

Xanthe Spindler

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/659943/xanthe-spindler-publications-by-year.pdf>

Version: 2024-04-25

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

31

#	Paper	IF	Citations
31	Latent fingermark detection using functionalised silicon oxide nanoparticles: Investigation into novel application procedures.. <i>Forensic Science International</i> , 2022 , 335, 111275	2.6	1
30	Novel upconverting nanoparticles for fingermark detection. <i>Optical Materials</i> , 2021 , 111, 110568	3.3	4
29	Fingermark detection using upconverting nanoparticles and comparison with cyanoacrylate fuming. <i>Forensic Science International</i> , 2021 , 326, 110915	2.6	2
28	Detection of latent fingermarks and cells on paper. <i>Forensic Science International</i> , 2020 , 309, 110185	2.6	0
27	Latent fingermark detection using functionalised silicon oxide nanoparticles: Optimisation and comparison with cyanoacrylate fuming. <i>Forensic Science International</i> , 2020 , 315, 110442	2.6	4
26	Nanoparticles used for fingermark detection A comprehensive review. <i>Wiley Interdisciplinary Reviews Forensic Science</i> , 2019 , 1,	2.6	11
25	Latent fingermark detection using functionalised silicon oxide nanoparticles: Method optimisation and evaluation. <i>Forensic Science International</i> , 2019 , 298, 372-383	2.6	9
24	Single metal deposition versus physical developer: A comparison between two advanced fingermark detection techniques. <i>Forensic Science International</i> , 2019 , 294, 103-112	2.6	6
23	Impact of one-step luminescent cyanoacrylate treatment on subsequent DNA analysis. <i>Forensic Science International</i> , 2018 , 286, 1-7	2.6	11
22	An effective Physical Developer (PD) method for use in Australian laboratories. <i>Australian Journal of Forensic Sciences</i> , 2018 , 1-6	1.1	1
21	Metal-Organic Frameworks for fingermark detection - A feasibility study. <i>Forensic Science International</i> , 2018 , 291, 83-93	2.6	8
20	Investigation of some of the factors influencing fingermark detection. <i>Forensic Science International</i> , 2018 , 289, 381-389	2.6	31
19	Forensic Science: Current State and Perspective by a Group of Early Career Researchers. <i>Foundations of Science</i> , 2017 , 22, 799-825	0.8	1
18	Evaluation of one-step luminescent cyanoacrylate fuming. <i>Forensic Science International</i> , 2016 , 263, 126-131	1.1	14
17	Evaluation of multi-target immunogenic reagents for the detection of latent and body fluid-contaminated fingermarks. <i>Forensic Science International</i> , 2016 , 264, 168-75	2.6	11
16	Authors response to comments on "Evaluation of one-step luminescent cyanoacrylate fuming". <i>Forensic Science International</i> , 2016 , 268, e25-e26	2.6	1
15	Visualising substrate-fingermark interactions: Solid-state NMR spectroscopy of amino acid reagent development on cellulose substrates. <i>Forensic Science International</i> , 2015 , 250, 8-16	2.6	2

LIST OF PUBLICATIONS

14	Microscopic examination of fingermark residues: Opportunities for fundamental studies. <i>Forensic Science International</i> , 2015 , 255, 28-37	2.6	17
13	Understanding physical developer (PD): Part I--Is PD targeting lipids?. <i>Forensic Science International</i> , 2015 , 257, 481-487	2.6	30
12	Understanding Physical Developer (PD): Part II--Is PD targeting eccrine constituents?. <i>Forensic Science International</i> , 2015 , 257, 488-495	2.6	24
11	Evaluation of fingermark detection sequences on paper substrates. <i>Forensic Science International</i> , 2014 , 236, 30-7	2.6	23
10	PolyCyano UV: an investigation into a one-step luminescent cyanoacrylate fuming process. <i>Australian Journal of Forensic Sciences</i> , 2014 , 46, 471-484	1.1	14
9	Synthesis and application of an aqueous nile red microemulsion for the development of fingermarks on porous surfaces. <i>Forensic Science International</i> , 2014 , 244, e48-55	2.6	7
8	Nile red: Alternative to physical developer for the detection of latent fingermarks on wet porous surfaces?. <i>Forensic Science International</i> , 2013 , 230, 74-80	2.6	21
7	Selective targeting of fingermarks using immunogenic techniques. <i>Australian Journal of Forensic Sciences</i> , 2013 , 45, 211-226	1.1	30
6	Visualization of Latent Fingermarks Using an Aptamer-Based Reagent. <i>Angewandte Chemie</i> , 2012 , 124, 12438-12440	3.6	9
5	Visualization of latent fingermarks using an aptamer-based reagent. <i>Angewandte Chemie - International Edition</i> , 2012 , 51, 12272-4	16.4	56
4	Styryl dye coated metal oxide powders for the detection of latent fingermarks on non-porous surfaces. <i>Forensic Science International</i> , 2012 , 219, 208-14	2.6	16
3	Use of styryl 11 and STaR 11 for the luminescence enhancement of cyanoacrylate-developed fingermarks in the visible and near-infrared regions. <i>Journal of Forensic Sciences</i> , 2011 , 56, 1505-13	1.8	15
2	The effect of zinc chloride, humidity and the substrate on the reaction of 1,2-indanedione-zinc with amino acids in latent fingermark secretions. <i>Forensic Science International</i> , 2011 , 212, 150-7	2.6	26
1	Enhancement of latent fingermarks on non-porous surfaces using anti-L-amino acid antibodies conjugated to gold nanoparticles. <i>Chemical Communications</i> , 2011 , 47, 5602-4	5.8	71
