12 ext. papers	676 ext. citations	3.9 avg, IF	4.02 L-index

#	Paper	IF	Citations
12	Predictive distributions were developed for the extent of heterogeneity in meta-analyses of continuous outcome data. *Journal of Clinical Epidemiology*, **2015**, 68, 52-60	5·7	183
11	The epidemiology of multimorbidity in primary care: a retrospective cohort study. *British Journal of General Practice*, **2018**, 68, e245-e251	1.6	162
10	Two new methods to fit models for network meta-analysis with random inconsistency effects. *BMC Medical Research Methodology*, **2016**, 16, 87	4·7	33
9	Methods for calculating confidence and credible intervals for the residual between-study variance in random effects meta-regression models. *BMC Medical Research Methodology*, **2014**, 14, 103	4·7	28
8	Empirical evidence about inconsistency among studies in a pair-wise meta-analysis. *Research Synthesis Methods*, **2016**, 7, 346-370	7.2	25
7	Implementing informative priors for heterogeneity in meta-analysis using meta-regression and pseudo data. *Statistics in Medicine*, **2016**, 35, 5495-5511	2.3	25
6	Between-trial heterogeneity in meta-analyses may be partially explained by reported design characteristics. *Journal of Clinical Epidemiology*, **2018**, 95, 45-54	5·7	18
5	Incorporating external evidence on between-trial heterogeneity in network meta-analysis. *Statistics in Medicine*, **2019**, 38, 1321-1335	2.3	12
4	Label-invariant models for the analysis of meta-epidemiological data. *Statistics in Medicine*, **2018**, 37, 60-70	2.3	6
3	Financial incentives improve recognition but not treatment of cardiovascular risk factors in severe mental illness. *PLoS ONE*, **2017**, 12, e0179392	3·7	5
2	Computationally efficient methods for fitting mixed models to electronic health records data. *Statistics in Medicine*, **2018**, 37, 4557-4570	2.3	1
1	Agreement was moderate between data-based and opinion-based assessments of biases affecting randomized trials within meta-analyses. *Journal of Clinical Epidemiology*, **2020**, 125, 16-25	5·7
