#	ARTICLE	IF	CITATIONS
1	Applied screening tests for the detection of superior face recognition. <i>Cognitive Research: Principles and Implications</i> , 2018, 3, 22.	2.0	46
2	The loci of Stroop effects: a critical review of methods and evidence for levels of processing contributing to color-word Stroop effects and the implications for the loci of attentional selection. <i>Psychological Research</i> , 2022, 86, 1029-1053.	1.7	36
3	Assessing stimulus-stimulus (semantic) conflict in the Stroop task using saccadic two-to-one color response mapping and preresponse pupillary measures. <i>Attention, Perception, and Psychophysics</i> , 2015, 77, 2601-2610.	1.3	35
4	An fMRI Study of Response and Semantic Conflict in the Stroop Task. <i>Frontiers in Psychology</i> , 2019, 10, 2426.	2.1	26
5	Two-to-one color-response mapping and the presence of semantic conflict in the Stroop task. <i>Frontiers in Psychology</i> , 2014, 5, 1157.	2.1	23
6	The limits of super recognition: An other-ethnicity effect in individuals with extraordinary face recognition skills.. <i>Journal of Experimental Psychology: Human Perception and Performance</i> , 2019, 45, 363-377.	0.9	22
7	The consistency of superior face recognition skills in police officers. <i>Applied Cognitive Psychology</i> , 2019, 33, 828-842.	1.6	19
8	Trial type mixing substantially reduces the response set effect in the Stroop task. <i>Acta Psychologica</i> , 2018, 189, 43-53.	1.5	14
9	The role of contingency and correlation in the Stroop task. <i>Quarterly Journal of Experimental Psychology</i> , 2021, 74, 1657-1668.	1.1	11
10	Response Time Distribution Analysis of Semantic and Response Interference in a Manual Response Stroop Task. <i>Experimental Psychology</i> , 2019, 66, 231-238.	0.7	9
11	Look into my eyes: Pupillometry reveals that a post-hypnotic suggestion for word blindness reduces Stroop interference by marshalling greater effortful control. <i>European Journal of Neuroscience</i> , 2021, 53, 2819-2834.	2.6	8
