#	ARTICLE	IF	CITATIONS
1	On the Redox-Activity and Health-Effects of Atmospheric Primary and Secondary Aerosol: Phenomenology. <i>Atmosphere</i> , 2022, 13, 704.	2.3	7
2	Flux-Profile Relationships in the Stable Boundary Layer—A Critical Discussion. <i>Atmosphere</i> , 2021, 12, 1197.	2.3	1
3	Sensitivity of near-surface meteorology to PBL schemes in WRF simulations in a port-industrial area with complex terrain. <i>Atmospheric Research</i> , 2021, 264, 105824.	4.1	15
4	Turbulence, Low-Level Jets, and Waves in the Tyrrhenian Coastal Zone as Shown by Sodar. <i>Atmosphere</i> , 2020, 11, 28.	2.3	8
5	A Businger Mechanism for Intermittent Bursting in the Stable Boundary Layer. <i>Journals of the Atmospheric Sciences</i> , 2020, 77, 3343-3360.	1.7	14
6	Surface and Aerodynamic Parameters Estimation for Urban and Rural Areas. <i>Atmosphere</i> , 2020, 11, 147.	2.3	5
7	Large-Eddy Simulations of the Steady Wintertime Antarctic Boundary Layer. <i>Boundary-Layer Meteorology</i> , 2019, 173, 165-192.	2.3	17
8	Interconnections of the urban heat island with the spatial and temporal micrometeorological variability in Rome. <i>Urban Climate</i> , 2019, 29, 100493.	5.7	24
9	Stable Surface-Based Turbulent Layer During the Polar Winter at Dome C, Antarctica: Sodar and In Situ Observations. <i>Boundary-Layer Meteorology</i> , 2019, 171, 101-128.	2.3	41
10	Sodar Observation of the ABL Structure and Waves over the Black Sea Offshore Site. <i>Atmosphere</i> , 2019, 10, 811.	2.3	8
11	Consumer Drones Targeting by Sodar (Acoustic Radar). <i>IEEE Geoscience and Remote Sensing Letters</i> , 2018, 15, 1692-1694.	3.1	3
12	First Results of the “Carbonaceous Aerosol in Rome and Environs (CARE) Experiment: Beyond Current Standards for PM10. <i>Atmosphere</i> , 2017, 8, 249.	2.3	54
13	Wavelike Structures in the Turbulent Layer During the Morning Development of Convection at Dome C, Antarctica. <i>Boundary-Layer Meteorology</i> , 2016, 161, 289-307.	2.3	15
14	Some aspects of the local atmospheric circulation in the Castelporziano Estate derived from sodar wind measurements. <i>Rendiconti Lincei</i> , 2015, 26, 275-282.	2.2	1
15	Observations of near surface wind speed, temperature and radiative budget at Dome C, Antarctic Plateau during 2005. <i>Antarctic Science</i> , 2014, 26, 104-112.	0.9	16
16	Some Statistics of the Temperature Structure Parameter in the Convective Boundary Layer Observed by Sodar. <i>Boundary-Layer Meteorology</i> , 2014, 150, 215-233.	2.3	9
17	One Year of Surface-Based Temperature Inversions at Dome C, Antarctica. <i>Boundary-Layer Meteorology</i> , 2014, 150, 131-151.	2.3	41
18	Observed and Modelled Convective Mixing-Layer Height at Dome C, Antarctica. <i>Boundary-Layer Meteorology</i> , 2014, 151, 597-608.	2.3	31

#	ARTICLE	IF	CITATIONS
19	The surface layer observed by a high-resolution sodar at DOME C, Antarctica. <i>Annals of Geophysics</i> , 2014, 56, .	1.0	12
20	Use of a High-Resolution Sodar to Study Surface-layer Turbulence at Night. <i>Boundary-Layer Meteorology</i> , 2012, 143, 177-188.	2.3	15
21	Wavy Vertical Motions in the ABL Observed by Sodar. <i>Boundary-Layer Meteorology</i> , 2012, 143, 125-141.	2.3	14
22	Measurements and Parametrizations of the Atmospheric Boundary-Layer Height at Dome C, Antarctica. <i>Boundary-Layer Meteorology</i> , 2012, 143, 189-206.	2.3	30
23	Local Circulation Diurnal Patterns and Their Relationship with Large-Scale Flows in a Coastal Area of the Tyrrhenian Sea. <i>Boundary-Layer Meteorology</i> , 2011, 139, 353-366.	2.3	26
24	Spectral characteristics of East Antarctica meteorological parameters during 1994. <i>Journal of Geophysical Research</i> , 2001, 106, 12463-12476.	3.3	19
