#	ARTICLE	IF	CITATIONS
1	Analysis of the acceptable risk preferences of debris-flow disasters for three-category populations and their demographic characteristics in China. <i>Natural Hazards</i> , 2021, 107, 971-990.	3.4	0
2	Regional assessment on ecological risk of ecosystems under natural hazards: an application in Guangdong Province (SE China). <i>Natural Hazards</i> , 2020, 100, 205-229.	3.4	4
3	Characterization of acceptable risk for debris flows in China: Comparison in debris-flow prone areas and nonprone areas. <i>International Journal of Disaster Risk Reduction</i> , 2020, 42, 101405.	3.9	6
4	Integrated assessment of ecological risk for multi-hazards in Guangdong province in southeastern China. <i>Geomatics, Natural Hazards and Risk</i> , 2019, 10, 2069-2093.	4.3	8
5	Acceptability of debris-flow disasters: Comparison of two case studies in China. <i>International Journal of Disaster Risk Reduction</i> , 2019, 34, 45-54.	3.9	7
6	Acceptability of debris-flow disasters and influential factors in a hazard prone area of northwestern China. <i>International Journal of Disaster Risk Reduction</i> , 2018, 31, 58-67.	3.9	4
7	Characteristics of slope runoff and soil water content in benggang colluvium under simulated rainfall. <i>Journal of Soils and Sediments</i> , 2018, 18, 39-48.	3.0	22
8	Large-scale assessment of landslide hazard, vulnerability and risk in China. <i>Geomatics, Natural Hazards and Risk</i> , 2018, 9, 1037-1052.	4.3	35
9	Debris flow and landslide hazard mapping and risk analysis in China. <i>Frontiers of Earth Science</i> , 2012, 6, 306-313.	2.1	17
10	Fractal-statistical analysis of grain-size distributions of debris-flow deposits and its geological implications. <i>Landslides</i> , 2011, 8, 253-259.	5.4	19
11	Comparison of Two Empirical Models for Gully-Specific Debris Flow Hazard Assessment in Xiaojiang Valley of Southwestern China. <i>Natural Hazards</i> , 2004, 31, 157-175.	3.4	9
12	A method for assessing regional debris flow risk: an application in Zhaotong of Yunnan province (SW) Tj ETQq0 0 0,rgBT /Overlock 10 Tf	2.8	72
13	Empirical Assessment of Debris Flow Risk on a Regional Scale in Yunnan Province, Southwestern China. <i>Environmental Management</i> , 2002, 30, 249-264.	2.7	40
