

# Mao-Ning Tuanmu

## List of Publications by Year in Descending Order

**Source:** <https://exaly.com/author-pdf/6335416/mao-ning-tuanmu-publications-by-year.pdf>

**Version:** 2024-04-27

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

32  
papers

3,270  
citations

19

avg, IF

4.99  
L-index

#	Paper	IF	Citations
32	SILIC: A cross database framework for automatically extracting robust biodiversity information from soundscape recordings based on object detection and a tiny training dataset. <i>Ecological Informatics</i> , <b>2022</b> , 68, 101534	4.2	1
31	New insights into the patterns and drivers of avian altitudinal migration from a growing crowdsourcing data source. <i>Ecography</i> , <b>2021</b> , 44, 75-86	6.5	6
30	Bat Diversity in Cat Ba Biosphere Reserve, Northeastern Vietnam: A Review with New Records from Mangrove Ecosystem. <i>Diversity</i> , <b>2021</b> , 13, 376	2.5	4
29	Effects of artificial light at night on the nest-site selection, reproductive success and behavior of a synanthropic bird. <i>Environmental Pollution</i> , <b>2021</b> , 288, 117805	9.3	1
28	A trait dataset for Taiwan's breeding birds. <i>Biodiversity Data Journal</i> , <b>2020</b> , 8, e49735	1.8	2
27	Integrating phylogeographic and ecological niche approaches to delimitating cryptic lineages in the blue-green damselfish (). <i>PeerJ</i> , <b>2019</b> , 7, e7384	3.1	4
26	Among-species overlap in rodent body size distributions predicts species richness along a temperature gradient. <i>Ecography</i> , <b>2018</b> , 41, 1718-1727	6.5	12
25	Cheatgrass ( <i>Bromus tectorum</i> ) distribution in the intermountain Western United States and its relationship to fire frequency, seasonality, and ignitions. <i>Biological Invasions</i> , <b>2018</b> , 20, 1493-1506	2.7	86
24	A suite of global, cross-scale topographic variables for environmental and biodiversity modeling. <i>Scientific Data</i> , <b>2018</b> , 5, 180040	8.2	165
23	Managing consequences of climate-driven species redistribution requires integration of ecology, conservation and social science. <i>Biological Reviews</i> , <b>2018</b> , 93, 284-305	13.5	91
22	Does scale matter? A systematic review of incorporating biological realism when predicting changes in species distributions. <i>PLoS ONE</i> , <b>2018</b> , 13, e0194650	3.7	14
21	Asynchronous evolution of interdependent nest characters across the avian phylogeny. <i>Nature Communications</i> , <b>2018</b> , 9, 1863	17.4	17
20	The Interplay Between Landscape Structure and Biotic Interactions. <i>Current Landscape Ecology Reports</i> , <b>2017</b> , 2, 12-29	3.2	19
19	Biodiversity redistribution under climate change: Impacts on ecosystems and human well-being. <i>Science</i> , <b>2017</b> , 355,	33.3	1215
18	A second horizon scan of biogeography: Golden Ages, Midas touches, and the Red Queen. <i>Frontiers of Biogeography</i> , <b>2016</b> , 8,	2.9	3
17	Effects of payments for ecosystem services on wildlife habitat recovery. <i>Conservation Biology</i> , <b>2016</b> , 30, 827-35	6	31
16	Scaling up the diversity-resilience relationship with trait databases and remote sensing data: the recovery of productivity after wildfire. <i>Global Change Biology</i> , <b>2016</b> , 22, 1421-32	11.4	31

15	Using multi-timescale methods and satellite-derived land surface temperature for the interpolation of daily maximum air temperature in Oregon. <i>International Journal of Climatology</i> , <b>2015</b> , 35, 3862-3878	3.5	27
14	Empirical evidence for the scale dependence of biotic interactions. <i>Global Ecology and Biogeography</i> , <b>2015</b> , 24, 750-761	6.1	56
13	Mapping tree density at a global scale. <i>Nature</i> , <b>2015</b> , 525, 201-5	50.4	402
12	Will remote sensing shape the next generation of species distribution models?. <i>Remote Sensing in Ecology and Conservation</i> , <b>2015</b> , 1, 4-18	5.3	189
11	A global, remote sensing-based characterization of terrestrial habitat heterogeneity for biodiversity and ecosystem modelling. <i>Global Ecology and Biogeography</i> , <b>2015</b> , 24, 1329-1339	6.1	114
10	A global 1-km consensus land-cover product for biodiversity and ecosystem modelling. <i>Global Ecology and Biogeography</i> , <b>2014</b> , 23, 1031-1045	6.1	217
9	Impact of livestock on giant pandas and their habitat. <i>Journal for Nature Conservation</i> , <b>2014</b> , 22, 256-264	2.3	31
8	An Assessment of Methods and Remote-Sensing Derived Covariates for Regional Predictions of 1 km Daily Maximum Air Temperature. <i>Remote Sensing</i> , <b>2014</b> , 6, 8639-8670	5	15
7	Climate-change impacts on understorey bamboo species and giant pandas in China's Qinling Mountains. <i>Nature Climate Change</i> , <b>2013</b> , 3, 249-253	21.4	117
6	Nonlinear effects of group size on collective action and resource outcomes. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , <b>2013</b> , 110, 10916-21	11.5	78
5	Relationship between floristic similarity and vegetated land surface phenology: Implications for the synoptic monitoring of species diversity at broad geographic regions. <i>Remote Sensing of Environment</i> , <b>2012</b> , 121, 488-496	13.2	19
4	Evaluating the efficacy of zoning designations for protected area management. <i>Biological Conservation</i> , <b>2011</b> , 144, 3028-3037	6.2	79
3	Temporal transferability of wildlife habitat models: implications for habitat monitoring. <i>Journal of Biogeography</i> , <b>2011</b> , 38, 1510-1523	4.1	65
2	Range-wide analysis of wildlife habitat: Implications for conservation. <i>Biological Conservation</i> , <b>2010</b> , 143, 1960-1969	6.2	56
1	Mapping understory vegetation using phenological characteristics derived from remotely sensed data. <i>Remote Sensing of Environment</i> , <b>2010</b> , 114, 1833-1844	13.2	102
