#	ARTICLE	IF	CITATIONS
1	Too little sleep and an unhealthy diet could increase the risk of sustaining a new injury in adolescent elite athletes. <i>Scandinavian Journal of Medicine and Science in Sports</i> , 2017, 27, 1364-1371.	1.3	100
2	Multiple factors explain injury risk in adolescent elite athletes: Applying a biopsychosocial perspective. <i>Scandinavian Journal of Medicine and Science in Sports</i> , 2017, 27, 2059-2069.	1.3	81
3	Young, talented and injured: Injury perceptions, experiences and consequences in adolescent elite athletes. <i>European Journal of Sport Science</i> , 2018, 18, 731-740.	1.4	49
4	Association between physical activity and all-cause mortality: A 15-year follow-up using a compositional data analysis. <i>Scandinavian Journal of Medicine and Science in Sports</i> , 2020, 30, 100-107.	1.3	28
5	Physical activity profiles in Parkinson's disease. <i>BMC Neurology</i> , 2021, 21, 71.	0.8	16
6	Correlates of health in adolescent elite athletes and adolescents: A cross-sectional study of 1016 adolescents. <i>European Journal of Sport Science</i> , 2019, 19, 707-716.	1.4	14
7	Latent profile analysis of physical activity and sedentary behavior with mortality risk: A 15-year follow-up. <i>Scandinavian Journal of Medicine and Science in Sports</i> , 2020, 30, 1949-1956.	1.3	14
8	Subjective well-being is associated with injury risk in adolescent elite athletes. <i>Physiotherapy Theory and Practice</i> , 2021, 37, 748-754.	0.6	9
9	Substantial injuries influence ranking position in young elite athletes of athletics, cross-country skiing and orienteering. <i>Scandinavian Journal of Medicine and Science in Sports</i> , 2018, 28, 1435-1442.	1.3	6
10	Can movement tests predict injury in elite orienteers? An 1-year prospective cohort study. <i>Physiotherapy Theory and Practice</i> , 2020, 36, 956-964.	0.6	4
11	Handball and movement screening – can non-contact injuries be predicted in adolescent elite handball players? A 1-year prospective cohort study. <i>Physiotherapy Theory and Practice</i> , 2021, 37, 1132-1138.	0.6	3
12	Could a specific exercise programme prevent injury in elite orienteers? A randomised controlled trial. <i>Physical Therapy in Sport</i> , 2019, 40, 177-183.	0.8	3
13	Could specific exercises based on a movement screen prevent injuries in adolescent elite athletes?. <i>Physical Therapy in Sport</i> , 2019, 36, 28-33.	0.8	3
14	How should we categorise self-reported data on subsequent injuries?. <i>European Journal of Sport Science</i> , 2017, 17, 621-628.	1.4	1
15	Previous and current injury and not training and competition factors were associated with future injury prevalence across a season in adolescent elite athletes. <i>Physiotherapy Theory and Practice</i> , 2022, 38, 448-455.	0.6	1
16	Physical Activity Patterns among Individuals with Prediabetes or Type 2 Diabetes across Two Years – A Longitudinal Latent Class Analysis. <i>International Journal of Environmental Research and Public Health</i> , 2022, 19, 3667.	1.2	1
