#	ARTICLE	IF	CITATIONS
1	Multi-modal two-step floating catchment area analysis of primary health care accessibility. <i>Health and Place</i> , 2016, 38, 70-81.	1.5	143
2	Obtaining population estimates in non-census reporting zones: An evaluation of the 3-class dasymetric method. <i>Computers, Environment and Urban Systems</i> , 2006, 30, 161-180.	3.3	93
3	Investigating the Implications of Using Alternative GIS-Based Techniques to Measure Accessibility to Green Space. <i>Environment and Planning B: Planning and Design</i> , 2012, 39, 326-343.	1.7	86
4	Rapid facilitation of dasymetric-based population interpolation by means of raster pixel maps. <i>Computers, Environment and Urban Systems</i> , 2007, 31, 19-32.	3.3	77
5	An Evaluation of Small Area Population Estimation Techniques Using Open Access Ancillary Data. <i>Geographical Analysis</i> , 2013, 45, 324-344.	1.9	44
6	Modelling spatial access to General Practitioner surgeries: Does public transport availability matter?. <i>Journal of Transport and Health</i> , 2017, 6, 143-154.	1.1	35
7	An evaluation of alternative measures of accessibility for investigating potential "deprivation amplification" in service provision. <i>Applied Geography</i> , 2018, 95, 19-33.	1.7	18
8	Investigating spatial variations in access to childcare provision using network-based Geographic Information System models. <i>Social Policy and Administration</i> , 2019, 53, 661-677.	2.1	18
9	Using Geographic Information Systems to investigate variations in accessibility to "extended hours" primary healthcare provision. <i>Health and Social Care in the Community</i> , 2019, 27, 1074-1084.	0.7	17
10	Investigating geospatial data usability from a health geography perspective using sensitivity analysis: The example of potential accessibility to primary healthcare. <i>Journal of Transport and Health</i> , 2017, 6, 128-142.	1.1	15
11	Measuring Spatial Accessibility to Services within Indices of Multiple Deprivation: Implications of Applying an Enhanced two-Step Floating Catchment Area (E2SFCA) Approach. <i>Applied Spatial Analysis and Policy</i> , 2019, 12, 321-348.	1.0	15
12	The application of network-based GIS tools to investigate spatial variations in the provision of sporting facilities. <i>Annals of Leisure Research</i> , 2018, 21, 178-198.	1.0	12
13	Understanding Spatial Variations in Accessibility to Banks Using Variable Floating Catchment Area Techniques. <i>Applied Spatial Analysis and Policy</i> , 2021, 14, 449-472.	1.0	12
14	Computing geographical access to services: The design of a client-server solution that incorporates multiple transport modes. <i>Transactions in GIS</i> , 2021, 25, 1849-1867.	1.0	5
15	Assessing the impacts of changing public service provision on geographical accessibility: An examination of public library provision in Pembrokeshire, South Wales. <i>Environment and Planning C: Politics and Space</i> , 2018, 36, 548-568.	1.1	4
16	Towards an understanding of inequalities in accessing residential and nursing home provision: The role of geographical approaches. <i>Health and Social Care in the Community</i> , 2022, , .	0.7	4
17	An exploratory analysis of spatial variations in organ donation registration rates in Wales prior to the implementation of the Human Transplantation (Wales) Act 2013. <i>Health and Place</i> , 2018, 52, 18-24.	1.5	2
18	Exploring spatiotemporal variations in public library provision following a prolonged period of economic austerity: A GIS approach. <i>Area</i> , 2020, 52, 342-353.	1.0	2

#	ARTICLE	IF	CITATIONS
19	Combining Temporal and Multi-Modal Approaches to Better Measure Accessibility to Banking Services. ISPRS International Journal of Geo-Information, 2022, 11, 350.	1.4	2
20	Exploring the relationship between local volunteering opportunities and the propensity to volunteer using a nationally representative survey of adults in Wales. Journal of Civil Society, 2021, 17, 101-118.	0.3	0
