturnal Pollination Syndromes in <i>Sileneae</i> . <i>Journal of Chemical Ecology</i> , 2015, 41, 1095-1104.	1.8	23
9	Comparative germination ecology of two altitudinal vicariant <i>Saxifraga</i> species endemic to the north of Spain. <i>Plant Biology</i> , 2013, 15, 593-600.	3.8	24
10	Vulnerabilidad al cambio global en la alta montaña mediterránea. <i>Ecosistemas</i> , 2012, 21, 63-72.	0.4	4
11	Demographic processes of upward range contraction in a long-lived Mediterranean high mountain plant. <i>Ecography</i> , 2011, 34, 85-93.	4.5	44
12	Selection on flowering time in Mediterranean high-mountain plants under global warming. <i>Evolutionary Ecology</i> , 2011, 25, 777-794.	1.2	55
13	Meristem Growth, Phenology, and Architecture in Chamaephytes of the Iberian Peninsula: Insights into a Largely Neglected Life Form. <i>Folia Geobotanica</i> , 2011, 46, 117-136.	0.9	14
14	Intra- and interspecific performance in growth and reproduction increase with altitude: a case study with two <i>Saxifraga</i> species from northern Spain. <i>Functional Ecology</i> , 2009, 23, 111-118.	3.6	46
15	What shapes the altitudinal range of a high mountain Mediterranean plant? Recruitment probabilities from ovule to seedling stage. <i>Ecography</i> , 2008, 31, 731-740.	4.5	41
16	Replacement of Species Along Altitude Gradients: The Role of Branch Architecture. <i>Annals of Botany</i> , 2008, 102, 953-966.	2.9	12
17	Environmental Scales on the Reproduction of a Gypsophyte: A Hierarchical Approach. <i>Annals of Botany</i> , 2007, 99, 519-527.	2.9	24
18	Generalist diurnal pollination provides greater fitness in a plant with nocturnal pollination syndrome: assessing the effects of a <i>Silene</i> ? <i>Hadena</i> interaction. <i>Oikos</i> , 2007, 116, 1461-1472.	2.7	5

#	ARTICLE	IF	CITATIONS
19	Reproductive limits of a late-flowering high-mountain Mediterranean plant along an elevational climate gradient. <i>New Phytologist</i> , 2007, 173, 367-382.	7.3	148
20	Generalist diurnal pollination provides greater fitness in a plant with nocturnal pollination syndrome: assessing the effects of a <i>Silene & “ </i> <i>Hadena </i> interaction. <i>Oikos</i> , 2007, 116, 1461-1472.	2.7	41
21	Population structure effect on reproduction of a rare plant: beyond population size effect. <i>Canadian Journal of Botany</i> , 2006, 84, 1371-1379.	1.1	16
22	Local Adaptation Enhances Seedling Recruitment Along an Altitudinal Gradient in a High Mountain Mediterranean Plant. <i>Annals of Botany</i> , 2006, 99, 723-734.	2.9	129
23	Seed germination of high mountain Mediterranean species: altitudinal, interpopulation and interannual variability. <i>Ecological Research</i> , 2005, 20, 433-444.	1.5	153
24	Patch Dynamics and Islands of Fertility in a High Mountain Mediterranean Community. <i>Arctic, Antarctic, and Alpine Research</i> , 2004, 36, 518-527.	1.1	50
