#	ARTICLE	IF	CITATIONS
1	Developmental Regulation of Transcription in Touriga Nacional Berries under Deficit Irrigation. <i>Plants</i> , 2022, 11, 827.	1.6	1
2	Water and wastewater management for sustainable viticulture and oenology in South Portugal – a review. <i>Ciencia E Tecnica Vitivinicola</i> , 2020, 35, 1-15.	0.3	15
3	Carry-over effects on bud fertility makes early defoliation a risky crop-regulating practice in Mediterranean vineyards. <i>Australian Journal of Grape and Wine Research</i> , 2020, 26, 290-299.	1.0	7
4	Chemical composition and sensory profile of Syrah wines from semiarid tropical Brazil – Rootstock and harvest season effects. <i>LWT - Food Science and Technology</i> , 2019, 114, 108415.	2.5	9
5	Mixed Fermentation with <i>Metschnikowia pulcherrima</i> Using Different Grape Varieties. <i>Fermentation</i> , 2019, 5, 59.	1.4	7
6	Chemical and Sensorial Characterization of Tropical Syrah Wines Produced at Different Altitudes in Northeast of the Brazil. <i>South African Journal of Enology and Viticulture</i> , 2019, 40, .	0.8	2
7	Chemical characteristics of grapes cv. Syrah (<i>Vitis vinifera</i> L.) grown in the tropical semiarid region of Brazil (Pernambuco state): influence of rootstock and harvest season. <i>Journal of the Science of Food and Agriculture</i> , 2019, 99, 5050-5063.	1.7	8
8	Canopy and soil thermal patterns to support water and heat stress management in vineyards. <i>Agricultural Water Management</i> , 2019, 216, 484-496.	2.4	33
9	Climate effects on physicochemical composition of Syrah grapes at low and high altitude sites from tropical grown regions of Brazil. <i>Food Research International</i> , 2019, 121, 870-879.	2.9	39
10	Can Mediterranean terroirs withstand climate change? Case studies at the Alentejo Portuguese winegrowing region. <i>E3S Web of Conferences</i> , 2018, 50, 01004.	0.2	6
11	Effect of the harvest season on phenolic composition and oenological parameters of grapes and wines cv. “Touriga Nacional” (<i>Vitis vinifera</i> L.) produced under tropical semi-arid climate, in the state of Pernambuco, Brazil. <i>Ciencia E Tecnica Vitivinicola</i> , 2018, 33, 145-166.	0.3	9
12	Water and Heat Fluxes in Mediterranean Vineyards. , 2018, , 219-245.		3
13	Tools for management of irrigation in vineyards: an approach to farmers. <i>Acta Horticulturae</i> , 2017, , 471-476.	0.1	2
14	Can berry composition be explained by climatic indices? Comparing classical with new indices in the Portuguese Dão region. <i>Acta Horticulturae</i> , 2017, , 59-64.	0.1	1
15	Grape Ripening Is Regulated by Deficit Irrigation/Elevated Temperatures According to Cluster Position in the Canopy. <i>Frontiers in Plant Science</i> , 2016, 7, 1640.	1.7	57
16	Thermal data to monitor crop-water status in irrigated Mediterranean viticulture. <i>Agricultural Water Management</i> , 2016, 176, 80-90.	2.4	53
17	Modern viticulture in southern Europe: Vulnerabilities and strategies for adaptation to water scarcity. <i>Agricultural Water Management</i> , 2016, 164, 5-18.	2.4	148
