#	ARTICLE	IF	CITATIONS
1	Cloning and Characterization of Rainbow Trout Interleukin-17A/F2 (IL-17A/F2) and IL-17 Receptor A: Expression during Infection and Bioactivity of Recombinant IL-17A/F2. <i>Infection and Immunity</i> , 2013, 81, 340-353.	2.2	97
2	Atlantic salmon (<i>Salmo salar</i> L.) serum vitellogenin neutralises infectivity of infectious pancreatic necrosis virus (IPNV). <i>Fish and Shellfish Immunology</i> , 2010, 29, 293-297.	3.6	84
3	Identification of IL-34 in teleost fish: Differential expression of rainbow trout IL-34, MCSF1 and MCSF2, ligands of the MCSF receptor. <i>Molecular Immunology</i> , 2013, 53, 398-409.	2.2	71
4	Cloning, expression analysis and bioactivity studies of rainbow trout (<i>Oncorhynchus mykiss</i>) interleukin-22. <i>Cytokine</i> , 2011, 55, 62-73.	3.2	65
5	Identification of two FoxP3 genes in rainbow trout (<i>Oncorhynchus mykiss</i>) with differential induction patterns. <i>Molecular Immunology</i> , 2010, 47, 2563-2574.	2.2	48
6	Sequence and expression analysis of rainbow trout CXCR2, CXCR3a and CXCR3b aids interpretation of lineage-specific conversion, loss and expansion of these receptors during vertebrate evolution. <i>Developmental and Comparative Immunology</i> , 2014, 45, 201-213.	2.3	48
7	Identification and expression modulation of a C-type lectin domain family 4 homologue that is highly expressed in monocytes/macrophages in rainbow trout (<i>Oncorhynchus mykiss</i>). <i>Developmental and Comparative Immunology</i> , 2016, 54, 55-65.	2.3	32
8	Individual Monitoring of Immune Response in Atlantic Salmon <i>Salmo salar</i> following Experimental Infection with Infectious Salmon Anaemia Virus (ISAV). <i>PLoS ONE</i> , 2015, 10, e0137767.	2.5	28
9	Cloning and expression analysis of two ROR- γ homologues (ROR- γ 1 and ROR- γ 2) in rainbow trout <i>Oncorhynchus mykiss</i> . <i>Fish and Shellfish Immunology</i> , 2012, 33, 365-374.	3.6	24
10	Individual monitoring of immune responses in rainbow trout after cohabitation and intraperitoneal injection challenge with <i>Yersinia ruckeri</i> . <i>Fish and Shellfish Immunology</i> , 2016, 55, 469-478.	3.6	23
11	Induction of IL-22 protein and IL-22-producing cells in rainbow trout <i>Oncorhynchus mykiss</i> . <i>Developmental and Comparative Immunology</i> , 2019, 101, 103449.	2.3	18
12	Molecular characterisation of four class 2 cytokine receptor family members in rainbow trout, <i>Oncorhynchus mykiss</i> . <i>Developmental and Comparative Immunology</i> , 2015, 48, 43-54.	2.3	16
13	Molecular characterization and expression analysis of the putative interleukin 6 receptor (IL-6R α and Tj ETQq1 1 0.784314 rgBT /Overl N-terminal Ig domain with variable numbers of two repeats. <i>Immunogenetics</i> , 2012, 64, 229-244.	2.4	14
14	Individual measurement of gene expression in blood cells from Rainbow trout <i>Oncorhynchus mykiss</i> (Walbaum). <i>Journal of Experimental and Applied Animal Sciences</i> , 2016, 2, 1.	0.2	12
15	Plasma Proteome Responses in Salmonid Fish Following Immunization. <i>Frontiers in Immunology</i> , 2020, 11, 581070.	4.8	9
16	Individual monitoring of immune response in Atlantic salmon <i>Salmo salar</i> following experimental infection with piscine myocarditis virus (PMCV), agent of cardiomyopathy syndrome (CMS). <i>Developmental and Comparative Immunology</i> , 2019, 99, 103406.	2.3	3
