Elzbieta Smolewska

List of Publications by Year in Descending Order

38 papers	464 citations	9 h-index	21 g-index
47 ext. papers	577 ext. citations	3 avg, IF	3.43 L-index

#	Paper	IF	Citations
38	Functional Ability and Health-Related Quality of Life in Randomized Controlled Trials of Tocilizumab in Patients With Juvenile Idiopathic Arthritis. *Arthritis Care and Research*, **2021**, 73, 1264-1274	4.7	0
37	The effect of vitamin D3 and thyroid hormones on the capillaroscopy-confirmed microangiopathy in pediatric patients with a suspicion of systemic connective tissue disease-a single-center experience with Raynaud phenomenon. *Rheumatology International*, **2021**, 41, 1485-1493	3.6	
36	The Potential Importance of MicroRNAs as Novel Indicators How to Manage Patients with Juvenile Idiopathic Arthritis More Effectively. *Journal of Immunology Research*, **2021**, 2021, 9473508	4.5	1
35	Concentration of survivin in children with oligo- and polyarticular juvenile idiopathic arthritis (JIA): diagnostic and prognostic value-a single-center study. *Arthritis Research and Therapy*, **2021**, 23, 40	5.7	1
34	How Does Endothelial Permeability Affect the Development of Juvenile Idiopathic Arthritis? Vascular Endothelial Cadherin as a Promising New Tool Helpful in the Diagnostic Process. *Disease Markers*, **2020**, 2020, 8899061	3.2	
33	Prefilled pen versus prefilled syringe: a pilot study evaluating two different methods of methotrexate subcutaneous injection in patients with JIA. *Pediatric Rheumatology*, **2020**, 18, 64	3.5	1
32	The impact of single nucleotide polymorphisms in ADORA2A and ADORA3 genes on the early response to methotrexate and presence of therapy side effects in children with juvenile idiopathic arthritis: Results of a preliminary study. *International Journal of Rheumatic Diseases*, **2020**, 23, 1505-1513	2.3	4
31	A complicated path to the CRMO diagnosis - case of a 9 year old girl whose story comes full circle. *BMC Musculoskeletal Disorders*, **2019**, 20, 392	2.8	
30	Retrospective study of the course, treatment and long-term follow-up of Kawasaki disease: a single-center experience from Poland. *Rheumatology International*, **2019**, 39, 1069-1076	3.6	4
29	Long-term, interventional, open-label extension study evaluating the safety of tocilizumab treatment in patients with polyarticular-course juvenile idiopathic arthritis from Poland and Russia who completed the global, international CHERISH trial. *Clinical Rheumatology*, **2018**, 37, 1807-1816	3.9	5
28	From fibrosis to diagnosis: a paediatric case of microscopic polyangiitis and review of the literature. *Rheumatology International*, **2018**, 38, 683-687	3.6	1
27	The Polish version of the Juvenile Arthritis Multidimensional Assessment Report (JAMAR). *Rheumatology International*, **2018**, 38, 315-321	3.6	
26	Subcutaneous golimumab for children with active polyarticular-course juvenile idiopathic arthritis: results of a multicentre, double-blind, randomised-withdrawal trial. *Annals of the Rheumatic Diseases*, **2018**, 77, 21-29	2.4	64
25	Are We Right to Consider Mesenchymal Stem Cells to Be a New Perspective for Patients with Juvenile Idiopathic Arthritis?. *Archivum Immunologiae Et Therapiae Experimentalis*, **2018**, 66, 267-271	4	
24	Is it possible to predict a risk of osteoporosis in patients with juvenile idiopathic arthritis? A study of serum levels of bone turnover markers. *Acta Biochimica Polonica*, **2018**, 65, 297-302	2	2
23	Tocilizumab in the treatment of systemic-onset juvenile idiopathic arthritis - single-centre experience. *Reumatologia*, **2018**, 56, 279-284	1.7	6
22	A fresh look at angiogenesis in juvenile idiopathic arthritis. *Central-European Journal of Immunology* , **2018**, 43, 325-330	1.6	9

21	A Granulocyte-Specific Protein S100A12 as a Potential Prognostic Factor Affecting Aggressiveness of Therapy in Patients with Juvenile Idiopathic Arthritis. *Journal of Immunology Research*, **2018**, 2018, 5349837	4.5	4
20	Comparison of uveitis in the course of juvenile idiopathic arthritis with isolated uveitis in children - own experiences. *Reumatologia*, **2018**, 56, 149-154	1.7	1
19	In the Pursuit of Methotrexate Treatment Response Biomarker in Juvenile Idiopathic Arthritis-Are We Getting Closer to Personalised Medicine?. *Current Rheumatology Reports*, **2017**, 19, 19	4.9	9
18	Pharmacokinetic and safety profile of tofacitinib in children with polyarticular course juvenile idiopathic arthritis: results of a phase 1, open-label, multicenter study. *Pediatric Rheumatology*, **2017**, 15, 86	3.5	41
17	When a patient suspected with juvenile idiopathic arthritis turns out to be diagnosed with an infectious disease - a review of Lyme arthritis in children. *Pediatric Rheumatology*, **2017**, 15, 35	3.5	4
16	Kaleidoscope of autoimmune diseases in HIV infection. *Rheumatology International*, **2016**, 36, 1481-1491	3.6	25
15	Macrophages - silent enemies in juvenile idiopathic arthritis. *Postepy Higieny I Medycyny Doswiadczalnej*, **2016**, 70, 743-50	0.3	6
14	The paediatric rheumatologist and orphan disease - a story without happy ending. *Reumatologia*, **2016**, 54, 141-5	1.7	
13	Nailfold capillaroscopy assessment of microcirculation abnormalities and endothelial dysfunction in children with primary or secondary Raynaud syndrome. *Clinical Rheumatology*, **2016**, 35, 1993-2001	3.9	7
12	Anti-MCV and anti-CCP antibodies-diagnostic and prognostic value in children with juvenile idiopathic arthritis (JIA). *Clinical Rheumatology*, **2016**, 35, 2699-2706	3.9	10
11	Efficacy and safety of tocilizumab in patients with polyarticular-course juvenile idiopathic arthritis: results from a phase 3, randomised, double-blind withdrawal trial. *Annals of the Rheumatic Diseases*, **2015**, 74, 1110-7	2.4	195
10	Influence of biologic therapy on growth in children with chronic inflammatory connective tissue diseases. *Reumatologia*, **2015**, 53, 14-20	1.7	2
9	Serum Angiogenesis Markers and Their Correlation with Ultrasound-Detected Synovitis in Juvenile Idiopathic Arthritis. *Journal of Immunology Research*, **2015**, 2015, 741457	4.5	9
8	Imbalance of Th17 and T-regulatory cells in peripheral blood and synovial fluid in treatment naïve children with juvenile idiopathic arthritis. *Central-European Journal of Immunology*, **2014**, 39, 71-6	1.6	8
7	Recurrent arterial and venous thrombosis in a 16-year-old boy in the course of primary antiphospholipid syndrome despite treatment with low-molecular-weight heparin: a case report. *Journal of Medical Case Reports*, **2013**, 7, 221	1.2	6
6	Vitamin D level in children with juvenile idiopathic arthritis and its correlation with clinical picture of the disease. *Reumatologia*, **2013**, 4, 271-276	1.7	4
5	Takayasu's arteritis mimicking Kawasaki disease in 7-month-old infant, successfully treated with glucocorticosteroids and intravenous immunoglobulins. *Rheumatology International*, **2012**, 32, 3655-9	3.6	6
4	Anticitrullinated protein antibodies and radiological progression in juvenile idiopathic arthritis. *Journal of Rheumatology*, **2012**, 39, 1078-87	4.1	9

3	Choroba Kawasakiego u 11 dzieci – charakterystyka przebiegu klinicznego i reakcji na leczenie oraz wyniki długofalowej obserwacji pacjentów. *Pediatria Polska*, **2011**, 86, 133-139	0.1	
2	Relationship between impaired apoptosis of lymphocytes and distribution of dendritic cells in peripheral blood and synovial fluid of children with juvenile idiopathic arthritis. *Archivum Immunologiae Et Therapiae Experimentalis*, **2008**, 56, 283-9	4	5
1	Inhibited apoptosis of synovial fluid lymphocytes in children with juvenile idiopathic arthritis is associated with increased expression of myeloid cell leukemia 1 and XIAP proteins. *Journal of Rheumatology*, **2006**, 33, 1684-90	4.1	12
