2	Late Neoproterozoic evolution of the southwestern margin of the Siberian Craton: evidence from sedimentology, geochronology and detrital zircon analysis. <i>International Geology Review</i> , 2021, 63, 1658-1681.	2.1	10
3	Early Ediacaran Magmatism in the Yenisei Ridge and Evolution of the Southwestern Margin of the Siberian Craton. <i>Minerals (Basel, Switzerland)</i> , 2020, 10, 565.	2.0	3
4	Late Paleozoicâ€“Early Mesozoic Granite Magmatism on the Arctic Margin of the Siberian Craton during the Kara-Siberia Oblique Collision and Plume Events. <i>Minerals (Basel, Switzerland)</i> , 2020, 10, 571.	2.0	14
5	Geodynamic Emplacement Setting of Late Jurassic Dikes of the Yanaâ€“Kolyma Gold Belt, NE Folded Framing of the Siberian Craton: Geochemical, Petrologic, and Uâ€“Pb Zircon Data. <i>Minerals (Basel, Tj ETQq1 1 0.784314 rgBT/Overlock</i>		
6	Paleozoic Tectonics and Geodynamics of the De Long Islands and Adjacent Structures of the Verkhoyansk-Chukotka Fold Belt. <i>Doklady Earth Sciences</i> , 2020, 495, 803-807.	0.7	1
7	Dike Magmatism in the Evolution of the Transform Active Continental Margin of the Siberian Craton in the Ediacaran. <i>Doklady Earth Sciences</i> , 2019, 489, 1285-1288.	0.7	0
8	Geodynamics and Oil and Gas Potential of the Yenisei-Khatanga Basin (Polar Siberia). <i>Minerals (Basel, Tj ETQq0 0 0 rgBT /Overlock 10 Tf</i>	2.6	18
9	The Paleomagnetic Pole of the Siberian Palecontinent at the Late Ediacaran Stage of Evolution of the Active Continental Margin (South Yenisei Ridge). <i>Doklady Earth Sciences</i> , 2018, 483, 1394-1398.	0.7	2
10	Causes of Cretaceous Remagnetization on the Southwestern Periphery of the Archipelago of the New Siberian Islands. <i>Doklady Earth Sciences</i> , 2018, 481, 847-851.	0.7	3
11	Geology and paleomagnetism of Jeannette Island (<i>De Long Archipelago, Eastern Arctic</i>). <i>Russian Geology and Geophysics</i> , 2017, 58, 1001-1017.	0.7	6
12	Paleomagnetism and geochronology of volcanogenic-sedimentary rocks of Henrietta Island (De Long) Tj ETQq0 0 0 rgBT /Overlock 10 Tf	0.7	5
13	Paleomagnetism of the Upper Paleozoic of the Novaya Zemlya Archipelago. <i>Izvestiya, Physics of the Solid Earth</i> , 2017, 53, 677-694.	0.9	3
14	Late Neoproterozoic adakites of the Yenisei Ridge (Central Siberia): petrogenesis, geodynamics, and U/Pb age. <i>Russian Geology and Geophysics</i> , 2017, 58, 1154-1170.	0.7	4
15	Adakite-gabbro-anorthosite magmatism at the final (576â€“546 Ma) development stage of the Neoproterozoic active margin in the south-west of the Siberian craton. <i>Doklady Earth Sciences</i> , 2017, 477, 1402-1407.	0.7	4
16	Early Paleozoic tectonics for the New Siberian Islands terrane (Eastern Arctic). <i>Doklady Earth Sciences</i> , 2017, 477, 1277-1281.	0.7	3
17	Geology and age of mafic magmatism on Jeannette Island (De Long archipelago)â€“Implications for paleotectonic reconstructions for the Arctic. <i>Doklady Earth Sciences</i> , 2016, 467, 219-223.	0.7	8
18	The first paleomagnetic data on dolerites from Jeannette Island (New Siberian Islands, Arctic). <i>Doklady Earth Sciences</i> , 2016, 468, 580-583.	0.7	6

#	ARTICLE	IF	CITATIONS
19	Neoproterozoic tectonic structure of the Yenisei Ridge and formation of the western margin of the Siberian craton based on new geological, paleomagnetic, and geochronological data. Russian Geology and Geophysics, 2016, 57, 47-68.	0.7	32
20	First paleomagnetic data for the New Siberian Islands: Implications for Arctic paleogeography. Gondwana Research, 2016, 37, 308-323.	6.0	15
21	Arctida between Rodinia and Pangea. Precambrian Research, 2015, 259, 114-129.	2.7	53
22	The first data on the geology of Jeannette Island (De Long Archipelago, New Siberian Islands). Doklady Earth Sciences, 2014, 459, 1504-1509.	0.7	12
23	Rhyolite-granite association in the Central Taimyr zone: evidence of accretionary-collisional events in the Neoproterozoic. Russian Geology and Geophysics, 2014, 55, 18-32.	0.7	21
24	Age of the basement beneath the de long islands (New Siberian Archipelago): New geochronological data. Doklady Earth Sciences, 2014, 457, 803-809.	0.7	15
25	Concerning tectonics and the tectonic evolution of the Arctic. Russian Geology and Geophysics, 2013, 54, 838-858.	0.7	82
26	Magmatism evolution and carbonatite-granite association in the neoproterozoic active continental margin of the Siberian craton: Thermochronological reconstructions. Doklady Earth Sciences, 2013, 448, 161-167.	0.7	15
27	Concerning the issue of paleotectonic reconstructions in the Arctic and of the tectonic unity of the New Siberian Islands Terrane: New paleomagnetic and paleontological data. Doklady Earth Sciences, 2013, 451, 791-797.	0.7	36
28	Neoproterozoic alkaline magmatism and associated igneous rocks in the western framing of the Siberian craton: petrography, geochemistry, and geochronology. Russian Geology and Geophysics, 2012, 53, 1176-1196.	0.7	24
29	A tectonothermal model for the formation of an orogen at the post-collisional stage (by the example) Tj ETQq1 1 0.784314 rsgBT /Overlo	0.7	18
30	Paleozoic and early mesozoic magmatism manifestations in the early Precambrian structure of the South Yenisei Ridge. Doklady Earth Sciences, 2010, 432, 547-552.	0.7	0
31	Middle Paleozoic and Early Mesozoic anorogenic magmatism of the South Yenisei Ridge: first geochemical and geochronological data. Russian Geology and Geophysics, 2010, 51, 548-562.	0.7	11
32	The geodynamic evolution of the folded framing and the western margin of the Siberian craton in the Neoproterozoic: geological, structural, sedimentological, geochronological, and paleomagnetic data. Russian Geology and Geophysics, 2009, 50, 380-393.	0.7	67
33	Thermochronological models for the evolution of A-type leucogranites in the Neoproterozoic collisional orogen of the Yenisei Ridge. Russian Geology and Geophysics, 2009, 50, 438-452.	0.7	9
34	Late Riphean alkaline magmatism in the western margin of the Siberian Craton: A result of continental rifting or accretionary events?. Doklady Earth Sciences, 2008, 419, 226-230.	0.7	40
35	The Yenisei-Khatanga Composite Tectono-Sedimentary Element, Northern Siberia. Geological Society Memoir, 0, , M57-2021-15.	1.7	4
36	Northern West Siberian-South Kara Composite Tectono-Sedimentary Element, Siberian Arctic. Geological Society Memoir, 0, , M57-2021-38.	1.7	1
