#	ARTICLE	IF	CITATIONS
1	Neonatal outcome comparisons between preterm infants with or without early pulmonary hypertension following prolonged preterm premature rupture of membranes before 25 gestational weeks in Korean Neonatal Network. <i>Journal of Maternal-Fetal and Neonatal Medicine</i> , 2022, 35, 1286-1294.	1.5	6
2	Increased Risk of Meconium-Related Ileus in Extremely Premature Infants Exposed to Antenatal Magnesium Sulfate. <i>Neonatology</i> , 2022, 119, 68-76.	2.0	9
3	Thrombin Preconditioning Improves the Therapeutic Efficacy of Mesenchymal Stem Cells in Severe Intraventricular Hemorrhage Induced Neonatal Rats. <i>International Journal of Molecular Sciences</i> , 2022, 23, 4447.	4.1	10
4	Effect of levothyroxine supplementation in extremely low birth weight infants with transient hypothyroxinemia of prematurity. <i>Scientific Reports</i> , 2022, 12, .	3.3	3
5	Mesenchymal stem cell therapy for intractable neonatal disorders. <i>Pediatrics and Neonatology</i> , 2021, 62, S16-S21.	0.9	12
6	Brain-derived neurotrophic factor mediates neuroprotection of mesenchymal stem cell-derived extracellular vesicles against severe intraventricular hemorrhage in newborn rats. <i>Stem Cells Translational Medicine</i> , 2021, 10, 374-384.	3.3	36
7	Mortality and Morbidities according to Time of Birth in Extremely Low Birth Weight Infants. <i>Journal of Korean Medical Science</i> , 2021, 36, e86.	2.5	1
8	Nonintervention Is Not Noninferior to Oral Ibuprofen for Treatment of Patent Ductus Arteriosusâ€”Reply. <i>JAMA Pediatrics</i> , 2021, 175, 430.	6.2	0
9	Stem Cells for Bronchopulmonary Dysplasia in Preterm Infants: A Randomized Controlled Phase II Trial. <i>Stem Cells Translational Medicine</i> , 2021, 10, 1129-1137.	3.3	58
10	Early pulmonary hypertension is a risk factor for bronchopulmonary dysplasia-associated late pulmonary hypertension in extremely preterm infants. <i>Scientific Reports</i> , 2021, 11, 11206.	3.3	7
11	Stem cell restores thalamocortical plasticity to rescue cognitive deficit in neonatal intraventricular hemorrhage. <i>Experimental Neurology</i> , 2021, 342, 113736.	4.1	10
12	Cesarean section was not associated with mortality or morbidities advantage in very low birth weight infants: a nationwide cohort study. <i>Scientific Reports</i> , 2021, 11, 20264.	3.3	7
13	BDNF-Overexpressing Engineered Mesenchymal Stem Cells Enhances Their Therapeutic Efficacy against Severe Neonatal Hypoxic Ischemic Brain Injury. <i>International Journal of Molecular Sciences</i> , 2021, 22, 11395.	4.1	15
14	Reactive microglia and astrocytes in neonatal intraventricular hemorrhage model are blocked by mesenchymal stem cells. <i>Glia</i> , 2020, 68, 178-192.	4.9	31
15	Developing a newborn rat model of ventriculitis without concomitant bacteremia by intraventricular injection of K1 (âˆ™) <i>Escherichia coli</i> . <i>Pediatrics International</i> , 2020, 62, 347-356.	0.5	3
16	Mortality rate-dependent variations in antenatal corticosteroid-associated outcomes in very low birth weight infants with 23-34 weeks of gestation: A nationwide cohort study. <i>PLoS ONE</i> , 2020, 15, e0240168.	2.5	7
17	Survival rate dependent variations in retinopathy of prematurity treatment rates in very low birth weight infants. <i>Scientific Reports</i> , 2020, 10, 19401.	3.3	4
18	Antenatal magnesium sulfate treatment and risk of necrotizing enterocolitis in preterm infants born at less than 32 weeks of gestation. <i>Scientific Reports</i> , 2020, 10, 12826.	3.3	10

#	ARTICLE	IF	CITATIONS
19	Conservative Non-intervention Approach for Hemodynamically Significant Patent Ductus Arteriosus in Extremely Preterm Infants. <i>Frontiers in Pediatrics</i> , 2020, 8, 605134.	1.9	10
20	Effect of Nonintervention vs Oral Ibuprofen in Patent Ductus Arteriosus in Preterm Infants. <i>JAMA Pediatrics</i> , 2020, 174, 755.	6.2	50
21	Changes in Serum Creatinine Levels and Natural Evolution of Acute Kidney Injury with Conservative Management of Hemodynamically Significant Patent Ductus Arteriosus in Extremely Preterm Infants at 23–26 Weeks of Gestation. <i>Journal of Clinical Medicine</i> , 2020, 9, 699.	2.4	9
22	A Preterm Infant with Multiple Anomalies Diagnosed with Atypical CHARGE Syndrome after a Novel <i>CHD7</i> Variant Confirmed Using Whole-Genome Sequencing. <i>Neonatology</i> , 2020, 117, 374-379.	2.0	0
23	Title is missing!. , 2020, 15, e0240168.		0
24	Title is missing!. , 2020, 15, e0240168.		0
25	Title is missing!. , 2020, 15, e0240168.		0
26	Title is missing!. , 2020, 15, e0240168.		0
27	Incidence and severity of transient hypothyroxinaemia of prematurity associated with survival without composite morbidities in extremely low birth weight infants. <i>Scientific Reports</i> , 2019, 9, 9628.	3.3	11
28	Initial and delayed thyroid-stimulating hormone elevation in extremely low-birth-weight infants. <i>BMC Pediatrics</i> , 2019, 19, 347.	1.7	10
29	Increased risk of refeeding syndrome–like hypophosphatemia with high initial amino acid intake in small-for-gestational-age, extremely-low-birthweight infants. <i>PLoS ONE</i> , 2019, 14, e0221042.	2.5	11
30	Antenatal betamethasone enhanced the detrimental effects of postnatal dexamethasone on hyperoxic lung and brain injuries in newborn rats. <i>PLoS ONE</i> , 2019, 14, e0221847.	2.5	4
31	Outcome and risk factors associated with perirenal subcapsular fluid collections in extremely preterm infants with acute kidney injury. <i>European Radiology</i> , 2019, 29, 3847-3853.	4.5	5
32	Thrombin Preconditioning Enhances Therapeutic Efficacy of Human Wharton’s Jelly–Derived Mesenchymal Stem Cells in Severe Neonatal Hypoxic Ischemic Encephalopathy. <i>International Journal of Molecular Sciences</i> , 2019, 20, 2477.	4.1	28
33	Mortality rate-dependent variations in the survival without major morbidities rate of extremely preterm infants. <i>Scientific Reports</i> , 2019, 9, 7371.	3.3	16
34	Thrombin Preconditioning Boosts Biogenesis of Extracellular Vesicles from Mesenchymal Stem Cells and Enriches Their Cargo Contents via Protease-Activated Receptor-Mediated Signaling Pathways. <i>International Journal of Molecular Sciences</i> , 2019, 20, 2899.	4.1	22
35	Thrombin Preconditioning of Extracellular Vesicles Derived from Mesenchymal Stem Cells Accelerates Cutaneous Wound Healing by Boosting Their Biogenesis and Enriching Cargo Content. <i>Journal of Clinical Medicine</i> , 2019, 8, 533.	2.4	46
36	WKYMVm hexapeptide, a strong formyl peptide receptor 2 agonist, attenuates hyperoxia-induced lung injuries in newborn mice. <i>Scientific Reports</i> , 2019, 9, 6815.	3.3	25

#	ARTICLE	IF	CITATIONS
37	A Rare Case of Lethal Prenatal-Onset Infantile Cortical Hyperostosis. <i>Yonsei Medical Journal</i> , 2019, 60, 484.	2.2	2
38	Effect of Sustained Inflations vs Intermittent Positive Pressure Ventilation on Bronchopulmonary Dysplasia or Death Among Extremely Preterm Infants. <i>JAMA - Journal of the American Medical Association</i> , 2019, 321, 1165.	7.4	137
39	International Perspectives: Implementation of the Korean Neonatal Network. <i>NeoReviews</i> , 2019, 20, e177-e188.	0.8	6
40	Natural evolution of ductus arteriosus with noninterventional conservative management in extremely preterm infants born at 23-28 weeks of gestation. <i>PLoS ONE</i> , 2019, 14, e0212256.	2.5	41
41	Mortality Rate-Dependent Variations in the Timing and Causes of Death in Extremely Preterm Infants Born at 23-24 Weeks Gestation*. <i>Pediatric Critical Care Medicine</i> , 2019, 20, 630-637.	0.5	11
42	B23/Nucleophosmin promotes reconstitution of synaptic path in hippocampus after injury. <i>Biochemical and Biophysical Research Communications</i> , 2019, 508, 1082-1087.	2.1	0
43	Cell-Based Therapy for Neonatal Lung Diseases. , 2019, , 347-361.		0
44	Short-term outcomes comparison between preterm infants with and without acute hypoxic respiratory failure attributable to presumed pulmonary hypoplasia after prolonged preterm premature rupture of membranes before 25 gestational weeks. <i>Journal of Maternal-Fetal and Neonatal Medicine</i> , 2019, 32, 1938-1945.	1.5	10
45	The Impact of Surgical Intervention on Neurodevelopmental Outcomes in Very Low Birth Weight Infants: a Nationwide Cohort Study in Korea. <i>Journal of Korean Medical Science</i> , 2019, 34, e271.	2.5	7
46	Continuous Renal Replacement Therapy in Preterm Infants. <i>Yonsei Medical Journal</i> , 2019, 60, 984.	2.2	7
47	Vascular endothelial growth factor mediates the therapeutic efficacy of mesenchymal stem cell-derived extracellular vesicles against neonatal hyperoxic lung injury. <i>Experimental and Molecular Medicine</i> , 2018, 50, 1-12.	7.7	109
48	Strategies to enhance paracrine potency of transplanted mesenchymal stem cells in intractable neonatal disorders. <i>Pediatric Research</i> , 2018, 83, 214-222.	2.3	90
49	Newborn Hearing Screening Test: A Comparison between Infants in Neonatal Intensive Care Unit versus Nursery. <i>Perinatology</i> , 2018, 29, 121.	0.1	0
50	Human UCB-MSCs treatment upon intraventricular hemorrhage contributes to attenuate hippocampal neuron loss and circuit damage through BDNF-CREB signaling. <i>Stem Cell Research and Therapy</i> , 2018, 9, 326.	5.5	58
51	Dexamethasone does not prevent hydrocephalus after severe intraventricular hemorrhage in newborn rats. <i>PLoS ONE</i> , 2018, 13, e0206306.	2.5	7
52	Intratracheal transplantation of mesenchymal stem cells attenuates hyperoxia-induced lung injury by down-regulating, but not direct inhibiting formyl peptide receptor 1 in the newborn mice. <i>PLoS ONE</i> , 2018, 13, e0206311.	2.5	8
53	The Youngest Survivor with Gestational Age of 215/7 Weeks. <i>Journal of Korean Medical Science</i> , 2018, 33, e22.	2.5	4
54	Mesenchymal stem cells transplantation attenuates brain injury and enhances bacterial clearance in <i>Escherichia coli</i> meningitis in newborn rats. <i>Pediatric Research</i> , 2018, 84, 778-785.	2.3	17

#	ARTICLE	IF	CITATIONS
55	Hypothermia broadens the therapeutic time window of mesenchymal stem cell transplantation for severe neonatal hypoxic ischemic encephalopathy. <i>Scientific Reports</i> , 2018, 8, 7665.	3.3	49
56	Trends in the incidence and associated factors of late-onset sepsis associated with improved survival in extremely preterm infants born at 23-26 weeks gestation: a retrospective study. <i>BMC Pediatrics</i> , 2018, 18, 172.	1.7	20
57	Mesenchymal Stem Cells for Severe Intraventricular Hemorrhage in Preterm Infants: Phase I Dose-Escalation Clinical Trial. <i>Stem Cells Translational Medicine</i> , 2018, 7, 847-856.	3.3	113
58	Predicting mortality in extremely low birth weight infants: Comparison between gestational age, birth weight, Apgar score, CRIB II score, initial and lowest serum albumin levels. <i>PLoS ONE</i> , 2018, 13, e0192232.	2.5	31
59	Two-Year Follow-Up Outcomes of Premature Infants Enrolled in the Phase I Trial of Mesenchymal Stem Cells Transplantation for Bronchopulmonary Dysplasia. <i>Journal of Pediatrics</i> , 2017, 185, 49-54.e2.	1.8	143
60	Prophylactic versus Early Rescue Surfactant Treatment in Preterm Infants Born at Less than 30 Weeks Gestation or with Birth Weight Less than or Equal 1,250 Grams. <i>Journal of Korean Medical Science</i> , 2017, 32, 1288.	2.5	4
61	Stem Cell Therapy for Neonatal Disorders: Prospects and Challenges. <i>Yonsei Medical Journal</i> , 2017, 58, 266.	2.2	22
62	Trends in Overall Mortality, and Timing and Cause of Death among Extremely Preterm Infants near the Limit of Viability. <i>PLoS ONE</i> , 2017, 12, e0170220.	2.5	29
63	A Novel <i>De Novo</i> Pathogenic Variant in <i>FOXF1</i> in a Newborn with Alveolar Capillary Dysplasia with Misalignment of Pulmonary Veins. <i>Yonsei Medical Journal</i> , 2017, 58, 672.	2.2	10
64	Novel Pathogenic Variant (c.580C>T) in the <i>CPS1</i> Gene in a Newborn With Carbamoyl Phosphate Synthetase 1 Deficiency Identified by Whole Exome Sequencing. <i>Annals of Laboratory Medicine</i> , 2017, 37, 58-62.	2.5	10
65	MERS-CoV Infection in a Pregnant Woman in Korea. <i>Journal of Korean Medical Science</i> , 2017, 32, 1717.	2.5	84
66	Neuron-specific expression of p48 Ebp1 during murine brain development and its contribution to CNS axon regeneration. <i>BMB Reports</i> , 2017, 50, 126-131.	2.4	10
67	Trends in Survival and Incidence of Bronchopulmonary Dysplasia in Extremely Preterm Infants at 23-26 Weeks Gestation. <i>Journal of Korean Medical Science</i> , 2016, 31, 423.	2.5	27
68	Opposing roles of the two isoforms of ErbB3 binding protein 1 in human cancer cells. <i>International Journal of Cancer</i> , 2016, 139, 1202-1208.	5.1	22
69	Intratracheal transplantation of mesenchymal stem cells simultaneously attenuates both lung and brain injuries in hyperoxic newborn rats. <i>Pediatric Research</i> , 2016, 80, 415-424.	2.3	38
70	Mandatory Closure Versus Nonintervention for Patent Ductus Arteriosus in Very Preterm Infants. <i>Journal of Pediatrics</i> , 2016, 177, 66-71.e1.	1.8	107
71	Optimal Timing of Mesenchymal Stem Cell Therapy for Neonatal Intraventricular Hemorrhage. <i>Cell Transplantation</i> , 2016, 25, 1131-1144.	2.5	60
72	Antibacterial effect of mesenchymal stem cells against <i>Escherichia coli</i> is mediated by secretion of beta-defensin-2 via toll-like receptor 4 signalling. <i>Cellular Microbiology</i> , 2016, 18, 424-436.	2.1	136

#	ARTICLE	IF	CITATIONS
73	Neuroplasticity for spontaneous functional recovery after neonatal hypoxic ischemic brain injury in rats observed by functional MRI and diffusion tensor imaging. <i>NeuroImage</i> , 2016, 126, 140-150.	4.2	13
74	Stem Cells for the Prevention of Bronchopulmonary Dysplasia. <i>Respiratory Medicine</i> , 2016, , 299-313.	0.1	4
75	Cell type-dependent variation in paracrine potency determines therapeutic efficacy against neonatal hyperoxic lung injury. <i>Cytotherapy</i> , 2015, 17, 1025-1035.	0.7	55
76	Stem Cell Therapy for Bronchopulmonary Dysplasia: Bench to Bedside Translation. <i>Journal of Korean Medical Science</i> , 2015, 30, 509.	2.5	24
77	The Korean Neonatal Network: An Overview. <i>Journal of Korean Medical Science</i> , 2015, 30, S3.	2.5	71
78	Prevention of Cytomegalovirus Transmission via Breast Milk in Extremely Low Birth Weight Infants. <i>Yonsei Medical Journal</i> , 2015, 56, 998.	2.2	25
79	Effect of Prophylactic Palivizumab on Admission Due to Respiratory Syncytial Virus Infection in Former Very Low Birth Weight Infants with Bronchopulmonary Dysplasia. <i>Journal of Korean Medical Science</i> , 2015, 30, 924.	2.5	6
80	Hypothermia Augments Neuroprotective Activity of Mesenchymal Stem Cells for Neonatal Hypoxic-Ischemic Encephalopathy. <i>PLoS ONE</i> , 2015, 10, e0120893.	2.5	103
81	Optimal Route for Human Umbilical Cord Blood-Derived Mesenchymal Stem Cell Transplantation to Protect Against Neonatal Hyperoxic Lung Injury: Gene Expression Profiles and Histopathology. <i>PLoS ONE</i> , 2015, 10, e0135574.	2.5	46
82	Dried Blood Spot Testing for Seven Steroids Using Liquid Chromatography-Tandem Mass Spectrometry With Reference Interval Determination in the Korean Population. <i>Annals of Laboratory Medicine</i> , 2015, 35, 578-585.	2.5	26
83	Optimal Route for Mesenchymal Stem Cells Transplantation after Severe Intraventricular Hemorrhage in Newborn Rats. <i>PLoS ONE</i> , 2015, 10, e0132919.	2.5	63
84	The Timing of Surgical Ligation for Patent Ductus Arteriosus Is Associated with Neonatal Morbidity in Extremely Preterm Infants Born at 23-25 Weeks of Gestation. <i>Journal of Korean Medical Science</i> , 2014, 29, 581.	2.5	16
85	Critical Role of Vascular Endothelial Growth Factor Secreted by Mesenchymal Stem Cells in Hyperoxic Lung Injury. <i>American Journal of Respiratory Cell and Molecular Biology</i> , 2014, 51, 391-399.	2.9	99
86	Steroid profiling for congenital adrenal hyperplasia by tandem mass spectrometry as a second-tier test reduces follow-up burdens in a tertiary care hospital: A retrospective and prospective evaluation. <i>Journal of Perinatal Medicine</i> , 2014, 42, 121-127.	1.4	44
87	Mesenchymal Stem Cells for Bronchopulmonary Dysplasia: Phase 1 Dose-Escalation Clinical Trial. <i>Journal of Pediatrics</i> , 2014, 164, 966-972.e6.	1.8	364
88	Risk factors and rate of progression for zone I versus zone II type 1 retinopathy of prematurity. <i>Journal of AAPOS</i> , 2014, 18, 124-128.	0.3	12
89	A novel <i>PRF1</i> gene mutation in a fatal neonate case with type 2 familial hemophagocytic lymphohistiocytosis. <i>Korean Journal of Pediatrics</i> , 2014, 57, 50.	1.9	15
90	Mesenchymal stem cells transplantation for neuroprotection in preterm infants with severe intraventricular hemorrhage. <i>Korean Journal of Pediatrics</i> , 2014, 57, 251.	1.9	33

#	ARTICLE	IF	CITATIONS
91	Retinopathy of Prematurity in Infants with Birth Weights Greater than 1,000 Grams. Neonatal Medicine, 2014, 21, 179.	0.2	1
92	Long-Term (Postnatal Day 70) Outcome and Safety of Intratracheal Transplantation of Human Umbilical Cord Blood-Derived Mesenchymal Stem Cells in Neonatal Hyperoxic Lung Injury. Yonsei Medical Journal, 2013, 54, 416.	2.2	54
93	Timing of Umbilical Cord Blood Derived Mesenchymal Stem Cells Transplantation Determines Therapeutic Efficacy in the Neonatal Hyperoxic Lung Injury. PLoS ONE, 2013, 8, e52419.	2.5	116
94	The Establishment of the Korean Neonatal Network (KNN). Neonatal Medicine, 2013, 20, 169.	0.2	29
95	Glycogen Storage Disease Presenting as Fetal Hydrops: A Case Report. Korean Journal of Perinatology, 2013, 24, 187.	0.1	0
96	Operational Outcomes of Bowel Perforation Due to Necrotizing Enterocolitis in Preterm Infants of Less than or Equal to 25 Weeks' Gestational Age. Neonatal Medicine, 2013, 20, 438.	0.2	1
97	Intratracheal Transplantation of Human Umbilical Cord Blood-Derived Mesenchymal Stem Cells Dose-Dependently Attenuates Hyperoxia-Induced Lung Injury in Neonatal Rats. Cell Transplantation, 2011, 20, 1843-1854.	2.5	130
98	Preterm infants fed nutrient-enriched formula until 6 months show improved growth and development. Pediatrics International, 2011, 53, 683-688.	0.5	19
99	Swallowing dysfunction in very low birth weight infants with oral feeding desaturation. World Journal of Pediatrics, 2011, 7, 337-343.	1.8	43
100	Two Cases of Tension Pneumopericardium in Mechanically Ventilated Preterm Infants. Journal of the Korean Society of Neonatology, 2011, 18, 153.	0.3	0
101	Comparative evaluation of hypoxic-ischemic brain injury by flow cytometric analysis of mitochondrial membrane potential with JC-1 in neonatal rats. Journal of Neuroscience Methods, 2010, 193, 232-238.	2.5	30
102	Effect of Synagis® (palivizumab) prophylaxis on readmission due to respiratory syncytial virus in very low birth weight infants. Korean Journal of Pediatrics, 2010, 53, 358.	1.9	6
