| # | ARTICLE                                                                                                                                                                                                                                                       | IF  | CITATIONS |
|---|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 1 | Diversity in the structures and ligand-binding sites of nematode fatty acid and retinol-binding proteins revealed by Na-FAR-1 from <i>Necator americanus</i> . <i>Biochemical Journal</i> , 2015, 471, 403-414.                                               | 3.7 | 27        |
| 2 | Resonance assignment of As-p18, a fatty acid binding protein secreted by developing larvae of the parasitic nematode <i>Ascaris suum</i> . <i>Biomolecular NMR Assignments</i> , 2014, 8, 33-36.                                                              | 0.8 | 5         |
| 3 | Structure and ligand binding of As-p18, an extracellular fatty acid binding protein from the eggs of a parasitic nematode. <i>Bioscience Reports</i> , 2019, 39, .                                                                                            | 2.4 | 3         |
| 4 | Useable diffraction data from a multiple microdomain-containing crystal of <i>Ascaris suum</i> As-p18 fatty-acid-binding protein using a microfocus beamline. <i>Acta Crystallographica Section F: Structural Biology Communications</i> , 2012, 68, 939-941. | 0.7 | 2         |
| 5 | Enseñanza de Anatomía e Histología en tiempos de pandemia: adaptaciones para una cursada a distancia. <i>Trayectorias Universitarias</i> , 2020, 6, 025.                                                                                                      | 0.1 | 0         |
