#	ARTICLE	IF	CITATIONS
1	Mild X-linked Alport syndrome due to the COL4A5 G624D variant originating in the Middle Ages is predominant in Central/East Europe and causes kidney failure in midlife. <i>Kidney International</i> , 2021, 99, 1451-1458.	5.2	21
2	Urinary procollagen III aminoterminal propeptide and β -catenin – New diagnostic biomarkers in solitary functioning kidney?. <i>Advances in Medical Sciences</i> , 2019, 64, 189-194.	2.1	3
3	Multicenter analysis of the efficacy and safety of a non-standard immunosuppressive therapy with rituximab in children with steroid-resistant nephrotic syndrome. <i>Clinical and Experimental Pharmacology and Physiology</i> , 2019, 46, 313-321.	1.9	11
4	eGFR values and selected renal urine biomarkers in preterm neonates with uncomplicated clinical course. <i>Advances in Clinical and Experimental Medicine</i> , 2019, 28, 1657-1666.	1.4	4
5	Assessment of growth retardation in children on renal replacement therapy from 2000 to 2016 – one center experience. <i>Annales Academiae Medicae Silesiensis</i> , 2017, 71, 122-128.	0.1	0
6	Modification of the Schwartz equations for children increases their accuracy at eGFR > 60 mL/min/1.73 m ² . <i>Renal Failure</i> , 2016, 38, 787-798.	2.1	3
7	Characterization of 28 novel patients expands the mutational and phenotypic spectrum of Lowe syndrome. <i>Pediatric Nephrology</i> , 2015, 30, 931-943.	1.7	35
8	Retrospective cohort study of familial hypomagnesaemia with hypercalciuria and nephrocalcinosis due to CLDN16 mutations. <i>Nephrology Dialysis Transplantation</i> , 2015, 30, 636-644.	0.7	24
9	Which equations should and which should not be employed in calculating eGFR in children?. <i>Advances in Medical Sciences</i> , 2015, 60, 31-40.	2.1	18
10	Genotype-phenotype associations in WT1 glomerulopathy. <i>Kidney International</i> , 2014, 85, 1169-1178.	5.2	113
11	Polish 2010 growth references for school-aged children and adolescents. <i>European Journal of Pediatrics</i> , 2011, 170, 599-609.	2.7	241
12	Idiopathic nephrotic syndrome in Polish children - its variants and associations with HLA. <i>Pediatric Nephrology</i> , 2006, 21, 1837-1846.	1.7	2
