#	ARTICLE	IF	CITATIONS
1	Quantitative relationship between microstructure and tensile properties of Al-Zn-Mg-Cu alloys with various alloying degrees. <i>Journal of Materials Research and Technology</i> , 2022, 18, 5394-5405.	2.6	7
2	Aging precipitation characteristics and tensile properties of Al-Zn-Mg-Cu alloys with different additional Zn contents. <i>Rare Metals</i> , 2021, 40, 2160-2166.	3.6	8
3	Measurement and Theoretical Calculation Confirm the Improvement of T7651 Aging State Influenced Precipitation Characteristics on Fatigue Crack Propagation Resistance in an Al-Zn-Mg-Cu Alloy. <i>Metals and Materials International</i> , 2021, 27, 779-795.	1.8	6
4	Fe-rich particles influenced secondary crack characteristics in an Al-Zn-Mg-Cu alloy extrusion plate with high zinc content. <i>Scripta Materialia</i> , 2020, 186, 259-262.	2.6	7
5	Over-aging influenced matrix precipitate characteristics improve fatigue crack propagation in a high Zn-containing Al-Zn-Mg-Cu alloy. <i>Materials Science &amp; Engineering A: Structural Materials: Properties, Microstructure and Processing</i> , 2018, 716, 42-54.	2.6	58
6	Effect of Various Retrogression Regimes on Aging Behavior and Precipitates Characterization of a High Zn-Containing Al-Zn-Mg-Cu Alloy. <i>Metals and Materials International</i> , 2018, 24, 537-548.	1.8	16
7	Single-stage aging behaviour and precipitate evolution in a high Zn-containing Al-9.78Zn-2.02Mg-1.76Cu alloy. <i>Materials Science and Technology</i> , 2018, 34, 718-724.	0.8	7
8	Single Stage Ageing Property and Precipitation Variation of a High-Zinc Al-Zn-Mg-Cu Alloy. , 2018, , 377-384.		0
9	Aging behavior and fatigue crack propagation of high Zn-containing Al-Zn-Mg-Cu alloys with zinc variation. <i>Progress in Natural Science: Materials International</i> , 2017, 27, 217-227.	1.8	18
10	Aging behavior and precipitate characterization of a high Zn-containing Al-Zn-Mg-Cu alloy with various tempers. <i>Materials and Design</i> , 2016, 101, 16-23.	3.3	126
11	Fatigue Crack Growth and Precipitation Characteristics of a High Zn-Containing Al-Zn-Mg-Cu Alloy with Various Typical Aging States. <i>Materials Science Forum</i> , 0, 1026, 19-27.	0.3	2
12	Enlarged Zn Content Improves Fatigue Crack Propagation Resistance of Two Al-Zn-Mg-Cu Alloys with Multiple Aging Tempers. <i>Key Engineering Materials</i> , 0, 921, 15-22.	0.4	0
