citing authors

#	ARTICLE	IF	CITATIONS
1	Different preparation methods and properties of nanostructured cellulose from various natural resources and residues: a review. <i>Cellulose</i> , 2015, 22, 935-969.	4.9	624
2	Seasonal dynamics of wood formation in Oriental beech ( <i>Fagus orientalis</i> Lipsky) along an altitudinal gradient in the Hyrcanian forest, Iran. <i>Trees - Structure and Function</i> , 2011, 25, 425-433.	1.9	48
3	Plastic and elastic behavior of vessel-anatomical features in Oriental beech ( <i>Fagus orientalis</i> )	1.9	33
4	In vivo investigation of chemical alteration in oak wood decayed by <i>Pleurotus ostreatus</i> . <i>International Biodeterioration and Biodegradation</i> , 2016, 108, 127-132.	3.9	30
5	Natural decomposition of hornbeam wood decayed by the white rot fungus <i>Trametes versicolor</i> . <i>Anais Da Academia Brasileira De Ciencias</i> , 2017, 89, 2647-2655.	0.8	23
6	Climatic forcing of xylem formation in Qilian juniper on the northeastern Tibetan Plateau. <i>Trees - Structure and Function</i> , 2016, 30, 923-933.	1.9	19
7	Fluid permeability in poplar tension and normal wood in relation to ray and vessel properties. <i>Wood Science and Technology</i> , 2017, 51, 261-272.	3.2	13
8	Influence of xylem ray integrity and degree of polymerization on bending strength of beech wood decayed by <i>Pleurotus ostreatus</i> and <i>Trametes versicolor</i> . <i>International Biodeterioration and Biodegradation</i> , 2015, 104, 299-306.	3.9	11
9	Weather factors controlling growth of Oriental beech are on the turn over the growing season. <i>European Journal of Forest Research</i> , 2017, 136, 345-356.	2.5	11
10	Monitoring the cell wall characteristics of degraded beech wood by white-rot fungi: Anatomical, chemical, and photochemical study. <i>Maderas: Ciencia Y Tecnologia</i> , 2018, , 0-0.	0.7	10
11	The dendroecological potential of shrubs in north Iranian semi-deserts. <i>Dendrochronologia</i> , 2017, 44, 94-102.	2.2	7
12	Using tree-ring width and earlywood vessel features to study the decline of <i>Quercus brantii</i> Lindl in Zagros forests of Iran. <i>European Journal of Forest Research</i> , 0, , 1.	2.5	2
