Kirsty M Rhodes

List of Publications by Year in Descending Order

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.
The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

12	498	8	12
papers	citations	h-index	g-index
12	676	3.9	4.02
ext. papers	ext. citations	avg, IF	L-index

#	Paper	IF	Citations
12	Agreement was moderate between data-based and opinion-based assessments of biases affecting randomized trials within meta-analyses. *Journal of Clinical Epidemiology*, **2020**, 125, 16-25	5.7	
11	Incorporating external evidence on between-trial heterogeneity in network meta-analysis. *Statistics in Medicine*, **2019**, 38, 1321-1335	2.3	12
10	The epidemiology of multimorbidity in primary care: a retrospective cohort study. *British Journal of General Practice*, **2018**, 68, e245-e251	1.6	162
9	Label-invariant models for the analysis of meta-epidemiological data. *Statistics in Medicine*, **2018**, 37, 60-70	2.3	6
8	Between-trial heterogeneity in meta-analyses may be partially explained by reported design characteristics. *Journal of Clinical Epidemiology*, **2018**, 95, 45-54	5.7	18
7	Computationally efficient methods for fitting mixed models to electronic health records data. *Statistics in Medicine*, **2018**, 37, 4557-4570	2.3	1
6	Financial incentives improve recognition but not treatment of cardiovascular risk factors in severe mental illness. *PLoS ONE*, **2017**, 12, e0179392	3.7	5
5	Empirical evidence about inconsistency among studies in a pair-wise meta-analysis. *Research Synthesis Methods*, **2016**, 7, 346-370	7.2	25
4	Two new methods to fit models for network meta-analysis with random inconsistency effects. *BMC Medical Research Methodology*, **2016**, 16, 87	4.7	33
3	Implementing informative priors for heterogeneity in meta-analysis using meta-regression and pseudo data. *Statistics in Medicine*, **2016**, 35, 5495-5511	2.3	25
2	Predictive distributions were developed for the extent of heterogeneity in meta-analyses of continuous outcome data. *Journal of Clinical Epidemiology*, **2015**, 68, 52-60	5.7	183
1	Methods for calculating confidence and credible intervals for the residual between-study variance in random effects meta-regression models. *BMC Medical Research Methodology*, **2014**, 14, 103	4.7	28
