#	ARTICLE	IF	CITATIONS
1	Adverse pregnancy outcome disclosure and women's social networks: a qualitative multi-country study with implications for improved reporting in surveys. BMC Pregnancy and Childbirth, 2022, 22, 292.	2.4	1
2	Health effects of utilising hospital contacts to provide measles vaccination to children 9-59 months: a randomised controlled trial in Guinea-Bissau. Trials, 2022, 23, 349.	1.6	1
3	Understanding the child mortality decline in Guinea-Bissau: the role of population-level nutritional status measured by mid-upper arm circumference. International Journal of Epidemiology, 2022, 51, 1522-1532.	1.9	1
4	Effect of early two-dose measles vaccination on childhood mortality and modification by maternal measles antibody in Guinea-Bissau, West Africa: A single-centre open-label randomised controlled trial. EClinicalMedicine, 2022, 49, 101467.	7.1	11
5	National Immunization Campaigns With Oral Polio Vaccine May Reduce All-cause Mortality: An Analysis of 13 Years of Demographic Surveillance Data From an Urban African Area. Clinical Infectious Diseases, 2021, 72, e596-e603.	5.8	31
6	Diphtheria-Tetanus-Pertussis (DTP) Vaccine Is Associated With Increased female-Male Mortality. Studies of DTP administered before and after measles vaccine. Journal of Infectious Diseases, 2021, 223, 1984-1991.	4.0	9
7	Life expectancy of HIV-infected patients followed at the largest hospital in Guinea-Bissau is one-fourth of life expectancy of the background population. Infection, 2021, 49, 631-643.	4.7	9
8	Neonatal and child mortality data in retrospective population-based surveys compared with prospective demographic surveillance: EN-INDEPTH study. Population Health Metrics, 2021, 19, 7.	2.7	9
9	Gestational age data completeness, quality and validity in population-based surveys: EN-INDEPTH study. Population Health Metrics, 2021, 19, 16.	2.7	12
10	Birthweight data completeness and quality in population-based surveys: EN-INDEPTH study. Population Health Metrics, 2021, 19, 17.	2.7	22
11	Electronic data collection in a multi-site population-based survey: EN-INDEPTH study. Population Health Metrics, 2021, 19, 9.	2.7	3
12	Barriers and enablers to reporting pregnancy and adverse pregnancy outcomes in population-based surveys: EN-INDEPTH study. Population Health Metrics, 2021, 19, 15.	2.7	25
13	Stillbirth outcome capture and classification in population-based surveys: EN-INDEPTH study. Population Health Metrics, 2021, 19, 13.	2.7	13
14	Stillbirth maternity care measurement and associated factors in population-based surveys: EN-INDEPTH study. Population Health Metrics, 2021, 19, 11.	2.7	7
15	Birth, stillbirth and death registration data completeness, quality and utility in population-based surveys: EN-INDEPTH study. Population Health Metrics, 2021, 19, 14.	2.7	12
16	On the investigation of non-specific effects of BCG: Interpreting global vaccine data. EBioMedicine, 2021, 66, 103321.	6.1	0
17	The mortality effects of disregarding the strategy to save doses of measles vaccine: a cluster-randomised trial in Guinea-Bissau. BMJ Global Health, 2021, 6, e004328.	4.7	5
18	Factors associated with birthweight and adverse pregnancy outcomes among children in rural Guinea-Bissau - a prospective observational study. BMC Public Health, 2021, 21, 1164.	2.9	3

#	ARTICLE	IF	CITATIONS
19	Disregarding the restrictive vial-opening policy for BCG vaccine in Guinea-Bissau: impact and cost-effectiveness for tuberculosis mortality and all-cause mortality in children aged 0â€“4 years. <i>BMJ Global Health</i> , 2021, 6, e006127.	4.7	6
20	Coverage and factors associated with receiving campaign polio vaccines in an urban population in Guinea-Bissau. <i>Vaccine</i> , 2021, 39, 6720-6726.	3.8	1
21	Does Influenza Vaccination during Pregnancy Have Effects on Non-Influenza Infectious Morbidity? A Systematic Review and Meta-Analysis of Randomised Controlled Trials. <i>Vaccines</i> , 2021, 9, 1452.	4.4	2
22	Serum Perfluoroalkyl Substances, Vaccine Responses, and Morbidity in a Cohort of Guinea-Bissau Children. <i>Environmental Health Perspectives</i> , 2020, 128, 87002.	6.0	43
23	Reduction in Short-term Outpatient Consultations After a Campaign With Measles Vaccine in Children Aged 9â€“59 Months: Substudy Within a Cluster-Randomized Trial. <i>Journal of the Pediatric Infectious Diseases Society</i> , 2020, 9, 535-543.	1.3	3
24	Complete and on-time routine childhood immunisation: determinants and association with severe morbidity in urban informal settlements, Nairobi, Kenya. <i>Annals of Human Biology</i> , 2020, 47, 132-141.	1.0	2
25	Randomised comparison of two household survey modules for measuring stillbirths and neonatal deaths in five countries: the Every Newborn-INDEPTH study. <i>The Lancet Global Health</i> , 2020, 8, e555-e566.	6.3	37
26	Vaccinology: time to change the paradigm?. <i>Lancet Infectious Diseases</i> , The, 2020, 20, e274-e283.	9.1	111
27	Measles Vaccination in Presence of Measles Antibody May Enhance Child Survival. <i>Frontiers in Pediatrics</i> , 2020, 8, 20.	1.9	13
28	The effect of early measles vaccination on morbidity and growth: A randomised trial from Guinea-Bissau. <i>Vaccine</i> , 2020, 38, 2487-2494.	3.8	3
29	WHOâ€™s rollout of malaria vaccine in Africa: can safety questions be answered after only 24 months?. <i>BMJ</i> , The, 2020, 368, l6920.	6.0	7
30	Household costs of seeking BCG vaccination in rural Guinea-Bissau. <i>Vaccine</i> , 2019, 37, 5505-5508.	3.8	3
31	Comment on the trial protocol â€œEarly versus late BCG vaccination in HIV-1-exposed infants in Uganda: study protocol for a randomized controlled trialâ€• <i>Trials</i> , 2019, 20, 123.	1.6	0
32	Lessons Learned from the Testing of Neonatal Vitamin A Supplementation. <i>Nutrients</i> , 2019, 11, 449.	4.1	5
33	â€œEvery Newborn-INDEPTHâ€•(EN-INDEPTH) study protocol for a randomised comparison of household survey modules for measuring stillbirths and neonatal deaths in five Health and Demographic Surveillance sites. <i>Journal of Global Health</i> , 2019, 9, 010901.	2.7	31
34	Out-of-sequence DTP and measles vaccinations and child mortality in Guinea-Bissau: a reanalysis. <i>BMJ Open</i> , 2019, 9, e024893.	1.9	8
35	Cohort profile : Bandim Health Projectâ€™s (BHP) rural Health and Demographic Surveillance System (HDSS)â€”a nationally representative HDSS in Guinea-Bissau. <i>BMJ Open</i> , 2019, 9, e028775.	1.9	17
36	Differences in barriers to birth and death registration in Guineaâ€“Bissau: implications for monitoring national and global health objectives. <i>Tropical Medicine and International Health</i> , 2019, 24, 166-174.	2.3	14

#	ARTICLE	IF	CITATIONS
37	Impact of H1N1 Influenza Vaccination on Child Morbidity in Guinea-Bissau. <i>Journal of Tropical Pediatrics</i> , 2019, 65, 446-456.	1.5	4
38	Early BCG Vaccination, Hospitalizations, and Hospital Deaths: Analysis of a Secondary Outcome in 3 Randomized Trials from Guinea-Bissau. <i>Journal of Infectious Diseases</i> , 2019, 219, 624-632.	4.0	43
39	Determinants of BCG scarification among children in rural Guinea-Bissau: A prospective cohort study. <i>Human Vaccines and Immunotherapeutics</i> , 2018, 14, 2434-2442.	3.3	22
40	A Two-Center Randomized Trial of an Additional Early Dose of Measles Vaccine: Effects on Mortality and Measles Antibody Levels. <i>Clinical Infectious Diseases</i> , 2018, 66, 1573-1580.	5.8	32
41	How to evaluate potential non-specific effects of vaccines: the quest for randomized trials or time for triangulation?. <i>Expert Review of Vaccines</i> , 2018, 17, 411-420.	4.4	22
42	No effect of an additional early dose of measles vaccine on hospitalization or mortality in children: A randomized controlled trial. <i>Vaccine</i> , 2018, 36, 1965-1971.	3.8	19
43	Randomized Trial of 2 Versus 1 Dose of Measles Vaccine: Effect on Hospital Admission of Children After 9 Months of Age. <i>Journal of the Pediatric Infectious Diseases Society</i> , 2018, 7, 226-233.	1.3	9
44	Reducing missed opportunities for vaccinations should be done with eyes wide open. <i>Vaccine</i> , 2018, 36, 7907.	3.8	0
45	Non-live pentavalent vaccines after live measles vaccine may increase mortality. <i>Vaccine</i> , 2018, 36, 6039-6042.	3.8	10
46	National Immunization Campaigns with Oral Polio Vaccine Reduce All-Cause Mortality: A Natural Experiment within Seven Randomized Trials. <i>Frontiers in Public Health</i> , 2018, 6, 13.	2.7	84
47	Implementation and assessment of vaccination programmes: the importance of vaccination sequence for overall health outcomes. <i>Human Vaccines and Immunotherapeutics</i> , 2018, 14, 2900-2903.	3.3	1
48	Selecting the right indicators to ensure optimised implementation of BCG vaccination policy. <i>Vaccine</i> , 2018, 36, 3406-3407.	3.8	5
49	Is early measles vaccination associated with stronger survival benefits than later measles vaccination?. <i>BMC Public Health</i> , 2018, 18, 984.	2.9	11
50	Vitamin A distribution in danger: should we worry?. <i>Lancet, The</i> , 2018, 392, 631.	13.7	2
51	Effect of an Early Dose of Measles Vaccine on Morbidity Between 18 Weeks and 9 Months of Age: A Randomized, Controlled Trial in Guinea-Bissau. <i>Journal of Infectious Diseases</i> , 2017, 215, jiw512.	4.0	19
52	A general measles vaccination campaign in urban Guinea-Bissau: Comparing child mortality among participants and non-participants. <i>Vaccine</i> , 2017, 35, 33-39.	3.8	28
53	Cost-effectiveness of providing measles vaccination to all children in Guinea-Bissau. <i>Global Health Action</i> , 2017, 10, 1329968.	1.9	16
54	Seasonal variation in child mortality in rural Guinea-Bissau. <i>Tropical Medicine and International Health</i> , 2017, 22, 846-856.	2.3	10

#	ARTICLE	IF	CITATIONS
55	Campaigns with oral polio vaccine may lower mortality and create unexpected results. Vaccine, 2017, 35, 1113-1116.	3.8	34
56	Early BCG-Denmark and Neonatal Mortality Among Infants Weighing <2500 g: A Randomized Controlled Trial. Clinical Infectious Diseases, 2017, 65, 1183-1190.	5.8	222
57	Serious danger signals: Response to: The effect of neonatal vitamin A supplementation on morbidity and mortality at 12 months: a randomized trial. International Journal of Epidemiology, 2017, 46, 1718-1720.	1.9	1
58	Vaccination coverage and factors associated with adherence to the vaccination schedule in young children of a rural area in Burkina Faso. Global Health Action, 2017, 10, 1399749.	1.9	30
59	Non-specific effects of childhood vaccinations â€“ A case control study nested into a Health and Demographic Surveillance System in rural Burkina Faso. Vaccine, 2017, 35, 7114-7120.	3.8	7
60	Sex-differential effects of diphtheria-tetanus-pertussis vaccine for the outcome of paediatric admissions? A hospital based observational study from Guinea-Bissau. Vaccine, 2017, 35, 7018-7025.	3.8	14
61	Household experience and costs of seeking measles vaccination in rural Guineaâ€Bissau. Tropical Medicine and International Health, 2017, 22, 12-20.	2.3	15
62	Analysis of risk factors for infant mortality in the 1992-3 and 2002-3 birth cohorts in rural Guinea-Bissau. PLoS ONE, 2017, 12, e0177984.	2.5	15
63	The question should be whether the timing of vaccination optimises the impact on child health. BMJ, The, 2016, 352, i1713.	6.0	0
64	Does oral polio vaccine have non-specific effects on all-cause mortality? Natural experiments within a randomised controlled trial of early measles vaccine. BMJ Open, 2016, 6, e013335.	1.9	41
65	The effects of vitamin A supplementation with measles vaccine on leucocyte counts and<i>in vitro</i>cytokine production. British Journal of Nutrition, 2016, 115, 619-628.	2.3	13
66	Is introduction of IPV â€œGood news for billions of childrenâ€?. Lancet Infectious Diseases, The, 2016, 16, 409.	9.1	3
67	Different effects of BCG strains â€“ A natural experiment evaluating the impact of the Danish and the Russian BCG strains on morbidity and scar formation in Guinea-Bissau. Vaccine, 2016, 34, 4586-4593.	3.8	36
68	Contrasting female-male mortality ratios after routine vaccinations with pentavalent vaccine versus measles and yellow fever vaccine. A cohort study from urban Guinea-Bissau. Vaccine, 2016, 34, 4551-4557.	3.8	29
69	Revaccination with Live Attenuated Vaccines Confer Additional Beneficial Nonspecific Effects on Overall Survival: A Review. EBioMedicine, 2016, 10, 312-317.	6.1	73
70	Is diphtheria-tetanus-pertussis (DTP) associated with increased female mortality? A meta-analysis testing the hypotheses of sex-differential non-specific effects of DTP vaccine. Transactions of the Royal Society of Tropical Medicine and Hygiene, 2016, 110, 570-581.	1.8	63
71	An enigma: why vitamin A supplementation does not always reduce mortality even though vitamin A deficiency is associated with increased mortality. International Journal of Epidemiology, 2015, 44, 906-918.	1.9	50
72	Tuberculin reaction and <sc>BCG</sc> scar: association with infant mortality. Tropical Medicine and International Health, 2015, 20, 1733-1744.	2.3	21

#	ARTICLE	IF	CITATIONS
73	Neonatal vitamin A supplementation associated with increased atopy in girls. <i>Allergy: European Journal of Allergy and Clinical Immunology</i> , 2015, 70, 985-994.	5.7	28
74	Reduced All-cause Child Mortality After General Measles Vaccination Campaign in Rural Guinea-Bissau. <i>Pediatric Infectious Disease Journal</i> , 2015, 34, 1369-1376.	2.0	30
75	Neonatal vitamin A: time to move on?. <i>Lancet, The</i> , 2015, 386, 132-133.	13.7	10
76	Development of BCG Scar and Subsequent Morbidity and Mortality in Rural Guinea-Bissau. <i>Clinical Infectious Diseases</i> , 2015, 61, 950-959.	5.8	54
77	Changes in BCG Vaccination Policy Should Consider the Effect on Child Health: Table 1.. <i>Journal of Infectious Diseases</i> , 2015, 212, 1341-1342.	4.0	1
78	Response to: J Mason et al. Vitamin A policies need rethinking. <i>International Journal of Epidemiology</i> , 2015, 44, 366-367.	1.9	4
79	Neonatal vitamin A: time to move on?. <i>Lancet, The</i> , 2015, 386, 134-135.	13.7	3
80	Two Different Doses of Supplemental Vitamin A Did Not Affect Mortality of Normal-Birth-Weight Neonates in Guinea-Bissau in a Randomized Controlled Trial. <i>Journal of Nutrition</i> , 2014, 144, 1474-1479.	2.9	24
81	BCG coverage and barriers to BCG vaccination in Guinea-Bissau: an observational study. <i>BMC Public Health</i> , 2014, 14, 1037.	2.9	33
82	Measles Vaccination in the Presence or Absence of Maternal Measles Antibody: Impact on Child Survival. <i>Clinical Infectious Diseases</i> , 2014, 59, 484-492.	5.8	76
83	Interaction between neonatal vitamin A supplementation and timing of measles vaccination: A retrospective analysis of three randomized trials from Guinea-Bissau. <i>Vaccine</i> , 2014, 32, 5468-5474.	3.8	10
84	Reply to Dr Schmid et al.. <i>Vaccine</i> , 2014, 32, 2668-2669.	3.8	0
85	High-dose Vitamin A With Vaccination After 6 Months of Age: A Randomized Trial. <i>Pediatrics</i> , 2014, 134, e739-e748.	2.1	43
86	Effects of the introduction of new vaccines in Guinea-Bissau on vaccine coverage, vaccine timeliness, and child survival: an observational study. <i>The Lancet Global Health</i> , 2014, 2, e478-e487.	6.3	42
87	Co-administration of live measles and yellow fever vaccines and inactivated pentavalent vaccines is associated with increased mortality compared with measles and yellow fever vaccines only. An observational study from Guinea-Bissau. <i>Vaccine</i> , 2014, 32, 598-605.	3.8	23
88	Both Very Low- and Very High In Vitro Cytokine Responses Were Associated with Infant Death in Low-Birth-Weight Children from Guinea Bissau. <i>PLoS ONE</i> , 2014, 9, e93562.	2.5	7
89	The effect of neonatal vitamin A supplementation on growth in the first year of life among low-birth-weight infants in Guinea-Bissau: two by two factorial randomised controlled trial. <i>BMC Pediatrics</i> , 2013, 13, 87.	1.7	9
90	Determinants of vitamin a deficiency in children between 6 months and 2 years of age in Guinea-Bissau. <i>BMC Public Health</i> , 2013, 13, 172.	2.9	22

#	ARTICLE	IF	CITATIONS
91	Trends and determinants of mortality in women of reproductive age in rural Guinea-Bissau, West Africa – a cohort study. BMC Women's Health, 2013, 13, 48.	2.0	12
92	High-dose vitamin A supplementation administered with vaccinations after 6 months of age: Sex-differential adverse reactions and morbidity. Vaccine, 2013, 31, 3191-3198.	3.8	14
93	Vitamin A supplementation in Indian children. Lancet, The, 2013, 382, 593.	13.7	1
94	Vitamin A supplementation in Indian children. Lancet, The, 2013, 382, 591.	13.7	17
95	The effect of at-birth vitamin A supplementation on differential leucocyte counts and <i>in vitro</i> cytokine production: an immunological study nested within a randomised trial in Guinea-Bissau. British Journal of Nutrition, 2013, 109, 467-477.	2.3	21
96	SNP may modify the effect of vitamin A supplementation at birth on cytokine production in a whole blood culture assay. British Journal of Nutrition, 2012, 107, 615-620.	2.3	7
97	Vaccination coverage and out-of-sequence vaccinations in rural Guinea-Bissau: an observational cohort study. BMJ Open, 2012, 2, e001509.	1.9	18
98	Does the effect of vitamin A supplements depend on vaccination status? An observational study from Guinea-Bissau. BMJ Open, 2012, 2, e000448.	1.9	18
99	Mid-upper-arm-circumference and mid-upper-arm circumference z-score: the best predictor of mortality?. European Journal of Clinical Nutrition, 2012, 66, 998-1003.	2.9	43
100	Heterogeneous effects on child survival in neonatal vitamin A supplementation trials. Lancet, The, 2011, 377, 1314-1315.	13.7	3
