Version: 2024-02-01

92 papers	4,403 citations	101384 36 h-index	110170 64 g-index
93 all docs	93 docs citations	93 times ranked	2883 citing authors

#	Article	IF	Citations
1	Evaluation of the optimum value of lightweight expanded clay aggregate incorporation into the roller-compacted concrete pavement through experimental measurement of mechanical and thermal properties. International Journal of Pavement Engineering, 2023, 24, .	2.2	0
2	The effect of superplasticizer admixture on the engineering characteristics of roller-compacted concrete pavement. International Journal of Pavement Engineering, 2022, 23, 2432-2447.	2.2	10
3	Drying shrinkage properties of expanded polystyrene (EPS) lightweight aggregate concrete: A review. Case Studies in Construction Materials, 2022, 16, e00919.	0.8	13
4	Phase change materials incorporated into geopolymer concrete for enhancing energy efficiency and sustainability of buildings: A review. Case Studies in Construction Materials, 2022, 17, e01162.	0.8	11
5	Thermophysical properties of sustainable cement mortar containing oil palm boiler clinker (OPBC) as a fine aggregate. Construction and Building Materials, 2021, 268, 121091.	3.2	20
6	Post-peak Behaviour of Composite Column Using a Ductile Lightweight Aggregate Concrete. International Journal of Concrete Structures and Materials, 2021, 15, .	1.4	4
7	The effect of coarse to fine aggregate ratio on drying shrinkage of roller compacted concrete pavement in different curing conditions. Materiales De Construccion, 2021, 71, e246.	0.2	4
8	pH Measurement of Cement-Based Materials: The Effect of Particle Size. Applied Sciences (Switzerland), 2021, 11, 8000.	1.3	12
9	Experimental Analysis of Changes in Cement Mortar Containing Oil Palm Boiler Clinker Waste at Elevated Temperatures in Different Cooling Conditions. Crystals, 2021, 11, 988.	1.0	2
10	Recent Progress in the Application of Coconut and Palm Oil Fibres in Cement-Based Materials. Sustainability, 2021, 13, 12865.	1.6	2
11	Optimum moisture content in roller-compacted concrete pavement. International Journal of Pavement Engineering, 2020, 21, 1769-1779.	2.2	29
12	Appropriate drying shrinkage prediction models for lightweight concrete containing coarse agro-waste aggregate. Journal of Building Engineering, 2020, 29, 101148.	1.6	16
13	An Experimental and Numerical Study on the Flexural Performance of Over-Reinforced Concrete Beam Strengthening with Bolted-Compression Steel Plates: Part II. Applied Sciences (Switzerland), 2020, 10, 94.	1.3	6
14	The effect of cement mortar composition on the pH value. IOP Conference Series: Materials Science and Engineering, 2020, 770, 012026.	0.3	8
15	Energy Performance of a High-Rise Residential Building Using Fibre-Reinforced Structural Lightweight Aggregate Concrete. Applied Sciences (Switzerland), 2020, 10, 4489.	1.3	5
16	The effect of cement content on drying shrinkage of roller compacted concrete pavement. AIP Conference Proceedings, 2020, , .	0.3	0
17	Durability Property of Oil-Palm-Boiler Clinker Lightweight Concrete Based on Water Absorption Test. IOP Conference Series: Earth and Environmental Science, 2020, 476, 012016.	0.2	1
18	Experimental Study on the Flexural Behavior of over Reinforced Concrete Beams Bolted with Compression Steel Plate: Part I. Applied Sciences (Switzerland), 2020, 10, 822.	1.3	9

#	Article	IF	Citations
19	Laboratory comparison of roller-compacted concrete and ordinary vibrated concrete for pavement structures. Gradevinar, 2020, 72, 127-137.	0.2	6
20	Thermal properties of cement mortar with different mix proportions. Materiales De Construccion, 2020, 70, 224.	0.2	37
21	Mechanical and Durability Properties of High Strength High Performance Concrete Incorporating Rice Husk Ash. IOP Conference Series: Materials Science and Engineering, 2019, 536, 012028.	0.3	3
22	Crossover Effect in Cement-Based Materials: A Review. Applied Sciences (Switzerland), 2019, 9, 2776.	1.3	14
23	Performance of High Strength Concrete Subjected to Elevated Temperatures: A Review. Fire Technology, 2019, 55, 1571-1597.	1.5	25
24	The effect of using low fines content sand on the fresh and hardened properties of roller-compacted concrete pavement. Case Studies in Construction Materials, 2019, 11, e00230.	0.8	8
25	High Strength Concrete Incorporating Oil-Palm-Boiler Clinker as Coarse Lightweight Aggregate. IOP Conference Series: Materials Science and Engineering, 2019, 601, 012017.	0.3	1
26	Production of high-strength lightweight concrete using waste lightweight oil-palm-boiler-clinker and limestone powder. European Journal of Environmental and Civil Engineering, 2019, 23, 325-344.	1.0	15
27	Comparative study of mechanical properties for substitution of normal weight coarse aggregate with oil-palm-boiler clinker and lightweight expanded clay aggregate concretes. Journal of Design and Built Environment, 2019, 19, 62-77.	0.4	5
28	Optimization of Mixture Proportions of High Strength High Performance Concrete Incorporating Rice Husk Ash by Using Response Surface Methodology. , 2019, , .		0
29	Determination of optimum insulation and cement plaster thickness for bungalow buildings through a simulation-statistical approach using response surface methodology. Journal of Design and Built Environment, 2019, 19, 48-63.	0.4	4
30	Heat-treated palm oil fuel ash as an effective supplementary cementitious material originating from agriculture waste. Construction and Building Materials, 2018, 167, 44-54.	3.2	31
31	Concrete as a thermal mass material for building applications - A review. Journal of Building Engineering, 2018, 19, 14-25.	1.6	95
32	The effect of coarse to fine aggregate ratio on the fresh and hardened properties of roller-compacted concrete pavement. Construction and Building Materials, 2018, 169, 553-566.	3.2	46
33	Effect of utilizing unground and ground normal and black rice husk ash on the mechanical and durability properties of high-strength concrete. Sadhana - Academy Proceedings in Engineering Sciences, 2018, 43, 1.	0.8	9
34	Oil palm shell as an agricultural solid waste in artificial lightweight aggregate concrete. European Journal of Environmental and Civil Engineering, 2018, 22, 165-180.	1.0	17
35	Properties of eco-friendly self-compacting concrete containing modified treated palm oil fuel ash. Construction and Building Materials, 2018, 158, 742-754.	3.2	66
36	A comparison study of the fresh and hardened properties of normal weight and lightweight aggregate concretes. Journal of Building Engineering, 2018, 15, 252-260.	1.6	57

#	Article	IF	Citations
37	Optimum Oil Palm Shell Content as Coarse Aggregate in Concrete Based on Mechanical and Durability Properties. Advances in Materials Science and Engineering, 2018, 2018, 1-14.	1.0	27
38	Drying Shrinkage Strain of Palm-oil by-products Lightweight Concrete: A Comparison between Experimental and Prediction Models. KSCE Journal of Civil Engineering, 2018, 22, 4997-5008.	0.9	6
39	Thermal conductivity of concrete â€“ A review. Journal of Building Engineering, 2018, 20, 81-93.	1.6	403
40	Engineering properties of lightweight aggregate concrete containing binary and ternary blended cement. Journal of Cleaner Production, 2017, 149, 976-988.	4.6	52
41	Production of A Green Lightweight Aggregate Concrete by Incorporating High Volume Locally Available Waste Materials. Procedia Engineering, 2017, 184, 778-783.	1.2	18
42	A review on indoor environmental quality (IEQ) and energy consumption in building based on occupant behavior. Facilities, 2017, 35, 684-695.	0.8	42
43	Manufacturing of high-strength lightweight aggregate concrete using blended coarse lightweight aggregates. Journal of Building Engineering, 2017, 13, 53-62.	1.6	73
44	Quality control of lightweight aggregate concrete based on initial and final water absorption tests. IOP Conference Series: Materials Science and Engineering, 2017, 210, 012022.	0.3	13
45	Effect of Substitution of Normal Weight Coarse Aggregate with Oil-Palm-Boiler Clinker on Properties of Concrete. Sains Malaysiana, 2017, 46, 645-653.	0.3	6
46	High Strength Lightweight Aggregate Concrete using Blended Coarse Lightweight Aggregate Origin from Palm Oil Industry. Sains Malaysiana, 2017, 46, 667-675.	0.3	18
47	The Importance of Superplastizer Dosage in the Mix Design of Lightweight Aggregate Concrete Reinforced With Plypropylene Fiber. MATEC Web of Conferences, 2016, 66, 00020.	0.1	1
48	Mechanical properties of high strength semi-lightweight aggregate concrete containing high volume waste materials. AIP Conference Proceedings, 2016, , .	0.3	3
49	Mechanical Properties of High Strength Concrete Containing Coal Bottom Ash and Oil-Palm Boiler Clinker as Fine Aggregates. MATEC Web of Conferences, 2016, 66, 00034.	0.1	12
50	Oil-palm by-products as lightweight aggregate in concrete mixture: a review. Journal of Cleaner Production, 2016, 126, 56-73.	4.6	107
51	A new sustainable composite column using an agricultural solid waste as aggregate. Journal of Cleaner Production, 2016, 129, 282-291.	4.6	20
52	Drying shrinkage behaviour of structural lightweight aggregate concrete containing blended oil palm bio-products. Journal of Cleaner Production, 2016, 127, 183-194.	4.6	46
53	Utilization of high-volume treated palm oil fuel ash to produce sustainable self-compacting concrete. Journal of Cleaner Production, 2016, 137, 982-996.	4.6	102
54	Research progress on the flexural behaviour of externally bonded RC beams. Archives of Civil and Mechanical Engineering, 2016, 16, 982-1003.	1.9	46

#	Article	IF	Citations
55	Effect of replacement of oil-palm-boiler clinker with oil palm shell on the properties of concrete. AIP Conference Proceedings, 2016, , .	0.3	3
56	Toward Sustainability in Concrete Industry by Using Of Solid Wastes from Palm Oil Industry. MATEC Web of Conferences, 2016, 66, 00099.	0.1	4
57	The relation between indoor environnemental quality (IEQ) and energy consumption in building based on occupant behavior - A review. MATEC Web of Conferences, 2016, 66, 00086.	0.1	1
58	Engineering properties of lightweight aggregate concrete containing limestone powder and high volume fly ash. Journal of Cleaner Production, 2016, 135, 148-157.	4.6	106
59	Effects of polypropylene twisted bundle fibers on the mechanical properties of high-strength oil palm shell lightweight concrete. Materials and Structures/Materiaux Et Constructions, 2016, 49, 1221-1233.	1.3	31
60	Introducing an effective curing method for mortar containing high volume cementitious materials. Construction and Building Materials, 2016, 107, 365-377.	3.2	48
61	Benefits of using blended waste coarse lightweight aggregates in structural lightweight aggregate concrete. Journal of Cleaner Production, 2016, 119, 108-117.	4.6	77
62	Pitch spacing effect on the axial compressive behaviour of spirally reinforced concrete-filled steel tube (SRCFT). Thin-Walled Structures, 2016, 100, 213-223.	2.7	34
63	Flexural behaviour of RC beams strengthened with wire mesh-epoxy composite. Construction and Building Materials, 2015, 79, 104-114.	3.2	42
64	Development of Self-Consolidating High Strength Concrete Incorporating Treated Palm Oil Fuel Ash. Materials, 2015, 8, 2154-2173.	1.3	48
65	Strengthening of RC beams using prestressed fiber reinforced polymers â€“ A review. Construction and Building Materials, 2015, 82, 235-256.	3.2	118
66	Supplementary cementitious materials origin from agricultural wastes â€“ A review. Construction and Building Materials, 2015, 74, 176-187.	3.2	361
67	The use of wire meshâ€“epoxy composite for enhancing the flexural performance of concrete beams. Materials & Design, 2014, 60, 250-259.	5.1	43
68	Agricultural wastes as aggregate in concrete mixtures â€“ A review. Construction and Building Materials, 2014, 53, 110-117.	3.2	186
69	Palm Oil Fuel Ash as a Partial Cement Replacement for Producing Durable Self-consolidating High-Strength Concrete. Arabian Journal for Science and Engineering, 2014, 39, 8507-8516.	1.1	38
70	The role of 0â€“2mm fine recycled concrete aggregate on the compressive and splitting tensile strengths of recycled concrete aggregate concrete. Materials & Design, 2014, 64, 345-354.	5.1	103
71	Mechanical Properties of Structural Lightweight Aggregate Concrete Containing Low Volume Steel Fiber. Arabian Journal for Science and Engineering, 2014, 39, 3579-3590.	1.1	35
72	A comparison study of the mechanical properties and drying shrinkage of oil palm shell and expanded clay lightweight aggregate concretes. Materials & Design, 2014, 60, 320-327.	5.1	57

#	Article	IF	Citations
73	Structural lightweight aggregate concrete using two types of waste from the palm oil industry as aggregate. Journal of Cleaner Production, 2014, 80, 187-196.	4.6	109
74	Oil palm shell lightweight concrete containing high volume ground granulated blast furnace slag. Construction and Building Materials, 2013, 40, 231-238.	3.2	85
75	Engineering properties of oil palm shell lightweight concrete containing fly ash. Materials & Design, 2013, 49, 613-621.	5.1	98
76	High-Strength Lightweight Concrete Using Leca, Silica Fume, and Limestone. Arabian Journal for Science and Engineering, 2012, 37, 1885-1893.	1.1	44
77	Lightweight aggregate concrete fiber reinforcement â€“ A review. Construction and Building Materials, 2012, 37, 452-461.	3.2	213
78	Effect of Replacement of Normal Weight Coarse Aggregate with Oil Palm Shell on Properties of Concrete. Arabian Journal for Science and Engineering, 2012, 37, 955-964.	1.1	21
79	Lightweight concrete made from crushed oil palm shell: Tensile strength and effect of initial curing on compressive strength. Construction and Building Materials, 2012, 27, 252-258.	3.2	118
80	Relationships between compressive strength of cementâ€“slag mortars under air and water curing regimes. Construction and Building Materials, 2012, 31, 188-196.	3.2	38
81	Oil palm shell lightweight concrete as a ductile material. Materials & Design, 2012, 36, 650-654.	5.1	51
82	An experimental study on shear reinforcement in RC beams using CFRP-bars. Scientific Research and Essays, 2011, 6, 3447-3460.	0.1	8
83	A new method of producing high strength oil palm shell lightweight concrete. Materials & Design, 2011, 32, 4839-4843.	5.1	107
84	Using waste plastic bottles as additive for stone mastic asphalt. Materials & Design, 2011, 32, 4844-4849.	5.1	251
85	Oil palm shell as a lightweight aggregate for production high strength lightweight concrete. Construction and Building Materials, 2011, 25, 1848-1853.	3.2	160
86	Effect of steel fiber on the mechanical properties of oil palm shell lightweight concrete. Materials & Design, 2011, 32, 3926-3932.	5.1	106
87	Behavior of Channel Shear Connectors in Normal and Light Weight Aggregate Concrete (Experimental) Tj ETQq1 1 0.784314 rgBT /Ov	0.3	23
88	Structural Lightweight Aggregate Concrete Containing High Volume Waste Materials. Key Engineering Materials, 0, 594-595, 498-502.	0.4	4
89	The Effect of Palm Oil Fuel Ash as a Cementreplacement Material on Self-Compacting Concrete. Applied Mechanics and Materials, 0, 567, 529-534.	0.2	5
90	Flexural Behaviour of Concrete Beams Bonded with Wire Mesh-Epoxy Composite. Applied Mechanics and Materials, 0, 567, 411-416.	0.2	5

#	Article	IF	Citations
91	Structural Lightweight Aggregate Concrete by Incorporating Solid Wastes as Coarse Lightweight Aggregate. Applied Mechanics and Materials, 0, 749, 337-342.	0.2	15
92	Challenges of Using Agricultural Solid Wastes as Aggregate in Structural Concrete. , 0, , .		0
