

Hui Qin

List of Publications by Citations

Source: <https://exaly.com/author-pdf/6608978/hui-qin-publications-by-citations.pdf>

Version: 2024-04-27

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
70	Wind speed prediction method using Shared Weight Long Short-Term Memory Network and Gaussian Process Regression. <i>Applied Energy</i> , 2019 , 247, 270-284	10.7	94
69	Multi-stage progressive optimality algorithm and its application in energy storage operation chart optimization of cascade reservoirs. <i>Energy</i> , 2018 , 148, 309-323	7.9	79
68	Multi-objective Cultured Differential Evolution for Generating Optimal Trade-offs in Reservoir Flood Control Operation. <i>Water Resources Management</i> , 2010 , 24, 2611-2632	3.7	78
67	Study on unit commitment problem considering pumped storage and renewable energy via a novel binary artificial sheep algorithm. <i>Applied Energy</i> , 2017 , 187, 612-626	10.7	76
66	Multi-objective differential evolution with adaptive Cauchy mutation for short-term multi-objective optimal hydro-thermal scheduling. <i>Energy Conversion and Management</i> , 2010 , 51, 788-794	10.6	67
65	Probabilistic spatiotemporal wind speed forecasting based on a variational Bayesian deep learning model. <i>Applied Energy</i> , 2020 , 260, 114259	10.7	58
64	Monthly streamflow forecasting based on hidden Markov model and Gaussian Mixture Regression. <i>Journal of Hydrology</i> , 2018 , 561, 146-159	6	53
63	Long Short-Term Memory Network based on Neighborhood Gates for processing complex causality in wind speed prediction. <i>Energy Conversion and Management</i> , 2019 , 192, 37-51	10.6	49
62	Novel Multiobjective Shuffled Frog Leaping Algorithm with Application to Reservoir Flood Control Operation. <i>Journal of Water Resources Planning and Management - ASCE</i> , 2010 , 136, 217-226	2.8	49
61	Hierarchical Flood Operation Rules Optimization Using Multi-Objective Cultured Evolutionary Algorithm Based on Decomposition. <i>Water Resources Management</i> , 2019 , 33, 337-354	3.7	44
60	Ensemble spatiotemporal forecasting of solar irradiation using variational Bayesian convolutional gate recurrent unit network. <i>Applied Energy</i> , 2019 , 253, 113596	10.7	41
59	Wind speed forecasting based on Quantile Regression Minimal Gated Memory Network and Kernel Density Estimation. <i>Energy Conversion and Management</i> , 2019 , 196, 1395-1409	10.6	41
58	Deriving joint optimal refill rules for cascade reservoirs with multi-objective evaluation. <i>Journal of Hydrology</i> , 2015 , 524, 166-181	6	39
57	A data-driven model based on Fourier transform and support vector regression for monthly reservoir inflow forecasting. <i>Journal of Hydro-Environment Research</i> , 2018 , 18, 12-24	2.3	38
56	Parallel Multi-Objective Genetic Algorithm for Short-Term Economic Environmental Hydrothermal Scheduling. <i>Energies</i> , 2017 , 10, 163	3.1	37
55	Optimal operation of multi-reservoir hydropower systems using enhanced comprehensive learning particle swarm optimization. <i>Journal of Hydro-Environment Research</i> , 2016 , 10, 50-63	2.3	35
54	Wind speed prediction method based on Empirical Wavelet Transform and New Cell Update Long Short-Term Memory network. <i>Energy Conversion and Management</i> , 2019 , 196, 779-792	10.6	34

53	Two Dimension Reduction Methods for Multi-Dimensional Dynamic Programming and Its Application in Cascade Reservoirs Operation Optimization. <i>Water (Switzerland)</i> , 2017 , 9, 634	3	33
52	Comparison of support vector regression and extreme gradient boosting for decomposition-based data-driven 10-day streamflow forecasting. <i>Journal of Hydrology</i> , 2020 , 582, 124293	6	32
51	Deriving reservoir operation rule based on Bayesian deep learning method considering multiple uncertainties. <i>Journal of Hydrology</i> , 2019 , 579, 124207	6	30
50	A region search evolutionary algorithm for many-objective optimization. <i>Information Sciences</i> , 2019 , 488, 19-40	7.7	24
49	Short-term optimal operation of wind-solar-hydro hybrid system considering uncertainties. <i>Energy Conversion and Management</i> , 2020 , 205, 112405	10.6	22
48	Long-term joint scheduling of hydropower station group in the upper reaches of the Yangtze River using partition parameter adaptation differential evolution. <i>Engineering Applications of Artificial Intelligence</i> , 2019 , 81, 1-13	7.2	18
47	Research and application of key technologies in drawing energy storage operation chart by discriminant coefficient method. <i>Energy</i> , 2016 , 114, 774-786	7.9	17
46	Improved Multi-objective Moth-flame Optimization Algorithm based on R-domination for cascade reservoirs operation. <i>Journal of Hydrology</i> , 2020 , 581, 124431	6	16
45	Optimization for Hydro-Photovoltaic-Wind Power Generation System Based on Modified Version of Multi-Objective Whale Optimization Algorithm. <i>Energy Procedia</i> , 2019 , 158, 6208-6216	2.3	15
44	Monthly Operation Optimization of Cascade Hydropower Reservoirs with Dynamic Programming and Latin Hypercube Sampling for Dimensionality Reduction. <i>Water Resources Management</i> , 2020 , 34, 2029-2041	3.7	14
43	Multiobjective Reservoir Operation Optimization Using Improved Multiobjective Dynamic Programming Based on Reference Lines. <i>IEEE Access</i> , 2019 , 7, 103473-103484	3.5	14
42	. <i>IEEE Access</i> , 2019 , 7, 158170-158182	3.5	11
41	Middle and Long-Term Runoff Probabilistic Forecasting Based on Gaussian Mixture Regression. <i>Water Resources Management</i> , 2019 , 33, 1785-1799	3.7	11
40	The Chaos-Based Shuffled Frog Leaping Algorithm and Its Application 2008 ,		11
39	Interval prediction method based on Long-Short Term Memory networks for system integrated of hydro, wind and solar power. <i>Energy Procedia</i> , 2019 , 158, 6176-6182	2.3	10
38	Study on guaranteed output constraints in the long term joint optimal scheduling for the hydropower station group. <i>Energy</i> , 2019 , 185, 1210-1224	7.9	10
37	Multi-Objective Sustainable Operation of the Three Gorges Cascaded Hydropower System Using Multi-Swarm Comprehensive Learning Particle Swarm Optimization. <i>Energies</i> , 2016 , 9, 438	3.1	10
36	Multi-Step Ahead Short-Term Load Forecasting Using Hybrid Feature Selection and Improved Long Short-Term Memory Network. <i>Energies</i> , 2020 , 13, 4121	3.1	9

35	Medium-Term Hydro Generation Scheduling (MTHGS) with Chance Constrained Model (CCM) and Dynamic Control Model (DCM). <i>Water Resources Management</i> , 2017 , 31, 3543-3555	3.7	8
34	Flood Classification Based on a Fuzzy Clustering Iteration Model with Combined Weight and an Immune Grey Wolf Optimizer Algorithm. <i>Water (Switzerland)</i> , 2019 , 11, 80	3	8
33	A novel multi-objective electromagnetism-like mechanism algorithm with applications in reservoir flood control operation. <i>Water Science and Technology</i> , 2014 , 69, 1181-90	2.2	8
32	Identifying Efficient Operating Rules for Hydropower Reservoirs Using System Dynamics Approach—A Case Study of Three Gorges Reservoir, China. <i>Water (Switzerland)</i> , 2019 , 11, 2448	3	8
31	Dynamic programming with successive approximation and relaxation strategy for long-term joint power generation scheduling of large-scale hydropower station group. <i>Energy</i> , 2021 , 222, 119960	7.9	8
30	Operation rule extraction based on deep learning model with attention mechanism for wind-solar-hydro hybrid system under multiple uncertainties. <i>Renewable Energy</i> , 2021 , 170, 92-106	8.1	8
29	Risk Assessment and Decision-Making Based on Mean-CVaR-Entropy for Flood Control Operation of Large Scale Reservoirs. <i>Water (Switzerland)</i> , 2019 , 11, 649	3	7
28	Effect Analysis of Operation Stage Difference on Energy Storage Operation Chart of Cascade Reservoirs. <i>Water Resources Management</i> , 2019 , 33, 1349-1365	3.7	7
27	Non-dominated sorting culture differential evolution algorithm for multi-objective optimal operation of Wind- Solar-Hydro complementary power generation system. <i>Global Energy Interconnection</i> , 2019 , 2, 368-374	1.6	6
26	Multi-Objective Optimal Scheduling Model of Dynamic Control of Flood Limit Water Level for Cascade Reservoirs. <i>Water (Switzerland)</i> , 2019 , 11, 1836	3	6
25	Two-Dimensional Finite-Volume Eulerian-Lagrangian Method on Unstructured Grid for Solving Advective Transport of Passive Scalars in Free-Surface Flows. <i>Journal of Hydraulic Engineering</i> , 2017 , 143, 04017051	1.8	5
24	Causal Inference of Optimal Control Water Level and Inflow in Reservoir Optimal Operation Using Fuzzy Cognitive Map. <i>Water (Switzerland)</i> , 2019 , 11, 2147	3	4
23	Short-term runoff prediction using deep learning multi-dimensional ensemble method. <i>Journal of Hydrology</i> , 2022 , 609, 127762	6	4
22	Fast Comprehensive Flood Risk Assessment Based on Game Theory and Cloud Model Under Parallel Computation (P-GT-CM). <i>Water Resources Management</i> , 2020 , 34, 1625-1648	3.7	3
21	Enhanced Strength Pareto Differential Evolution (ESPDE): An Extension of Differential Evolution for Multi-objective Optimization 2008 ,		3
20	Directed graph deep neural network for multi-step daily streamflow forecasting. <i>Journal of Hydrology</i> , 2022 , 607, 127515	6	3
19	Variational Bayesian Neural Network for Ensemble Flood Forecasting. <i>Water (Switzerland)</i> , 2020 , 12, 2740	3	3
18	A Procedure for Combining Improved Correlated Sampling Methods and a Resampling Strategy to Generate a Multi-Site Conditioned Streamflow Process. <i>Water Resources Management</i> , 2021 , 35, 1011-1027	3.7	3

17	Short-Term Multi-Objective Optimal Operation of Reservoirs to Maximize the Benefits of Hydropower and Navigation. <i>Water (Switzerland)</i> , 2019 , 11, 1272	3	2
16	Analysis of an Ecological Flow Regime during the Ctenopharyngodon Idella Spawning Period Based on Reservoir Operations. <i>Water (Switzerland)</i> , 2019 , 11, 2034	3	2
15	Flood Disaster Classification Based on Fuzzy Clustering Iterative Model and Modified Differential Evolution Algorithm 2009 ,		2
14	Operation Rules Optimization of Cascade Reservoirs Based on Multi-Objective Tangent Algorithm. <i>IEEE Access</i> , 2019 , 7, 161949-161962	3.5	2
13	Solar Radiation Intensity Probabilistic Forecasting Based on K-Means Time Series Clustering and Gaussian Process Regression. <i>IEEE Access</i> , 2021 , 9, 89079-89092	3.5	2
12	Downstream Water Level Prediction of Reservoir based on Convolutional Neural Network and Long Short-Term Memory Network. <i>Journal of Water Resources Planning and Management - ASCE</i> , 2021 , 147, 04021060	2.8	2
11	Probabilistic spatiotemporal solar irradiation forecasting using deep ensembles convolutional shared weight long short-term memory network. <i>Applied Energy</i> , 2021 , 300, 117379	10.7	2
10	The Compound Consistency Induced Ordered Weighted Averaging operator and its application to reservoir operation 2010 ,		1
9	Long-term Optimal Scheduling of Cascade Hydropower Stations Using Fuzzy Multi-objective Dynamic Programming Approach 2011 ,		1
8	Adaptive Niche Multi-objective Particle Swarm Optimization Algorithm 2008 ,		1
7	Multi-objective optimal water supply scheduling model for an inter-basin water transfer system: the South-to-North Water Diversion Middle Route Project, China. <i>Water Science and Technology: Water Supply</i> , 2020 , 20, 550-564	1.4	1
6	Region search evolutionary algorithm with constraint handling for multi-objective short-term wind-solar-hydro-thermal scheduling. <i>E3S Web of Conferences</i> , 2021 , 233, 01018	0.5	1
5	Runoff Probability Prediction Model Based on Natural Gradient Boosting with Tree-Structured Parzen Estimator Optimization. <i>Water (Switzerland)</i> , 2022 , 14, 545	3	1
4	Global Increases in Compound Flood-Hot Extreme Hazards Under Climate Warming. <i>Geophysical Research Letters</i> ,	4.9	1
3	Hydrological probabilistic forecasting based on deep learning and Bayesian optimization algorithm 2021 , 52, 927-943		0
2	Assessing Variations in Water Use Efficiency and Linkages with Land-Use Changes Using Three Different Data Sources: A Case Study of the Yellow River, China. <i>Remote Sensing</i> , 2022 , 14, 1065	5	0
1	Consider the Risk Constraints of Hydro-Thermal Power Generation in Real-Time Strategy of Control. <i>IEEE Access</i> , 2021 , 1-1	3.5
