#	ARTICLE	IF	CITATIONS
1	Neurodevelopmental outcomes at 7 years' corrected age in preterm infants who were fed high-dose docosahexaenoic acid to term equivalent: a follow-up of a randomised controlled trial. <i>BMJ Open</i> , 2015, 5, e007314-e007314.	0.8	84
2	Histological chorioamnionitis and developmental outcomes in very preterm infants. <i>Journal of Perinatology</i> , 2019, 39, 321-330.	0.9	19
3	Voice problems in school-aged children following very preterm birth. <i>Archives of Disease in Childhood</i> , 2016, 101, 556-560.	1.0	12
4	Dysphonia in preterm children: Assessing incidence and response to treatment. <i>Contemporary Clinical Trials</i> , 2014, 37, 170-175.	0.8	10
5	Laryngeal pathology at school age following very preterm birth. <i>International Journal of Pediatric Otorhinolaryngology</i> , 2015, 79, 398-404.	0.4	10
6	A Randomized, Controlled Trial of Behavioral Voice Therapy for Dysphonia Related to Prematurity of Birth. <i>Journal of Voice</i> , 2017, 31, 247.e9-247.e17.	0.6	7
7	Poor executive functioning in children born very preterm: Using dual-task methodology to untangle alternative theoretical interpretations. <i>Journal of Experimental Child Psychology</i> , 2016, 152, 264-277.	0.7	6
8	Docosahexaenoic acid supplementation of preterm infants and parent-reported symptoms of allergic disease at 7 years corrected age: follow-up of a randomized controlled trial. <i>American Journal of Clinical Nutrition</i> , 2019, 109, 1600-1610.	2.2	6
9	Poorer divided attention in children born very preterm can be explained by difficulty with each component task, not the executive requirement to dual-task. <i>Child Neuropsychology</i> , 2017, 23, 510-522.	0.8	5
10	Intubation-Related Dysphonia Following Extreme Preterm Birth: Case Studies in Behavioural Voice Intervention. <i>Perspectives on Voice and Voice Disorders</i> , 2014, 24, 124-129.	0.3	3
