Mislav Vrsalovic

List of Publications by Year in descending order

Source: https://exaly.com/author-pdf/6430517/publications.pdf Version: 2024-02-01

#	Article	IF	CITATIONS
1	Prognostic effect of cardiac troponin elevation in acute aortic dissection: A meta-analysis. International Journal of Cardiology, 2016, 214, 277-278.	1.7	48
2	Impact of diabetes on mortality in peripheral artery disease: a metaâ€analysis. Clinical Cardiology, 2017, 40, 287-291.	1.8	47
3	Cardiac troponins predict mortality in patients with COVID-19: A meta-analysis of adjusted risk estimates. Journal of Infection, 2020, 81, e99-e100.	3.3	32
4	Atrial fibrillation and risk of cardiovascular events and mortality in patients with symptomatic peripheral artery disease: A metaâ€analysis of prospective studies. Clinical Cardiology, 2017, 40, 1231-1235.	1.8	27
5	Impact of admission anemia, C-reactive protein and mean platelet volume on short term mortality in patients with acute ST-elevation myocardial infarction treated with primary angioplasty. Clinical Biochemistry, 2012, 45, 1506-1509.	1.9	25
6	Admission C-reactive protein and outcomes in acute aortic dissection: a systematic review. Croatian Medical Journal, 2019, 60, 309-315.	0.7	25
7	C-reactive protein, renal function, and cardiovascular outcome in patients with symptomatic peripheral artery disease and preserved left ventricular systolic function. Croatian Medical Journal, 2015, 56, 351-356.	0.7	23
8	C-reactive protein, not cardiac troponin T, improves risk prediction in hypertensives with type A aortic dissection. Blood Pressure, 2015, 24, 212-216.	1.5	21
9	Nâ€ŧerminal proâ€brain natriuretic peptide and shortâ€ŧerm mortality in acute aortic dissection: A metaâ€analysis. Clinical Cardiology, 2020, 43, 1255-1259.	1.8	12
10	Antithrombotic Therapy in Lower Extremity Artery Disease. Current Vascular Pharmacology, 2020, 18, 215-222.	1.7	8
11	Cardiac troponins predict mortality and cardiovascular outcomes in patients with peripheral artery disease: A systematic review and metaâ€analysis of adjusted observational studies. Clinical Cardiology, 2022, 45, 198-204.	1.8	8
12	DIABETES AND CRITICAL LIMB ISCHEMIA: THE DEADLY DUO IN PATIENTS WITH SYMPTOMATIC PERIPHERAL ARTERY DISEASE. Acta Clinica Croatica, 2016, 55, 240-245.	0.2	7
13	Atrial Fibrillation Predicts Cardiovascular Outcome in Hypertensive Patients With Symptomatic Peripheral Artery Disease and Preserved Ejection Fraction. Journal of Clinical Hypertension, 2016, 18, 953-954.	2.0	7
14	Diabetes and peripheral artery disease: A bad combination. American Journal of Surgery, 2018, 216, 182-183.	1.8	6
15	The year 2018 in cardiology: aorta and peripheral circulation. European Heart Journal, 2019, 40, 872-879.	2.2	6
16	ACEF performed better than other risk scores in non-ST-elevation acute coronary syndrome during long term follow-up. BMC Cardiovascular Disorders, 2021, 21, 70.	1.7	6
17	Arterial stiffness: A helpful guide to prognosis and therapy in populations with a high baseline cardiovascular risk. Journal of Clinical Hypertension, 2018, 20, 1294-1295.	2.0	4
18	Acute aortic dissection associated troponin leak. American Journal of Emergency Medicine, 2017, 35, 655-656.	1.6	3

MISLAV VRSALOVIC

#	Article	IF	CITATIONS
19	Diabetes, renal dysfunction, inflammation, and anemia: the deadly quartet in peripheral artery disease. Endocrine Oncology and Metabolism, 2016, 2, 82-87.	0.0	3
20	The influence of air pollutants on appearance of acute myocardial infarction in the region with humid continental climate. American Journal of Emergency Medicine, 2016, 34, 1679-1682.	1.6	2
21	Sex Differences in Characteristics and Outcomes among Low-Risk Non-ST-Elevation Acute Coronary Syndrome Patients during Long Term Follow-Up. Journal of Clinical Medicine, 2021, 10, 2802.	2.4	2
22	Blood pressure goals in hypertensive patients with peripheral arterial disease. European Heart Journal Quality of Care & Clinical Outcomes, 2019, 5, 183-183.	4.0	1
23	Admission Cardiac Troponins Predict Hospital Mortality in Type a Acute Aortic Dissection: a Meta-Analysis of Adjusted Risk Estimates. Acta Clinica Croatica, 2021, 60, 115-119.	0.2	1
24	The Role of Anthropometric Parameters and Physical Activity Level in Patients with Acute Coronary Syndrome Admitted to the Intensive Cardiac Care Unit. Acta Clinica Croatica, 2021, 60, 201-208.	0.2	1
25	Lipomatous Hypertrophy of the Interatrial Septum: A 3-Dimensional Transesophageal Echocardiography Appearance. Journal of Cardiovascular Imaging, 2015, 23, 274.	0.8	0
26	Re: "Systematic Review and Meta-analysis of the Association between C-reactive Protein and Major Cardiovascular Events in Patients with Peripheral Artery Disease: Do Not Ignore Patients with Critical Limb Ischaemia― European Journal of Vascular and Endovascular Surgery, 2017, 54, 661.	1.5	0
27	Cardiac injury and mortality in COVID-19: A reappraisal. Journal of Infection, 2020, 81, e35-e36.	3.3	0
28	First Croatian Prospective Peripheral Artery Disease Registry (CRO-PAD): What have we learned in the past 10 years?. Cardiologia Croatica, 2021, 16, 75-75.	0.0	0
29	Rare coronary artery reactions after implantation of drug eluting stents. Cardiologia Croatica, 2016, 11, 110-110.	0.0	0
30	Percutaneous coronary intervention on bifurcation lesion through aberant right subclavian artery (a. lusoria). Cardiologia Croatica, 2016, 11, 469-470.	0.0	0
31	Diabetes – a risk factor and a prognosticator in peripheral vascular disease. Cardiologia Croatica, 2016, 11, 523-523.	0.0	0
32	Safety and efficiency of the transradial approach in the periferal vascular interventions. Cardiologia Croatica, 2016, 11, 517-517.	0.0	0
33	Evaluation of heart structure and function in prehypertensive and hypertensive individuals. Cardiologia Croatica, 2017, 12, 80-80.	0.0	0
