citing authors

#	ARTICLE	IF	CITATIONS
1	Three-body force effect on nucleon momentum distributions in asymmetric nuclear matter within the framework of the extended Brueckner-Hartree-Fock approach. <i>Physical Review C</i> , 2013, 87, .	2.9	36
2	Three-body force effect on off-shell mass operator and spectral functions in nuclear matter. <i>Physical Review C</i> , 2013, 87, .	2.9	12
3	Comment on “New Mass Limit for White Dwarfs: Super-Chandrasekhar Type Ia Supernova as a New Standard Candle”, <i>Physical Review Letters</i> , 2014, 112, 039001.	7.8	11
4	Weizsäcker-Skyrme-type nuclear mass formula incorporating two combinatorial radial basis function prescriptions and their application. <i>Physical Review C</i> , 2017, 96, .	2.9	8
5	Coulomb excitation of the deuteron in peripheral collisions with a heavy ion. <i>Physical Review C</i> , 2018, 97, .	2.9	8
6	Exact solution of the Brueckner-Bethe-Goldstone equation with three-body forces in nuclear matter. <i>Physical Review C</i> , 2021, 103, .	2.9	7
7	Taming nucleon density distributions with deep neural network. <i>Physics Letters, Section B: Nuclear, Elementary Particle and High-Energy Physics</i> , 2021, 823, 136650.	4.1	7
8	Effect of tensor correlations on the depletion of nuclear Fermi sea within the extended BHF approach. <i>Chinese Physics C</i> , 2017, 41, 114102.	3.7	5
9	Three-body force effect on neutrino emissivities of neutron stars within the framework of the Brueckner-Hartree-Fock approach. <i>Physical Review C</i> , 2013, 88, .	2.9	4
10	Model-dependence of neutrino emissivities and neutrino luminosities of neutron stars from the direct Urca processes and the modified Urca processes. <i>Nuclear Physics A</i> , 2017, 961, 200-215.	1.5	4
11	Proton spectral functions in finite nuclei based on the extended Brueckner-Hartree-Fock approach. <i>Journal of Physics G: Nuclear and Particle Physics</i> , 2018, 45, 105102.	3.6	0
