| #  | Article   | IF                | CITATIONS         |
|----|---|-------------------|-------------------|
| 1  | Limited Mitochondrial Permeabilization Causes DNA Damage and Genomic Instability in the Absence of<br>Cell Death. Molecular Cell, 2015, 57, 860-872.  | 9.7               | 341               |
| 2  | Proteasome inhibition can induce an autophagy-dependent apical activation of caspase-8. Cell Death and Differentiation, 2011, 18, 1584-1597.  | 11.2              | 120               |
| 3  | Changes in the antioxidant properties of protein solutions in the presence of epigallocatechin gallate. Food Chemistry, 2007, 101, 126-130.   | 8.2               | 86                |
| 4  | Effect of pH on the Antimicrobial Activity and Oxidative Stability of Oilâ€inâ€Water Emulsions Containing<br>Caffeic Acid. Journal of Food Science, 2007, 72, C258-63.  | 3.1               | 85                |
| 5  | Cell death at the intestinal epithelial front line. FEBS Journal, 2016, 283, 2701-2719.   | 4.7               | 77                |
| 6  | Albumin causes a synergistic increase in the antioxidant activity of green tea catechins in oil-in-water emulsions. Food Chemistry, 2007, 102, 1375-1382.   | 8.2               | 69                |
| 7  | Inhibitor of Apoptosis Protein-1 Regulates Tumor Necrosis Factor–Mediated Destruction of Intestinal<br>Epithelial Cells. Gastroenterology, 2017, 152, 867-879.  | 1.3               | 54                |
| 8  | Dietary polyphenols protect against N-nitrosamines and benzo(a)pyrene-induced DNA damage (strand) Tj ETQq0<br>Nutrition, 2008, 47, 479-490.   | 0 0 rgBT /<br>3.9 | Overlock 10<br>48 |
| 9  | Modulation of apoptosis sensitivity through the interplay with autophagic and proteasomal degradation pathways. Cell Death and Disease, 2014, 5, e1011-e1011.   | 6.3               | 43                |
| 10 | The many faces of tumor necrosis factor signaling in the intestinal epithelium. Genes and Immunity, 2019, 20, 609-626.  | 4.1               | 29                |
| 11 | Thiazolides promote G1 cell cycle arrest in colorectal cancer cells by targeting the mitochondrial respiratory chain. Oncogene, 2020, 39, 2345-2357.  | 5.9               | 27                |
| 12 | Myricetin, quercetin, (+)-catechin and (â^')-epicatechin protect against N-nitrosamines-induced DNA<br>damage in human hepatoma cells. Toxicology in Vitro, 2009, 23, 1292-1297.  | 2.4               | 23                |
| 13 | Antiapoptotic effects of dietary antioxidants towards <i>N</i> â€nitrosopiperidine and<br><i>N</i> â€nitrosodibutylamineâ€induced apoptosis in HLâ€60 and HepG2 cells. Journal of Applied Toxicology,<br>2009, 29, 403-413.                       | 2.8               | 20                |
| 14 | The orphan nuclear receptor LRH-1/NR5a2 critically regulates T cell functions. Science Advances, 2019,<br>5, eaav9732.  | 10.3              | 20                |
| 15 | Pharmacological LRH-1/Nr5a2 inhibition limits pro-inflammatory cytokine production in macrophages and associated experimental hepatitis. Cell Death and Disease, 2020, 11, 154.   | 6.3               | 20                |
| 16 | Determining the contributions of caspase-2, caspase-8 and effector caspases to intracellular<br>VDVADase activities during apoptosis initiation and execution. Biochimica Et Biophysica Acta -<br>Molecular Cell Research, 2013, 1833, 2279-2292. | 4.1               | 18                |
| 17 | Organosulfur compounds alone or in combination with vitamin C protect towards<br>N-nitrosopiperidine- and N-nitrosodibutylamine-induced oxidative DNA damage in HepG2 cells.<br>Chemico-Biological Interactions, 2008, 173, 9-18.                 | 4.0               | 17                |
| 18 | Liver receptor homolog-1 (NR5a2) regulates CD95/Fas ligand transcription and associated T-cell effector functions. Cell Death and Disease, 2017, 8, e2745-e2745.  | 6.3               | 17                |

| #  | Article  | IF   | CITATIONS |
|----|--|------|-----------|
| 19 | Metabolic Reprogramming of Liver Fibrosis. Cells, 2021, 10, 3604.  | 4.1  | 16        |
| 20 | Inhibition by vitamin C of apoptosis induced by <i>N</i> â€nitrosamines in HepG2 and HLâ€60 cells. Journal of Applied Toxicology, 2008, 28, 788-796.   | 2.8  | 10        |
| 21 | Dimerization of Smac is crucial for its mitochondrial retention by XIAP subsequent to mitochondrial outer membrane permeabilization. Biochimica Et Biophysica Acta - Molecular Cell Research, 2011, 1813, 819-826. | 4.1  | 8         |
| 22 | An Analysis of the Truncated Bid- and ROS-dependent Spatial Propagation of Mitochondrial<br>Permeabilization Waves during Apoptosis. Journal of Biological Chemistry, 2016, 291, 4603-4613.                        | 3.4  | 8         |
| 23 | Proteasome inhibition triggers the formation of TRAIL receptor 2 platforms for caspase-8 activation that accumulate in the cytosol. Cell Death and Differentiation, 2022, 29, 147-155.                             | 11.2 | 7         |
