#	ARTICLE	IF	CITATIONS
1	Electrical Degradation and Breakdown in Polymers. , 1992, , .		1,270
2	Anomalous low-frequency dispersion. Near direct current conductivity in disordered low-dimensional materials. Journal of the Chemical Society, Faraday Transactions 2, 1984, 80, 291.	1.1	311
3	Non-exponential decay in dielectrics and dynamics of correlated systems. Nature, 1979, 279, 685-689.	27.8	266
4	Polymeric HVDC Cable Design and Space Charge Accumulation. Part 1: Insulation/Semicon Interface. IEEE Electrical Insulation Magazine, 2007, 23, 11-19.	0.8	190
5	HVDC Cable Design and Space Charge Accumulation. Part 3: Effect of Temperature Gradient [Feature article]. IEEE Electrical Insulation Magazine, 2008, 24, 5-14.	0.8	160
6	Space charge formation and its modified electric field under applied voltage reversal and temperature gradient in XLPE cable. IEEE Transactions on Dielectrics and Electrical Insulation, 2008, 15, 851-860.	2.9	159
7	Models of bipolar charge transport in polyethylene. Journal of Applied Physics, 2006, 100, 104105.	2.5	151
8	Effect of tree channel conductivity on electrical tree shape and breakdown in XLPE cable insulation samples. IEEE Transactions on Dielectrics and Electrical Insulation, 2011, 18, 847-860.	2.9	136
9	Dielectric behaviour of materials undergoing dipole alignment transitions. The Philosophical Magazine: Physics of Condensed Matter B, Statistical Mechanics, Electronic, Optical and Magnetic Properties, 1980, 41, 625-642.	0.6	114
10	The fractal nature of the cluster model dielectric response functions. Journal of Applied Physics, 1989, 66, 2511-2524.	2.5	111
11	Electrical, microstructural, physical and chemical characterization of hv xlpe cable peelings for an electrical aging diagnostic data base. IEEE Transactions on Dielectrics and Electrical Insulation, 2003, 10, 514-527.	2.9	111
12	Stochastic modelling of electrical treeing: fractal and statistical characteristics. Journal Physics D: Applied Physics, 1990, 23, 1536-1545.	2.8	107
13	Physical model for breakdown structures in solid dielectrics. Physical Review B, 1993, 48, 16261-16268.	3.2	107
14	Debye and non-Debye relaxation. Journal of Physics C: Solid State Physics, 1985, 18, 3829-3836.	1.5	97
15	Theoretical basis for the statistics of dielectric breakdown. Journal Physics D: Applied Physics, 1990, 23, 1582-1591.	2.8	92
16	Fast and slow charge packets in polymeric materials under DC stress. IEEE Transactions on Dielectrics and Electrical Insulation, 2009, 16, 241-250.	2.9	90
17	Charge distribution and electroluminescence in cross-linked polyethylene under dc field. Journal Physics D: Applied Physics, 2001, 34, 2830-2844.	2.8	89
18	The measurement of very low conductivity and dielectric loss in XLPE cables: a possible method to detect degradation due to thermal aging. IEEE Transactions on Dielectrics and Electrical Insulation, 2011, 18, 1544-1553.	2.9	89

#	ARTICLE	IF	CITATIONS
19	Influence of thermal treatment and residues on space charge accumulation in XLPE for DC power cable application. IEEE Transactions on Dielectrics and Electrical Insulation, 2007, 14, 53-64.	2.9	84
20	The contribution of discharge area variation to partial discharge patterns in disc-voids. Journal Physics D: Applied Physics, 2004, 37, 1815-1823.	2.8	77
21	The temperature dependence of relaxation processes. Journal of Physics C: Solid State Physics, 1982, 15, 5171-5193.	1.5	74
22	Theoretical basis for the statistics of dielectric breakdown. Journal of Physics C: Solid State Physics, 1983, 16, 2145-2156.	1.5	74
23	Decay of space charge in a glassy epoxy resin following voltage removal. IEEE Transactions on Dielectrics and Electrical Insulation, 2006, 13, 903-916.	2.9	73
24	Dependence of charge accumulation on sample thickness in Nano-SiO ₂ doped IDPE. IEEE Transactions on Dielectrics and Electrical Insulation, 2013, 20, 337-345.	2.9	73
25	Electric field criteria for charge packet formation and movement in XLPE. IEEE Transactions on Dielectrics and Electrical Insulation, 2001, 8, 859-866.	2.9	66
26	A fractal interpretation of the dielectric response of animal tissues. Physics in Medicine and Biology, 1990, 35, 1487-1503.	3.0	63
27	Constant-phase-angle and power-law regimes in the frequency response of a general determinate fractal circuit. Physical Review B, 1988, 37, 3434-3439.	3.2	55
28	The effect of aluminium inclusions on the dielectric breakdown of polyethylene. Journal Physics D: Applied Physics, 1990, 23, 1554-1561.	2.8	55
29	Effect of long-time electrical and thermal stresses upon the endurance capability of cable insulation material. IEEE Transactions on Dielectrics and Electrical Insulation, 2009, 16, 1436-1443.	2.9	51
30	The low-frequency dielectric properties of leaves. Journal of Biological Physics, 1987, 15, 2-16.	1.5	49
31	Percolation model for electrical breakdown in insulating polymers. Applied Physics Letters, 2004, 85, 4454.	3.3	48
32	Examination of the statistics of dielectric breakdown. Journal of Physics C: Solid State Physics, 1983, 16, 4447-4468.	1.5	46
33	A deterministic model for branched structures in the electrical breakdown of solid polymeric dielectrics. Journal Physics D: Applied Physics, 2000, 33, L109-L112.	2.8	46
34	Study of the factors that suppress space charge accumulation in LDPE nanocomposites. IEEE Transactions on Dielectrics and Electrical Insulation, 2014, 21, 1670-1679.	2.9	46
35	Effect of electrical and thermal stressing on charge traps in XLPE cable insulation. IEEE Transactions on Dielectrics and Electrical Insulation, 2012, 19, 2145-2154.	2.9	45
36	Structure and dipole relaxation mechanisms in the cyclic alcohols cyclopentanol to cyclo-octanol. Journal of the Chemical Society, Faraday Transactions 2, 1983, 79, 369.	1.1	44

#	ARTICLE	IF	CITATIONS
37	Mechanism of space charge formation in cross linked polyethylene (XLPE) under temperature gradient. IEEE Transactions on Dielectrics and Electrical Insulation, 2015, 22, 3186-3196.	2.9	44
38	The dielectric response of Portulacaceae (Jade) leaves over an extended frequency range. Journal of Biological Physics, 1986, 14, 133-135.	1.5	42
39	A Study of the Factors Influencing Water Tree Growth. IEEE Transactions on Electrical Insulation, 1983, EI-18, 565-585.	0.8	39
40	A fractal pore model for Archie's law in sedimentary rocks. Journal Physics D: Applied Physics, 1992, 25, 32-37.	2.8	38
41	Flashover Characteristic of Epoxy Composites Filled With Different Micro-Inorganic Oxide Particles Under Nanosecond Pulse in Vacuum. IEEE Transactions on Plasma Science, 2009, 37, 195-203.	1.3	38
42	The role of bulk charge transport processes in electrical tree formation and breakdown mechanisms in epoxy resins. IEEE Transactions on Dielectrics and Electrical Insulation, 2016, 23, 3256-3266.	2.9	38
43	Censored Weibull statistics in the dielectric breakdown of thin oxide films. Journal of Physics C: Solid State Physics, 1986, 19, 6263-6285.	1.5	37
44	Dielectric Relaxation and the Structure of Condensed Matter. Physica Scripta, 1982, T1, 110-114.	2.5	34
45	A new conduction phenomenon observed in polyethylene and epoxy resin: Ultrafast soliton conduction. Journal of Polymer Science, Part B: Polymer Physics, 2011, 49, 1173-1182.	2.1	33
46	Fast soliton-like charge pulses in insulating polymers. Journal of Applied Physics, 2011, 109, .	2.5	31
47	Evidence for deterministic chaos as the origin of electrical tree breakdown structures in polymeric insulation. Physical Review B, 1995, 52, R16985-R16988.	3.2	30
48	Invariant behaviour classes for the response of simple fractal circuits. Journal of Physics Condensed Matter, 1991, 3, 9773-9790.	1.8	29
49	The Fading of Memory During the Regression of Structural Fluctuations. Advances in Chemical Physics, 2007, , 253-292.	0.3	28
50	Photoluminescence, recombination induced luminescence and electroluminescence in epoxy resin. Journal Physics D: Applied Physics, 2001, 34, 2534-2540.	2.8	27
51	Influence of adsorbed water on the dielectric response of a ceramic material. Journal of the Chemical Society Faraday Transactions I, 1984, 80, 325.	1.0	26
52	Dynamic scaling in the dielectric response of excised EMT-6 tumours undergoing hyperthermia. Physics in Medicine and Biology, 1995, 40, 1067-1084.	3.0	26
53	Statistical behavior of electrical breakdown in insulating polymers. Journal of Applied Physics, 2010, 107, .	2.5	26
54	The effect of dc poling duration on space charge relaxation in virgin XLPE cable peelings. Journal Physics D: Applied Physics, 2010, 43, 215401.	2.8	26

#	ARTICLE	IF	CITATIONS
55	Nonconductive long-range charge transport in hydrated biopolymers. Journal of Biological Physics, 1984, 12, 63-78.	1.5	25
56	Relaxation in elastic and viscoelastic materials. Journal of Materials Science, 1984, 19, 1576-1595.	3.7	25
57	Simulation of the effect of barriers upon electrical tree propagation. Journal Physics D: Applied Physics, 1992, 25, 113-119.	2.8	25
58	Measuring a possible HVDC insulation killer: fast charge pulses. IEEE Transactions on Dielectrics and Electrical Insulation, 2015, 22, 45-51.	2.9	25
59	Measurement of space-charge distributions in solid insulators under rapidly varying voltage using the high-voltage, high-speed pulsed electro-acoustic (PEA) apparatus. Measurement Science and Technology, 2001, 12, 1227-1234.	2.6	24
60	Re-examination of the dielectric spectra of epoxy resins: bulk charge transport and interfacial polarization peaks. IEEE Transactions on Dielectrics and Electrical Insulation, 2014, 21, 1330-1341.	2.9	24
61	The examination of correlated noise. Journal of Physics C: Solid State Physics, 1981, 14, 3915-3926.	1.5	22
62	Fast charge packet dynamics in XLPE insulated cable models. , 2007, , .		22
63	Estimating the inverse power law aging exponent for the DC aging of XLPE and its nanocomposites at different temperatures. IEEE Transactions on Dielectrics and Electrical Insulation, 2016, 23, 3504-3513.	2.9	22
64	Self-healing during electrical treeing: A feature of the two-phase liquid-solid nature of silicone gels. IEEE Transactions on Dielectrics and Electrical Insulation, 2016, 23, 757-767.	2.9	22
65	The hidden threat to HVDC polymeric insulation at design field: Solitonic conduction. IEEE Electrical Insulation Magazine, 2014, 30, 39-50.	0.8	21
66	Charge transport in thermally aged paper impregnated with natural ester oil. IEEE Transactions on Dielectrics and Electrical Insulation, 2014, 21, 2318-2328.	2.9	21
67	Analysis of electrical tree inception in silicone gels. IEEE Transactions on Dielectrics and Electrical Insulation, 2017, 24, 3974-3984.	2.9	21
68	Simulation of electrical ageing in insulating polymers using a quantitative physical model. Journal Physics D: Applied Physics, 2008, 41, 085412.	2.8	20
69	Dielectric examination of glass-forming systems. Part 1. "Simple systems. Journal of the Chemical Society, Faraday Transactions 2, 1982, 78, 625-638.	1.1	19
70	Application of thermoelectric aging models to polymeric insulation in cable geometry. IEEE Transactions on Dielectrics and Electrical Insulation, 2005, 12, 1-10.	2.9	19
71	Aging mechanisms of polymeric materials under DC electrical stress: A new approach and similarities to mechanical aging. IEEE Transactions on Dielectrics and Electrical Insulation, 2019, 26, 634-641.	2.9	19
72	Electroluminescence excitation mechanisms in an epoxy resin under divergent and uniform field. IEEE Transactions on Dielectrics and Electrical Insulation, 2002, 9, 150-160.	2.9	18

#	ARTICLE	IF	CITATIONS
73	Are nano-composites really better DC insulators? A study using silica nanoparticles in XLPE. IEEE Transactions on Dielectrics and Electrical Insulation, 2017, 24, 2268-2270.	2.9	18
74	Dielectric response of nano aluminium tri-hydrate filled silicone rubber. Composites Science and Technology, 2018, 163, 56-62.	7.8	18
75	Space charge accumulation due to ultra-fast charge packets in XLPE insulated cables: the effect of temperature and field. , 2009, , .		17
76	High mobility conduction in insulating polymers through fast soliton-like charge pulses. Journal of Physics: Conference Series, 2009, 183, 012010.	0.4	17
77	Pulse sequence analysis on PD data from electrical trees in flexible epoxy resins. , 2011, , .		17
78	A relationship between the amplitude of the susceptibility and the frequency of the maximum dielectric loss. Nature, 1979, 281, 286-287.	27.8	16
79	Co-operative effects in non-linear relaxation. Journal of Materials Science, 1981, 16, 638-648.	3.7	16
80	Examination of the dielectric susceptibility of poly(¹³ -benzyl-L-glutamate). Journal of the Chemical Society, Faraday Transactions 2, 1982, 78, 81-93.	1.1	16
81	Simulation of DC electrical ageing in insulating polymer films. IEEE Transactions on Dielectrics and Electrical Insulation, 2010, 17, 890-897.	2.9	16
82	Electrical trees in silicone gel: A combination of liquid and solid behaviour patterns. , 2013, , .		16
83	Dielectric response and space charge in epoxy impregnated paper composite laminates. IEEE Transactions on Dielectrics and Electrical Insulation, 2019, 26, 1532-1540.	2.9	16
84	Strong and Weak Exciton-Phonon Coupling in Molecular Crystals. Molecular Crystals and Liquid Crystals, 1978, 44, 309-321.	0.8	15
85	Comments on Many-Body Dielectric Relaxation in Solids. Physica Status Solidi (B): Basic Research, 1980, 102, 351-356.	1.5	14
86	Dynamic scaling and the first-order character of ferroelectric transitions. Journal of Physics C: Solid State Physics, 1983, 16, 4023-4039.	1.5	14
87	Space charge behaviour in epoxy laminates under high constant electric field. Journal Physics D: Applied Physics, 2005, 38, 2890-2898.	2.8	14
88	The Effect of Temperature Gradient on Space Charge and Electric Field Distribution of HVDC Cable Models. , 2006, , .		14
89	The Effect of Gamma Irradiation on Space Charge Behaviour and Dielectric Spectroscopy of Low-density Polyethylene. , 2007, , .		14
90	Temperature dependence of charge packet velocity in XLPE cable peelings. , 2007, , .		14

#	ARTICLE	IF	CITATIONS
91	The origin and nature of ‘charge packets’: A short review. , 2010, , .		14
92	A new method of estimating the inverse power law ageing parameter of XLPE based on step-stress tests. , 2013, , .		14
93	Dielectric breakdown in metal-loaded polyethylene. Journal of Physics Condensed Matter, 1989, 1, 3041-3045.	1.8	13
94	Model of ageing inception and growth from microvoids in polyethylene-based materials under AC voltage. , 2008, , .		13
95	Dielectric breakdown at sub-critical fields. Applied Physics Letters, 2018, 113, .	3.3	13
96	Electromagnetic dipole interaction in a condensed medium. Journal of Physics C: Solid State Physics, 1970, 3, 94-106.	1.5	12
97	Dielectric examination of glass-forming systems. Part 2.â€”Chloronaphthalene in pyridine. Journal of the Chemical Society, Faraday Transactions 2, 1982, 78, 639-655.	1.1	12
98	Ultra-fast space charge packets in nanostructured epoxy-based materials. , 2009, , .		12
99	Influence of the temperature on the dielectric properties of epoxy resins. , 2010, , .		12
100	A New Ultra Fast Conduction Mechanism in Insulating Polymer Nanocomposites. Journal of Nanotechnology, 2011, 2011, 1-11.	3.4	12
101	Influence of absorbed moisture on the dielectric properties of epoxy resins. , 2010, , .		11
102	The effect of mechanical relaxation on ultra-fast charge pulses in flexible epoxy resin nanocomposites. Applied Physics A: Materials Science and Processing, 2012, 107, 539-551.	2.3	11
103	Fast charge pulses: The evidence and its interpretation. , 2013, , .		11
104	Charge density stabilised local electron spin pair states in insulating polymers. Journal of Applied Physics, 2014, 116, 224901.	2.5	11
105	A Dielectric Study of the Solid Phases of M.B.B.A. Molecular Crystals and Liquid Crystals, 1986, 135, 65-91.	0.8	10
106	An analysis of field-dependent water tree growth models. IEEE Transactions on Electrical Insulation, 1988, 23, 345-356.	0.8	10
107	Improvement of PEA signal analysis using simulations for complex geometry samples. Journal Physics D: Applied Physics, 2002, 35, 19-24.	2.8	10
108	A novel electrical model of nerve and muscle using Pspice. Journal Physics D: Applied Physics, 2003, 36, 311-329.	2.8	10

#	ARTICLE	IF	CITATIONS
109	Investigation of effects of charge injection and intrinsic ionic carriers in low-density polyethylene and cross-linked polyethylene. Journal of Applied Physics, 2020, 127, .	2.5	10
110	Fast pulse-like conduction in XLPE based materials detected through charging current measurements. , 2010, , .		9
111	Simulation of electro-thermal ageing and breakdown in polymeric insulation under high frequency trapezoidal-wave pulses. IEEE Transactions on Dielectrics and Electrical Insulation, 2017, 24, 3766-3775.	2.9	9
112	Modeling for life estimation of HVDC cable insulation based on small-size specimens. IEEE Electrical Insulation Magazine, 2020, 36, 19-29.	0.8	9
113	Characterization of the Growth of Water Trees. IEEE Transactions on Electrical Insulation, 1982, EI-17, 392-398.	0.8	8
114	Influence of electrical fields on the nucleation of crystal growth in some cycloalcohols. Journal of the Chemical Society, Faraday Transactions 2, 1983, 79, 1443.	1.1	8
115	Ferroelectric response of dopants in finite-grain-sized perovskite ceramics. Journal of Physics C: Solid State Physics, 1983, 16, 4041-4055.	1.5	8
116	The dynamics of mechanical relaxation in polyisobutylene. Journal of Polymer Science, Polymer Physics Edition, 1984, 22, 1991-2008.	1.0	8
117	The Distribution in Length of Vented Water Trees. IEEE Transactions on Electrical Insulation, 1986, EI-21, 651-655.	0.8	8
118	Study of the space charge behavior in polyethylene nano-composites under temperature gradient. , 2011, , .		8
119	Dynamic scaling near the ferromagnetic phase transition of YIG. Journal of Physics C: Solid State Physics, 1981, 14, L649-L654.	1.5	7
120	Anomalous dielectric response of very small quantities of virgin, aged and failed silicone oil. IEEE Transactions on Dielectrics and Electrical Insulation, 2003, 10, 336-342.	2.9	7
121	Dielectric Response. , 2006, , 187-212.		7
122	Space charge measurements on different epoxy resin-alumina nanocomposites. , 2010, , .		7
123	Radiation Damping of Exciton States. Journal of Chemical Physics, 1968, 48, 516-517.	3.0	6
124	The dielectric properties of a commercial polyvinylchloride. Journal of Materials Science, 1985, 20, 3716-3728.	3.7	6
125	Is there an intermediate dipole glass state at the $\hat{1}\pm\hat{1}^2$ transition of K ₂ CrO ₄ ? Journal of Physics C: Solid State Physics, 1987, 20, L929-L933.	1.5	6
126	Short Time Interval Decay Measurement of Space Charge in Epoxy Resin. IEEE Transactions on Fundamentals and Materials, 2006, 126, 260-261.	0.2	6

#	ARTICLE	IF	CITATIONS
127	Study on suppression mechanism of space charge accumulation in nano-doped LDPE. , 2012, , .		6
128	Space charge formation and conductivity characteristics of PE and oil impregnated paper under a temperature gradient. , 2014, , .		6
