

Nate Kornell

List of Publications by Citations

Source: <https://exaly.com/author-pdf/6412496/nate-kornell-publications-by-citations.pdf>

Version: 2024-04-27

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

61
papers

4,463

#	Paper	IF	Citations
61	Self-regulated learning: beliefs, techniques, and illusions. <i>Annual Review of Psychology</i> , 2013 , 64, 417-44	26.1	629
60	Transfer of metacognitive skills and hint seeking in monkeys. <i>Psychological Science</i> , 2007 , 18, 64-71	7.9	314
59	Learning concepts and categories: is spacing the "enemy of induction"?. <i>Psychological Science</i> , 2008 , 19, 585-92	7.9	309
58	The promise and perils of self-regulated study. <i>Psychonomic Bulletin and Review</i> , 2007 , 14, 219-24	4.1	273
57	Unsuccessful retrieval attempts enhance subsequent learning. <i>Journal of Experimental Psychology: Learning Memory and Cognition</i> , 2009 , 35, 989-98	2.2	218
56	A Region of Proximal Learning model of study time allocation. <i>Journal of Memory and Language</i> , 2005 , 52, 463-477	3.8	189
55	Why tests appear to prevent forgetting: A distribution-based bifurcation model. <i>Journal of Memory and Language</i> , 2011 , 65, 85-97	3.8	153
54	Optimising learning using flashcards: Spacing is more effective than cramming. <i>Applied Cognitive Psychology</i> , 2009 , 23, 1297-1317	2.1	145
53	Study efficacy and the region of proximal learning framework. <i>Journal of Experimental Psychology: Learning Memory and Cognition</i> , 2006 , 32, 609-22	2.2	142
52	The pretesting effect: do unsuccessful retrieval attempts enhance learning?. <i>Journal of Experimental Psychology: Applied</i> , 2009 , 15, 243-57	1.8	133
51	The dynamics of learning and allocation of study time to a region of proximal learning. <i>Journal of Experimental Psychology: General</i> , 2003 , 132, 530-42	4.7	130
50	The ease-of-processing heuristic and the stability bias: dissociating memory, memory beliefs, and memory judgments. <i>Psychological Science</i> , 2011 , 22, 787-94	7.9	127
49	The spacing effect in children's memory and category induction. <i>Cognition</i> , 2008 , 109, 163-7	3.5	120
48	Learners' choices and beliefs about self-testing. <i>Memory</i> , 2009 , 17, 493-501	1.8	118
47	Why interleaving enhances inductive learning: the roles of discrimination and retrieval. <i>Memory and Cognition</i> , 2013 , 41, 392-402	2.2	117
46	A stability bias in human memory: overestimating remembering and underestimating learning. <i>Journal of Experimental Psychology: General</i> , 2009 , 138, 449-68	4.7	107
45	Spacing as the friend of both memory and induction in young and older adults. <i>Psychology and Aging</i> , 2010 , 25, 498-503	3.6	99

44	Optimising self-regulated study: the benefits - and costs - of dropping flashcards. <i>Memory</i> , 2008 , 16, 125-36	1.8	96
43	Principles of cognitive science in education: the effects of generation, errors, and feedback. <i>Psychonomic Bulletin and Review</i> , 2007 , 14, 225-9	4.1	95
42	Delayed versus immediate feedback in children's and adults' vocabulary learning. <i>Memory and Cognition</i> , 2009 , 37, 1077-87	2.2	81
41	Where is the "meta" in animal metacognition?. <i>Journal of Comparative Psychology (Washington, D C: 1983)</i> , 2014 , 128, 143-9	2.1	74
40	Young children bet on their numerical skills: metacognition in the numerical domain. <i>Psychological Science</i> , 2014 , 25, 1712-21	7.9	62
39	Appearances can be deceiving: instructor fluency increases perceptions of learning without increasing actual learning. <i>Psychonomic Bulletin and Review</i> , 2013 , 20, 1350-6	4.1	61
38	When and why a failed test potentiates the effectiveness of subsequent study. <i>Journal of Experimental Psychology: Learning Memory and Cognition</i> , 2013 , 39, 290-6	2.2	56
37	Expecting to teach enhances learning and organization of knowledge in free recall of text passages. <i>Memory and Cognition</i> , 2014 , 42, 1038-48	2.2	49
36	Retrieval attempts enhance learning, but retrieval success (versus failure) does not matter. <i>Journal of Experimental Psychology: Learning Memory and Cognition</i> , 2015 , 41, 283-294	2.2	46
35	Attempting to answer a meaningful question enhances subsequent learning even when feedback is delayed. <i>Journal of Experimental Psychology: Learning Memory and Cognition</i> , 2014 , 40, 106-14	2.2	45
34	A cognitive-science based programme to enhance study efficacy in a high and low risk setting. <i>European Journal of Cognitive Psychology</i> , 2007 , 19, 743-768		42
33	How Retrieval Attempts Affect Learning. <i>Psychology of Learning and Motivation - Advances in Research and Theory</i> , 2016 , 65, 183-215	1.4	39
32	Metacognition in Humans and Animals. <i>Current Directions in Psychological Science</i> , 2009 , 18, 11-15	6.5	37
31	The costs and benefits of providing feedback during learning. <i>Psychonomic Bulletin and Review</i> , 2010 , 17, 797-801	4.1	36
30	Retrospective and prospective metacognitive judgments in rhesus macaques (<i>Macaca mulatta</i>). <i>Animal Cognition</i> , 2014 , 17, 249-57	3.1	26
29	Metaconfidence Judgments in Rhesus Macaques: Explicit Versus Implicit Mechanisms 2005 , 296-320		26
28	Benefits of Accumulating Versus Diminishing Cues in Recall. <i>Journal of Memory and Language</i> , 2011 , 64, 289-298	3.8	23
27	Do the Best Teachers Get the Best Ratings?. <i>Frontiers in Psychology</i> , 2016 , 7, 570	3.4	22

26	Highlighting and Its Relation to Distributed Study and Students' Metacognitive Beliefs. <i>Educational Psychology Review</i> , 2015 , 27, 69-78	7.1	21
25	Feedback reduces the metacognitive benefit of tests. <i>Journal of Experimental Psychology: Applied</i> , 2013 , 19, 1-13	1.8	21
24	Tests enhance learning? Compared to what?. <i>Journal of Applied Research in Memory and Cognition</i> , 2012 , 1, 257-259	2.3	20
23	Mixing topics while studying does not enhance learning. <i>Journal of Applied Research in Memory and Cognition</i> , 2014 , 3, 153-160	2.3	19
22	Simultaneous decisions at study: time allocation, ordering, and spacing. <i>Metacognition and Learning</i> , 2009 , 4, 237-248	2.7	19
21	The generation effect in monkeys. <i>Psychological Science</i> , 2007 , 18, 682-5	7.9	16
20	A metacognitive illusion in monkeys. <i>Proceedings of the Royal Society B: Biological Sciences</i> , 2017 , 284,	4.4	15
19	Blockers do not block recall during tip-of-the-tongue states. <i>Metacognition and Learning</i> , 2007 , 1, 248-261	7.7	15
18	Performance bias: Why judgments of learning are not affected by learning. <i>Memory and Cognition</i> , 2017 , 45, 1270-1280	2.2	12
17	The virtues of ignorance. <i>Behavioural Processes</i> , 2010 , 83, 207-12	1.6	11
16	Retrieval attempts enhance learning regardless of time spent trying to retrieve. <i>Memory</i> , 2017 , 25, 298-316	3.6	9
15	The influence of feedback on predictions of future memory performance. <i>Memory and Cognition</i> , 2016 , 44, 1102-13	2.2	8
14	Audiovisual quality impacts assessments of job candidates in video interviews: Evidence for an AV quality bias. <i>Cognitive Research: Principles and Implications</i> , 2018 , 3, 47	2.7	6
13	Identification Performance from Multiple Lineups: Should Eyewitnesses Who Pick Fillers Be Burned?. <i>Journal of Applied Research in Memory and Cognition</i> , 2019 , 8, 221-232	2.3	4
12	How to activate students' natural desire to test themselves. <i>Cognitive Research: Principles and Implications</i> , 2019 , 4, 35	2.7	4
11	Why and how you should read student evaluations of teaching. <i>Journal of Applied Research in Memory and Cognition</i> , 2020 , 9, 165-169	2.3	3
10	In inductive category learning, people simultaneously block and space their studying using a strategy of being thorough and fair.. <i>Archives of Scientific Psychology</i> , 2018 , 6, 138-147	4.3	3
9	Self-Regulated Learning 2016 ,		3

8	If it is stored in my memory I will surely retrieve it: anatomy of a metacognitive belief. <i>Metacognition and Learning</i> , 2015 , 10, 279-292	2.7	2
7	Where to draw the line on metacognition: A taxonomy of metacognitive cues.. <i>Journal of Comparative Psychology (Washington, D C: 1983)</i> , 2014 , 128, 160-162	2.1	2
6	Is focusing on unknown items while studying a beneficial long-term strategy?. <i>Journal of Cognitive Psychology</i> , 2014 , 26, 928-942	0.9	2
5	Phrasing questions in terms of current (not future) knowledge increases preferences for cue-only judgments of learning.. <i>Archives of Scientific Psychology</i> , 2013 , 1, 7-13	4.3	1
4	How the wisdom of crowds, and of the crowd within, are affected by expertise. <i>Cognitive Research: Principles and Implications</i> , 2021 , 6, 5	2.7	0
3	What monkeys can tell us about metacognition and mindreading. <i>Behavioral and Brain Sciences</i> , 2009 , 32, 150-151	0.9	
2	Implicit metacognition, explicit uncertainty, and the monitoring/control distinction in animal metacognition. <i>Behavioral and Brain Sciences</i> , 2003 , 26, 355-356	0.9	
1	Answering a factual question today increases one's confidence in the same answer tomorrow - independent of fluency. <i>Psychonomic Bulletin and Review</i> , 2021 , 28, 962-968	4.1
