Ricardo Brito

List of Publications by Year in Descending Order

Source: https://exaly.com/author-pdf/6457591/ricardo-brito-publications-by-year.pdf
Version: 2024-04-23

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.
The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

56 papers	1,166 citations	19 h-index	33 g-index
58 ext. papers	1,330 ext. citations	2.5 avg, IF	4.54 L-index

#	Paper	IF	Citations
56	Collective motion of run-and-tumble repulsive and attractive particles in one-dimensional systems. *Soft Matter*, **2021**, 17, 10479-10491	3.6	0
55	The inconsistency of h-index: A mathematical analysis. *Journal of Informetrics*, **2021**, 15, 101106	3.1	4
54	Stability of the homogeneous steady state for a model of a confined quasi-two-dimensional granular fluid. *EPJ Web of Conferences*, **2021**, 249, 04005	0.3	
53	Navier–Stokes transport coefficients for a model of a confined quasi-two-dimensional granular binary mixture. *Physics of Fluids*, **2021**, 33, 023310	4.4	2
52	Total number of papers and in a single percentile fully describes research impact—Revisiting concepts and applications. *Quantitative Science Studies*, **2021**, 2, 544-559	3.8	1
51	Like-for-like bibliometric substitutes for peer review: Advantages and limits of indicators calculated from the ep index. *Research Evaluation*, **2020**, 29, 215-230	1.7	6
50	Might Europe one day again be a global scientific powerhouse? Analysis of ERC publications suggests it will not be possible without changes in research policy. *Quantitative Science Studies*, **2020**, 1-22	3.8	2
49	Energy nonequipartition in a collisional model of a confined quasi-two-dimensional granular mixture. *Physical Review E*, **2020**, 102, 052904	2.4	3
48	Probability and expected frequency of breakthroughs: basis and use of a robust method of research assessment. *Scientometrics*, **2019**, 119, 213-235	3	7
47	Evaluating research and researchers by the journal impact factor: Is it better than coin flipping?. *Journal of Informetrics*, **2019**, 13, 314-324	3.1	17
46	Double rank analysis for research assessment. *Journal of Informetrics*, **2018**, 12, 31-41	3.1	10
45	Research assessment by percentile-based double rank analysis. *Journal of Informetrics*, **2018**, 12, 315-329	3.1	12
44	Enskog kinetic theory for a model of a confined quasi-two-dimensional granular fluid. *Physical Review E*, **2018**, 98,	2.4	7
43	Technological research in the EU is less efficient than the world average. EU research policy risks Europeans' future. *Journal of Informetrics*, **2018**, 12, 718-731	3.1	8
42	Shear viscosity of a model for confined granular media. *Physical Review E*, **2014**, 90, 062204	2.4	12
41	Hydrodynamic modes in a confined granular fluid. *Physical Review E*, **2013**, 87, 022209	2.4	30
40	Clustering and collapse of a set of adiabatic pistons enclosing granular gases. *Granular Matter*, **2012**, 14, 133-136	2.6	1

39	Dynamical approach to the Casimir effect. *Physical Review E*, **2011**, 83, 031102	2.4	10
38	Stochastic quantization and Casimir forces. *Europhysics Letters*, **2011**, 96, 50008	1.6	3
37	Competition of Brazil nut effect, buoyancy, and inelasticity induced segregation in a granular mixture. *European Physical Journal: Special Topics*, **2009**, 179, 207-219	2.3	26
36	Segregation induced by inelasticity in a vibrofluidized granular mixture. *Physical Review E*, **2008**, 77, 061301	2.4	41
35	Generalized Casimir forces in nonequilibrium systems. *Physical Review E*, **2007**, 76, 011113	2.4	21
34	Casimir forces in granular and other non equilibrium systems. *Granular Matter*, **2007**, 10, 29-36	2.6	5
33	New Green-Kubo formulas for transport coefficients in hard-sphere, Langevin fluids and the likes. *Europhysics Letters*, **2006**, 73, 183-189	1.6	13
32	Fluctuation-induced casimir forces in granular fluids. *Physical Review Letters*, **2006**, 96, 178001	7.4	43
31	A horizontal Brazil-nut effect and its reverse. *Physical Review Letters*, **2005**, 95, 028001	7.4	45
30	Dissipative collapse of the adiabatic piston. *Europhysics Letters*, **2005**, 70, 29-35	1.6	11
29	Generalized Green-Kubo formulas for fluids with impulsive, dissipative, stochastic, and conservative interactions. *Physical Review E*, **2005**, 72, 061102	2.4	8
28	Towards a Landau□Ginzburg-Type Theory for Granular Fluids. *Journal of Statistical Physics*, **2002**, 107, 3-22	1.5	14
27	Scaling Solutions of Inelastic Boltzmann Equations with Over-Populated High Energy Tails. *Journal of Statistical Physics*, **2002**, 109, 407-432	1.5	86
26	Driven inelastic Maxwell models with high energy tails. *Physical Review E*, **2002**, 65, 040301	2.4	45
25	High-energy tails for inelastic Maxwell models. *Europhysics Letters*, **2002**, 58, 182-187	1.6	54
24	Dynamics of deviations from the Gaussian state in a freely cooling homogeneous system of smooth inelastic particles. *Granular Matter*, **2000**, 2, 189-199	2.6	40
23	Extension of Haff's cooling law in granular flows. *Europhysics Letters*, **1998**, 43, 497-502	1.6	102
22	Noise Reduction and Pattern Formation in Rapid Granular Flows. *International Journal of Modern Physics C*, **1998**, 09, 1339-1351	1.1	9

21	Spatial correlations in compressible granular flows. *Physical Review E*, **1998**, 57, R4891-R4894	2.4	40
20	Efficiency of Brownian motors. *Europhysics Letters*, **1998**, 43, 248-254	1.6	83
19	Mesoscopic Theory of Granular Fluids. *Physical Review Letters*, **1997**, 79, 411-414	7.4	120
18	Patterns and Long Range Correlations in Idealized Granular Flows. *International Journal of Modern Physics C*, **1997**, 08, 953-965	1.1	29
17	Self-diffusion in simple models: Systems with long-range jumps. *Journal of Statistical Physics*, **1997**, 87, 1131-1144	1.5	2
16	Theory for diffusion-limited oscillating chemical reactions. *Journal of Statistical Physics*, **1997**, 87, 1165-1178	1.5	2
15	Random versus deterministic two-dimensional traffic flow models. *Physical Review E*, **1995**, 51, R835-R838	2.4	27
14	Long-time tails in lattice gases violating detailed balance. *Physical Review E*, **1995**, 52, 2657-2667	2.4	3
13	Theoretical approach to two-dimensional traffic flow models. *Physical Review E*, **1995**, 51, 175-187	2.4	58
12	Velocity autocorrelation function in lattice gases from the ring kinetic theory. Comparison with numerical simulations. *Journal of Statistical Physics*, **1995**, 80, 565-578	1.5	1
11	Relaxation and transport in FCHC lattice gases. *Journal of Statistical Physics*, **1994**, 74, 1085-1115	1.5	8
10	Statistical hydrodynamics of lattice-gas automata. *Physical Review E*, **1993**, 48, 2655-2668	2.4	31
9	Stress-stress correlation functions in lattice gases beyond Boltzmann's approximation. *Journal of Statistical Physics*, **1993**, 70, 811-832	1.5	7
8	A fluctuation formula for the nonGalilean factor in lattice gas automata. *Journal of Physics A*, **1992**, 25, L949-L954		1
7	Ring kinetic theory for tagged-particle problems in lattice gases. *Physical Review A*, **1992**, 46, 875-887	2.6	8
6	Staggered diffusivities in lattice gas cellular automata. *Journal of Statistical Physics*, **1991**, 62, 283-295	1.5	22
5	Lattice gases in slab geometries. *Physical Review A*, **1991**, 44, 8384-8387	2.6	7
4	Propagating staggered waves in cellular automata fluids. *Journal of Physics A*, **1991**, 24, 3331-3349		9

3	Long-range inverse two-spin correlations in one-dimensional Potts lattices. *Journal of Statistical Physics*, **1989**, 56, 33-42	1.5	
2	Absence of dissipative solutions of the schr□dinger and Klein-Gordon equations with logarithmic nonlinearity. *Physics Letters, Section A: General, Atomic and Solid State Physics*, **1988**, 128, 360-366	2.3	6
1	The link between countries□economic and scientific wealth has a complex dependence on technological activity and research policy. *Scientometrics*,1	3	2
