#	ARTICLE	IF	CITATIONS
1	Radial versus femoral access in patients with acute coronary syndromes undergoing invasive management: a randomised multicentre trial. <i>Lancet, The</i> , 2015, 385, 2465-2476.	13.7	1,043
2	Bivalirudin or Unfractionated Heparin in Acute Coronary Syndromes. <i>New England Journal of Medicine</i> , 2015, 373, 997-1009.	27.0	334
3	Radial versus femoral access and bivalirudin versus unfractionated heparin in invasively managed patients with acute coronary syndrome (MATRIX): final 1-year results of a multicentre, randomised controlled trial. <i>Lancet, The</i> , 2018, 392, 835-848.	13.7	215
4	Acute Kidney Injury After Radial or Femoral Access for Invasive Acute Coronary Syndrome Management. <i>Journal of the American College of Cardiology</i> , 2017, 69, 2592-2603.	2.8	132
5	Radiation Exposure and Vascular Access in Acute Coronary Syndromes. <i>Journal of the American College of Cardiology</i> , 2017, 69, 2530-2537.	2.8	61
6	Impact of Sex on Comparative Outcomes of Radial Versus Femoral Access in Patients With Acute Coronary Syndromes Undergoing Invasive Management. <i>JACC: Cardiovascular Interventions</i> , 2018, 11, 36-50.	2.9	47
7	Bivalirudin or unfractionated heparin in patients with acute coronary syndromes managed invasively with and without ST elevation (MATRIX): randomised controlled trial. <i>BMJ, The</i> , 2016, 354, i4935.	6.0	43
8	Bivalirudin or Heparin in Patients Undergoing Invasive Management of Acute Coronary Syndromes. <i>Journal of the American College of Cardiology</i> , 2018, 71, 1231-1242.	2.8	32
9	Long-term follow-up of Tako-Tsubo-like syndrome: a retrospective study of 22 cases. <i>Journal of Cardiovascular Medicine</i> , 2008, 9, 805-809.	1.5	29
10	Randomized comparison of operator radiation exposure comparing transradial and transfemoral approach for percutaneous coronary procedures: rationale and design of the minimizing adverse haemorrhagic events by TRansradial access site and systemic implementation of angioX " RADIation Dose study (RAD-MATRIX). <i>Cardiovascular Revascularization Medicine</i> , 2014, 15, 209-213.	0.8	17
11	Determinants of radiation dose during right transradial access: Insights from the RAD-MATRIX study. <i>American Heart Journal</i> , 2018, 196, 113-118.	2.7	7
12	Aberrant Right Subclavian Artery (Arteria Lusoria) Challenging 4-French Homolateral Transradial Coronary Catheterisation in Adulthood. <i>Heart Lung and Circulation</i> , 2015, 24, e164-e168.	0.4	6
13	Anomalous single coronary artery (R-type) in the elderly: Description of benign and isolated variant. <i>International Journal of Cardiology</i> , 2015, 182, 10-12.	1.7	1
14	About Acute Kidney Injury During Primary Percutaneous Coronary Intervention. <i>American Journal of Cardiology</i> , 2015, 115, 279.	1.6	1
15	Spontaneous coronary dissection: Unravelling the complex riddle of conservative or interventional treatment. <i>International Journal of Cardiology</i> , 2017, 229, 124.	1.7	1
16	Incidental angiographic finding of extended chronic brachial artery occlusion: an uncommon but unavoidable cause of transradial catheterisation failure. <i>Quantitative Imaging in Medicine and Surgery</i> , 2017, 7, 156-158.	2.0	1
17	ST-elevation myocardial infarction due to spontaneous coronary artery dissection: to touch or not to touch? The conundrum of invasive versus conservative treatment. <i>Minerva Cardioangiologica</i> , 2016, 64, 701-4.	1.2	0
18	ST-elevation myocardial infarction due to spontaneous coronary artery dissection: to touch or not to touch? The conundrum of invasive versus conservative treatment. <i>Minerva Cardioangiologica</i> , 2016, 64, 699-702.	1.2	0
