

Elias S Sotirchos

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/6612422/elias-s-sotirchos-publications-by-year.pdf>

Version: 2024-04-27

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
61	To treat or not to treat? A case of remote asynchronous bilateral optic neuritis with aquaporin-4 IgG seropositivity. <i>Neuroimmunology Reports</i> , 2022 , 2, 100069		
60	Type of serum collection tube does not impact neurofilament light chain levels.. <i>Multiple Sclerosis and Related Disorders</i> , 2022 , 59, 103676	4	0
59	OCT retinal nerve fiber layer thickness differentiates acute optic neuritis from MOG antibody-associated disease and Multiple Sclerosis: RNFL thickening in acute optic neuritis from MOGAD vs MS.. <i>Multiple Sclerosis and Related Disorders</i> , 2022 , 58, 103525	4	2
58	Retinal pathology in spontaneous opticospinal experimental autoimmune encephalitis mice.. <i>Journal of Neuroimmunology</i> , 2022 , 367, 577859	3.5	0
57	Leveraging Visual Outcome Measures to Advance Therapy Development in Neuroimmunologic Disorders.. <i>Neurology: Neuroimmunology and NeuroInflammation</i> , 2022 , 9,	9.1	6
56	Reply to "Interpretation of longitudinal changes of the inner nuclear layer in MS".. <i>Annals of Neurology</i> , 2022 ,	9.4	
55	Evidence of subclinical quantitative retinal layer abnormalities in AQP4-IgG seropositive NMOSD. <i>Multiple Sclerosis Journal</i> , 2021 , 27, 1738-1748	5	9
54	Treatment of myelin oligodendrocyte glycoprotein antibody associated disease with subcutaneous immune globulin.. <i>Multiple Sclerosis and Related Disorders</i> , 2021 , 57, 103462	4	1
53	Multi-omic evaluation of metabolic alterations in multiple sclerosis identifies shifts in aromatic amino acid metabolism. <i>Cell Reports Medicine</i> , 2021 , 2, 100424	18	5
52	Measuring treatment response to advance precision medicine for multiple sclerosis. <i>Annals of Clinical and Translational Neurology</i> , 2021 , 8, 2166-2173	5.3	2
51	Serum ceramide levels are altered in multiple sclerosis. <i>Multiple Sclerosis Journal</i> , 2021 , 27, 1506-1519	5	6
50	Modulation of Retinal Atrophy With Rituximab in Multiple Sclerosis. <i>Neurology</i> , 2021 , 96, e2525-e2533	6.5	2
49	Optic Neuritis-Independent Retinal Atrophy in Neuromyelitis Optica Spectrum Disorder. <i>Journal of Neuro-Ophthalmology</i> , 2021 ,	2.6	1
48	Risk Factors For Infection And Health Impacts Of The Covid-19 Pandemic In People With Autoimmune Diseases. <i>Clinical Infectious Diseases</i> , 2021 ,	11.6	7
47	MOGAD: How It Differs From and Resembles Other Neuroinflammatory Disorders. <i>American Journal of Roentgenology</i> , 2021 , 216, 1031-1039	5.4	11
46	Reply to "Retinal INL Thickness in Multiple Sclerosis: A Mere Marker of Neurodegeneration?". <i>Annals of Neurology</i> , 2021 , 89, 193-194	9.4	1
45	RISK FACTORS FOR INFECTION AND HEALTH IMPACTS OF THE COVID-19 PANDEMIC IN PEOPLE WITH AUTOIMMUNE DISEASES 2021 ,		2

44	Association of Spectral-Domain OCT With Long-term Disability Worsening in Multiple Sclerosis. <i>Neurology</i> , 2021 , 96, e2058-e2069	6.5	10
43	Therapeutic Potential of a Novel Glucagon-like Peptide-1 Receptor Agonist, NLY01, in Experimental Autoimmune Encephalomyelitis. <i>Neurotherapeutics</i> , 2021 , 18, 1834-1848	6.4	2
42	Evidence for and against subclinical disease activity and progressive disease in MOG antibody disease and neuromyelitis optica spectrum disorder. <i>Journal of Neuroimmunology</i> , 2021 , 360, 577702	3.5	1
41	AQP4-IgG and MOG-IgG Related Optic Neuritis-Prevalence, Optical Coherence Tomography Findings, and Visual Outcomes: A Systematic Review and Meta-Analysis. <i>Frontiers in Neurology</i> , 2020 , 11, 540156	4.1	24
40	Bile acid metabolism is altered in multiple sclerosis and supplementation ameliorates neuroinflammation. <i>Journal of Clinical Investigation</i> , 2020 , 130, 3467-3482	15.9	30
39	Optical Coherence Tomography and Optical Coherence Tomography Angiography Findings After Optic Neuritis in Multiple Sclerosis. <i>Frontiers in Neurology</i> , 2020 , 11, 618879	4.1	5
38	Effect of disease-modifying therapies on subcortical gray matter atrophy in multiple sclerosis. <i>Multiple Sclerosis Journal</i> , 2020 , 26, 312-321	5	12
37	Alterations in the retinal vasculature occur in multiple sclerosis and exhibit novel correlations with disability and visual function measures. <i>Multiple Sclerosis Journal</i> , 2020 , 26, 815-828	5	24
36	Aquaporin-4 IgG seropositivity is associated with worse visual outcomes after optic neuritis than MOG-IgG seropositivity and multiple sclerosis, independent of macular ganglion cell layer thinning. <i>Multiple Sclerosis Journal</i> , 2020 , 26, 1360-1371	5	35
35	Progressive Multiple Sclerosis Is Associated with Faster and Specific Retinal Layer Atrophy. <i>Annals of Neurology</i> , 2020 , 87, 885-896	9.4	30
34	Association of body mass index with longitudinal rates of retinal atrophy in multiple sclerosis. <i>Multiple Sclerosis Journal</i> , 2020 , 26, 843-854	5	10
33	Reporting of R2 Statistics for Mixed-Effects Regression Models. <i>JAMA Neurology</i> , 2019 , 76, 507	17.2	5
32	Retinal measurements predict 10-year disability in multiple sclerosis. <i>Annals of Clinical and Translational Neurology</i> , 2019 , 6, 222-232	5.3	24
31	DeepHarmony: A deep learning approach to contrast harmonization across scanner changes. <i>Magnetic Resonance Imaging</i> , 2019 , 64, 160-170	3.3	64
30	Spinal cord and infratentorial lesions in radiologically isolated syndrome are associated with decreased retinal ganglion cell/inner plexiform layer thickness. <i>Multiple Sclerosis Journal</i> , 2019 , 25, 1878-1887	5	5
29	Characteristics of morphologic macular abnormalities in neuroimmunology practice. <i>Multiple Sclerosis Journal</i> , 2019 , 25, 361-371	5	1
28	OCT is an alternative to MRI for monitoring MS - YES. <i>Multiple Sclerosis Journal</i> , 2018 , 24, 701-703	5	13
27	Brain and retinal atrophy in African-Americans versus Caucasian-Americans with multiple sclerosis: a longitudinal study. <i>Brain</i> , 2018 , 141, 3115-3129	11.2	29

26	JC virus granule cell neuronopathy onset two months after chemotherapy for low-grade lymphoma. <i>Cerebellum and Ataxias</i> , 2017 , 4, 8	1.7	0
25	Safety and immunologic effects of high- vs low-dose cholecalciferol in multiple sclerosis. <i>Neurology</i> , 2016 , 87, 446	6.5	
24	Safety and immunologic effects of high- vs low-dose cholecalciferol in multiple sclerosis. <i>Neurology</i> , 2016 , 87, 445-6	6.5	
23	Safety and immunologic effects of high- vs low-dose cholecalciferol in multiple sclerosis. <i>Neurology</i> , 2016 , 86, 382-90	6.5	90
22	Safety and immunologic effects of high- vs low-dose cholecalciferol in multiple sclerosis. <i>Neurology</i> , 2016 , 87, 1424	6.5	
21	Retinal damage and vision loss in African American multiple sclerosis patients. <i>Annals of Neurology</i> , 2015 , 77, 228-36	9.4	35
20	Relationships between quantitative spinal cord MRI and retinal layers in multiple sclerosis. <i>Neurology</i> , 2015 , 84, 720-8	6.5	43
19	Spinal cord normalization in multiple sclerosis. <i>Journal of Neuroimaging</i> , 2014 , 24, 577-584	2.8	25
18	Cerebrospinal fluid ceramides from patients with multiple sclerosis impair neuronal bioenergetics. <i>Brain</i> , 2014 , 137, 2271-86	11.2	97
17	Segmentation of retinal OCT images using a random forest classifier. <i>Proceedings of SPIE</i> , 2013 , 8669,	1.7	15
16	Optical coherence tomography in x-linked adrenoleukodystrophy. <i>Pediatric Neurology</i> , 2013 , 49, 182-4	2.9	5
15	Relationships between retinal axonal and neuronal measures and global central nervous system pathology in multiple sclerosis. <i>JAMA Neurology</i> , 2013 , 70, 34-43	17.2	161
14	In vivo identification of morphologic retinal abnormalities in neuromyelitis optica. <i>Neurology</i> , 2013 , 80, 1406-14	6.5	105
13	Active MS is associated with accelerated retinal ganglion cell/inner plexiform layer thinning. <i>Neurology</i> , 2013 , 80, 47-54	6.5	168
12	In vivo demonstration of homonymous hemimacular loss of retinal ganglion cells due to a thalamic lesion using optical coherence tomography. <i>JAMA Neurology</i> , 2013 , 70, 410-1	17.2	3
11	Comparison of point estimates and average thicknesses of retinal layers measured using manual optical coherence tomography segmentation for quantification of retinal neurodegeneration in multiple sclerosis. <i>Current Eye Research</i> , 2013 , 38, 224-8	2.9	11
10	DEFORMABLE REGISTRATION OF MACULAR OCT USING A-MODE SCAN SIMILARITY 2013 , 2013, 476-479	1.5	9
9	Retinal layer segmentation of macular OCT images using boundary classification. <i>Biomedical Optics Express</i> , 2013 , 4, 1133-52	3.5	208

8	In vivo assessment of retinal neuronal layers in multiple sclerosis with manual and automated optical coherence tomography segmentation techniques. <i>Journal of Neurology</i> , 2012 , 259, 2119-30	5.5	73
7	Microcystic macular oedema, thickness of the inner nuclear layer of the retina, and disease characteristics in multiple sclerosis: a retrospective study. <i>Lancet Neurology</i> , 2012 , 11, 963-72	24.1	216
6	Detection of clinical and subclinical retinal abnormalities in neurosarcoidosis with optical coherence tomography. <i>Journal of Neurology</i> , 2012 , 259, 1390-8	5.5	18
5	Monosymptomatic clinically isolated syndrome with sudden sensorineural hearing loss: case report and critical review of the literature. <i>Neurologist</i> , 2012 , 18, 302-5	1.6	5
4	Neurological picture. Nitrous oxide-induced myelopathy with inverted V-sign on spinal MRI. <i>Journal of Neurology, Neurosurgery and Psychiatry</i> , 2012 , 83, 915-6	5.5	13
3	Opsoclonus-myoclonus syndrome and exaggerated startle response associated with small-cell lung cancer. <i>Movement Disorders</i> , 2011 , 26, 1769-70	7	7
2	Optical coherence tomography and retinal segmentation in neurological diseases	156-164	1
1	Bile acid metabolism is altered in multiple sclerosis and supplementation ameliorates neuroinflammation		1
