#	ARTICLE	IF	CITATIONS
1	Capsule formation around breast implants. JPRAS Open, 2022, 31, 123-128.	0.4	6
2	Self-targeting of zwitterion-based platforms for nano-antimicrobials and nanocarriers. Journal of Materials Chemistry B, 2022, 10, 2316-2322.	2.9	6
3	Using a comprehensive audit to identify local context prior to care bundle design and implementation for inadvertent perioperative hypothermia in colorectal surgery. BMJ Open Quality, 2021, 10, e001132.	0.4	3
4	Comment on: Durability of antimicrobial activity of antibiotic-impregnated external ventricular drains: a prospective study. Journal of Antimicrobial Chemotherapy, 2020, 75, 778-779.	1.3	3
5	Development of dual anti-biofilm and anti-bacterial medical devices. Biomaterials Science, 2020, 8, 3926-3934.	2.6	19
6	Evaluating the Effects of Cerebrospinal Fluid Protein Content on the Performance of Differential Pressure Valves and Antisiphon Devices Using a Novel Benchtop Shunting Model. Neurosurgery, 2020, 87, 1046-1054.	0.6	4
7	Comment on: Durability of antimicrobial activity of antibiotic-impregnated external ventricular drains: a prospective study. Journal of Antimicrobial Chemotherapy, 2020, 75, 1661-1662.	1.3	0
8	An external ventricular drainage catheter impregnated with rifampicin, trimethoprim and triclosan, with extended activity against MDR Gram-negative bacteria: an in vitro and in vivo study. Journal of Antimicrobial Chemotherapy, 2019, 74, 2959-2964.	1.3	11
9	Cerebrospinal Fluid Shunt Infection. , 2019, , 1309-1322.		1
10	Validation and assessment of an antibiotic-based, aseptic decontamination manufacturing protocol for therapeutic, vacuum-dried human amniotic membrane. Scientific Reports, 2019, 9, 12854.	1.6	10
11	Propidium monoazide-“polymerase chain reaction for detection of residual periprosthetic joint infection in two-stage revision. Molecular Biology Reports, 2019, 46, 6463-6470.	1.0	10
12	An antimicrobial impregnated urinary catheter that reduces mineral encrustation and prevents colonisation by multi-drug resistant organisms for up to 12 weeks. Acta Biomaterialia, 2019, 90, 157-168.	4.1	30
13	A tolerability and patient acceptability pilot study of a novel antimicrobial urinary catheter for long-term use. Neurourology and Urodynamics, 2019, 38, 338-345.	0.8	5
14	Comparison of different human tissue processing methods for maximization of bacterial recovery. European Journal of Clinical Microbiology and Infectious Diseases, 2019, 38, 149-155.	1.3	9
15	A Trans-Atlantic Perspective on Stagnation in Clinical Translation of Antimicrobial Strategies for the Control of Biomaterial-Implant-Associated Infection. ACS Biomaterials Science and Engineering, 2019, 5, 402-406.	2.6	29
16	Micro-organisms attached to the lumens and balloons of indwelling urinary catheters and correlation with symptoms, antibiotic use and catheter specimen of urine results. Journal of Medical Microbiology, 2019, 68, 549-554.	0.7	3
17	A web-based survey to identify current practice in skeletal pin site management. International Wound Journal, 2018, 15, 250-257.	1.3	5
18	Prospective, multicentre study of external ventricular drainage-related infections in the UK and Ireland. Journal of Neurology, Neurosurgery and Psychiatry, 2018, 89, 120-126.	0.9	86

#	ARTICLE	IF	CITATIONS
19	Cerebrospinal Fluid Shunt Infection. , 2018, , 1-19.		2
20	Small-colony variant of <i>Staphylococcus lugdunensis</i> in prosthetic joint infection. <i>Arthroplasty Today</i> , 2018, 4, 257-260.	0.8	12
21	Evaluation of combinations of putative anti-biofilm agents and antibiotics to eradicate biofilms of <i>Staphylococcus aureus</i> and <i>Pseudomonas aeruginosa</i> . <i>Journal of Antimicrobial Chemotherapy</i> , 2017, 72, 2531-2538.	1.3	24
22	Surveillance of infection associated with external ventricular drains: proposed methodology and results from a pilot study. <i>Journal of Hospital Infection</i> , 2017, 95, 154-160.	1.4	21
23	Infections in Hydrocephalus Shunts. , 2017, , 221-224.e1.		0
24	7.30 Cerebrospinal Fluid Shunts â†. , 2017, , 612-627.		0
25	Treatment of prosthetic joint infections due to <i>Propionibacterium</i> . <i>Monthly Notices of the Royal Astronomical Society: Letters</i> , 2016, 87, 87-87.	1.2	1
26	Which is the best treatment for prosthetic joint infections due to <i>Propionibacterium acnes</i> : need for further biofilm in vitro and experimental foreign-body in vivo studies?. <i>Monthly Notices of the Royal Astronomical Society: Letters</i> , 2016, 87, 318-319.	1.2	7
27	Does release of antimicrobial agents from impregnated external ventricular drainage catheters affect the diagnosis of ventriculitis?. <i>Journal of Neurosurgery</i> , 2016, 124, 375-381.	0.9	13
28	Biomaterial modification of urinary catheters with antimicrobials to give long-term broadspectrum antibiofilm activity. <i>Journal of Controlled Release</i> , 2015, 202, 57-64.	4.8	130
29	Do orally administered antibiotics reach concentrations in the middle ear sufficient to eradicate planktonic and biofilm bacteria? A review. <i>International Journal of Pediatric Otorhinolaryngology</i> , 2015, 79, 296-300.	0.4	33
30	Preventing infection of osseointegrated transcutaneous implants: Incorporation of silver into preconditioned fibronectin-functionalized hydroxyapatite coatings suppresses <i>Staphylococcus aureus</i> colonization while promoting viable fibroblast growth in vitro. <i>Biointerphases</i> , 2014, 9, 031010.	0.6	15
31	A biodegradable antibiotic-impregnated scaffold to prevent osteomyelitis in a contaminated in vivo bone defect model. , 2014, 27, 332-349.		52
32	National Institute for Clinical Excellence guidelines on the surgical management of otitis media with effusion: Are they being followed and have they changed practice?. <i>International Journal of Pediatric Otorhinolaryngology</i> , 2013, 77, 54-58.	0.4	26
33	Drug delivery to the ear. <i>Therapeutic Delivery</i> , 2013, 4, 115-124.	1.2	31
34	OC-158â€¦Endogenous production of antibiotics by mesenchymal stem cells and the potential value in crohn's fistula healing. <i>Gut</i> , 2012, 61, A68.1-A68.	6.1	0
35	Action of Linezolid or Vancomycin on Biofilms in Ventriculoperitoneal Shunts <i>In Vitro</i> . <i>Antimicrobial Agents and Chemotherapy</i> , 2012, 56, 2842-2845.	1.4	38
36	Bacterial involvement in otitis media with effusion. <i>International Journal of Pediatric Otorhinolaryngology</i> , 2012, 76, 1416-1422.	0.4	59

#	ARTICLE	IF	CITATIONS
37	Ventriculoperitoneal shunt-related infections caused by <i>Staphylococcus epidermidis</i> : pathogenesis and implications for treatment. <i>British Journal of Neurosurgery</i> , 2012, 26, 792-797.	0.4	25
38	Combinatorial discovery of polymers resistant to bacterial attachment. <i>Nature Biotechnology</i> , 2012, 30, 868-875.	9.4	328
39	Cerebrospinal Fluid Shunts. , 2011, , 469-481.		0
40	Antibiotic resistant infections with antibiotic-impregnated Bactiseal catheters for ventriculoperitoneal shunts. <i>British Journal of Neurosurgery</i> , 2011, 25, 780-780.	0.4	2
41	FP2.7 Development of an in-vitro model of <i>Staphylococcus aureus</i> biofilm infection with a focus on reduced susceptibility to antibiotics. <i>Journal of Hospital Infection</i> , 2010, 76, S4-S5.	1.4	2
42	In vitro antimicrobial activity of silver-processed catheters for neurosurgery. <i>Journal of Antimicrobial Chemotherapy</i> , 2010, 65, 258-265.	1.3	45
43	Activity of an Antimicrobial Hydrocephalus Shunt Catheter against <i>Propionibacterium acnes</i> . <i>Antimicrobial Agents and Chemotherapy</i> , 2010, 54, 5082-5085.	1.4	8
44	An antimicrobial modified silicone peritoneal catheter with activity against both Gram positive and Gram negative bacteria. <i>Biomaterials</i> , 2009, 30, 3167-3173.	5.7	69
45	An in vitro investigation of the antimicrobial activity of silver-processed catheters for external ventricular drainage. <i>Cerebrospinal Fluid Research</i> , 2009, 6, .	0.5	3
46	An in vitro study to evaluate the antimicrobial activity of a shunt catheter against <i>Propionibacterium acnes</i> . <i>Cerebrospinal Fluid Research</i> , 2009, 6, .	0.5	0
47	An experimental in-vivo canine model for adult shunt infection. <i>Cerebrospinal Fluid Research</i> , 2008, 5, 17.	0.5	11
48	Folic acid fortification and cancer risk – Authors' reply. <i>Lancet, The</i> , 2008, 371, 1335-1336.	6.3	7
49	Ureteric stents: Investigating flow and encrustation. <i>Proceedings of the Institution of Mechanical Engineers, Part H: Journal of Engineering in Medicine</i> , 2008, 222, 551-561.	1.0	30
50	Triclosan resistance in methicillin-resistant <i>Staphylococcus aureus</i> expressed as small colony variants: a novel mode of evasion of susceptibility to antiseptics – authors' response. <i>Journal of Antimicrobial Chemotherapy</i> , 2007, 60, 176-177.	1.3	2
51	Duration of in vivo Antimicrobial Activity of Antibiotic-impregnated Cerebrospinal Fluid Catheters. <i>Neurosurgery</i> , 2007, 60, E208-E208.	0.6	2
52	Comment on: The increasing use of silver-based products as antimicrobial agents: a useful development or a cause for concern?. <i>Journal of Antimicrobial Chemotherapy</i> , 2007, 60, 447-447.	1.3	11
53	Triclosan resistance in methicillin-resistant <i>Staphylococcus aureus</i> expressed as small colony variants: a novel mode of evasion of susceptibility to antiseptics. <i>Journal of Antimicrobial Chemotherapy</i> , 2007, 59, 848-853.	1.3	44
54	Antibiotics for the eradication of <i>Propionibacterium acnes</i> biofilms in surgical infection. <i>Journal of Antimicrobial Chemotherapy</i> , 2007, 60, 1298-1301.	1.3	72

#	ARTICLE	IF	CITATIONS
55	Bactiseal: A system to prevent catheter infections in shunts and external ventricular drains. British Journal of Neuroscience Nursing, 2007, 3, 526-531.	0.1	0
56	Folic acid fortification and cancer risk. Lancet, The, 2007, 370, 2004.	6.3	22
57	Biofilm formation by Propionibacterium acnes on biomaterials in vitro and in vivo: Impact on diagnosis and treatment. Journal of Biomedical Materials Research - Part A, 2007, 81A, 705-709.	2.1	100
58	Prevention of infection in neurosurgery: role of antimicrobial catheters. Journal of Hospital Infection, 2007, 65, 39-42.	1.4	21
59	Analysis of twenty-four "failures" of Bactiseal antimicrobial shunts reported to FDA. Cerebrospinal Fluid Research, 2006, 3, 1.	0.5	3
60	P12.14 Evaluation of the Antimicrobial Activity of Silver-Impregnated Ventricular Catheters. Journal of Hospital Infection, 2006, 64, S63-S64.	1.4	2
61	Coagulase-negative methicillin-resistant Staphylococcus aureus. Journal of Hospital Infection, 2006, 62, 127.	1.4	4
62	Persistent and intractable ventriculitis due to retained ventricular catheters. British Journal of Neurosurgery, 2005, 19, 496-501.	0.4	29
63	Hydromer-coated catheters to prevent shunt infection?. Journal of Neurosurgery, 2005, 102, 207-212.	0.9	16
64	Mode of action of an antimicrobial biomaterial for use in hydrocephalus shunts. Journal of Antimicrobial Chemotherapy, 2004, 53, 778-782.	1.3	77
65	Is otitis media with effusion a biofilm infection?. Clinical Otolaryngology, 2004, 29, 38-46.	0.0	68
66	Silver nanoparticles and polymeric medical devices: a new approach to prevention of infection?. Journal of Antimicrobial Chemotherapy, 2004, 54, 1019-1024.	1.3	655
67	Spine Update. Spine, 2004, 29, 938-945.	1.0	97
68	Stimulation of Staphylococcus epidermidis growth and biofilm formation by catecholamine inotropes. Lancet, The, 2003, 361, 130-135.	6.3	179
69	Electromagnetic augmentation of antibiotic efficacy in infection of orthopaedic implants. Journal of Bone and Joint Surgery: British Volume, 2003, 85-B, 588-593.	3.4	60
70	Use of Elemental Iodine for Shunt Infection Prophylaxis. Neurosurgery, 2003, 52, 908-913.	0.6	16
71	Distinguishing between Chemical and Bacterial Meningitis in Patients Who Have Undergone Neurosurgery. Clinical Infectious Diseases, 2002, 34, 556-557.	2.9	11
72	Epidemiology, Diagnosis, Treatment, and Prevention of Cerebrospinal Fluid Shunt Infections. Neurosurgery Clinics of North America, 2001, 12, 703-708.	0.8	31
