Version: 2024-02-01

43 papers	3,438 citations	304743 22 h-index	276875 41 g-index
49 all docs	49 docs citations	49 times ranked	3812 citing authors

#	Article	IF	Citations
1	Recalling prior experiences with a close other can fulfill the need for social connection.. Emotion, 2023, 23, 321-331.	1.8	3
2	Frontostriatal functional connectivity underlies self-enhancement during social evaluation. Social Cognitive and Affective Neuroscience, 2022, 17, 723-731.	3.0	2
3	Prosocial and Positive Health Behaviors During a Period of Chronic Stress Protect Socioemotional Well-Being. Affective Science, 2022, 3, 160-167.	2.6	4
4	Stress-Related Inflammation and Social Withdrawal in Mothers of a Child With Cancer: A 1-Year Follow-Up Study. Psychosomatic Medicine, 2022, 84, 141-150.	2.0	5
5	Neural Correlates of Attachment in Adolescents With Trauma: A Preliminary Study on Frustrative Non-Reward. Social Cognitive and Affective Neuroscience, 2022, , .	3.0	0
6	Resting (Tonic) Blood Pressure Is Associated With Sensitivity to Imagined and Acute Experiences of Social Pain: Evidence From Three Studies. Psychological Science, 2022, 33, 984-998.	3.3	3
7	Replication and extension of the link between the cardiovascular system and sensitivity to social pain in healthy adults. Social Neuroscience, 2021, 16, 265-276.	1.3	3
8	A body-to-mind perspective on social connection: Physical warmth potentiates brain activity to close others and subsequent feelings of social connection.. Emotion, 2021, 21, 812-822.	1.8	2
9	Relationships Between Early Maternal Warmth and Social Connection: A Randomized Clinical Trial With Naltrexone. Psychosomatic Medicine, 2021, 83, 924-931.	2.0	0
10	Beyond social withdrawal: New perspectives on the effects of inflammation on social behavior. Brain, Behavior, & Immunity - Health, 2021, 16, 100302.	2.5	16
11	Individual differences in resting-state connectivity and giving social support: implications for health. Social Cognitive and Affective Neuroscience, 2020, 15, 1076-1085.	3.0	10
12	Health neuroscience 2.0: integration with social, cognitive and affective neuroscience. Social Cognitive and Affective Neuroscience, 2020, 15, 1017-1023.	3.0	1
13	Opioids and social bonding: Effect of naltrexone on feelings of social connection and ventral striatum activity to close others.. Journal of Experimental Psychology: General, 2020, 149, 732-745.	2.1	21
14	The Resting Brain Sets Support-Giving in Motion: Dorsomedial Prefrontal Cortex Activity During Momentary Rest Primes Supportive Responding. Cerebral Cortex Communications, 2020, 1, tgaa081.	1.6	1
15	Physical and social warmth: Warmer daily body temperature is associated with greater feelings of social connection.. Emotion, 2020, 20, 1093-1097.	1.8	11
16	Naltrexone alters responses to social and physical warmth: implications for social bonding. Social Cognitive and Affective Neuroscience, 2019, 14, 471-479.	3.0	12
17	Sex Differences in the Relationship Between Inflammation and Reward Sensitivity: A Randomized Controlled Trial of Endotoxin. Biological Psychiatry: Cognitive Neuroscience and Neuroimaging, 2019, 4, 619-626.	1.5	31
18	Opioids and Social Connection. Current Directions in Psychological Science, 2018, 27, 85-90.	5.3	32

#	Article	IF	Citations
19	Neural Correlates of Giving Social Support: Differences Between Giving Targeted Versus Untargeted Support. Psychosomatic Medicine, 2018, 80, 724-732.	2.0	9
20	Self-compassion and responses to negative social feedback: The role of fronto-amygdala circuit connectivity. Self and Identity, 2018, 17, 723-738.	1.6	14
21	Taking rejection to heart: Associations between blood pressure and sensitivity to social pain. Biological Psychology, 2018, 139, 87-95.	2.2	11
22	Neural mechanisms of the link between giving social support and health. Annals of the New York Academy of Sciences, 2018, 1428, 33-50.	3.8	32
23	On the Benefits of Giving Social Support. Current Directions in Psychological Science, 2017, 26, 109-113.	5.3	111
24	In Sickness and in Health: The Co-Regulation of Inflammation and Social Behavior. Neuropsychopharmacology, 2017, 42, 242-253.	5.4	260
25	A Pilot Study Examining Physical and Social Warmth: Higher (Non-Febrile) Oral Temperature Is Associated with Greater Feelings of Social Connection. PLoS ONE, 2016, 11, e0156873.	2.5	16
26	The Neurobiology of Giving Versus Receiving Support. Psychosomatic Medicine, 2016, 78, 443-453.	2.0	52
27	Giving support to others reduces sympathetic nervous systemâ€related responses to stress. Psychophysiology, 2016, 53, 427-435.	2.4	78
28	Exposure to an inflammatory challenge enhances neural sensitivity to negative and positive social feedback. Brain, Behavior, and Immunity, 2016, 57, 21-29.	4.1	106
29	Opioids and social bonding: naltrexone reduces feelings of social connection. Social Cognitive and Affective Neuroscience, 2016, 11, 728-735.	3.0	71
30	Yearning for connection? Loneliness is associated with increased ventral striatum activity to close others. Social Cognitive and Affective Neuroscience, 2016, 11, 1096-1101.	3.0	71
31	Blocking opioids attenuates physical warmth-induced feelings of social connection.. Emotion, 2015, 15, 494-500.	1.8	36
32	The role of the ventral striatum in inflammatory-induced approach toward support figures. Brain, Behavior, and Immunity, 2015, 44, 247-252.	4.1	99
33	Shared Neural Mechanisms Underlying Social Warmth and Physical Warmth. Psychological Science, 2013, 24, 2272-2280.	3.3	103
34	Neural Correlates of Giving Support to a Loved One. Psychosomatic Medicine, 2012, 74, 3-7.	2.0	108
35	Inflammation selectively enhances amygdala activity to socially threatening images. NeuroImage, 2012, 59, 3222-3226.	4.2	210
36	Prediction-error in the context of real social relationships modulates reward system activity. Frontiers in Human Neuroscience, 2012, 6, 218.	2.0	14

#	Article	IF	Citations
37	Attachment figures activate a safety signal-related neural region and reduce pain experience. Proceedings of the National Academy of Sciences of the United States of America, 2011, 108, 11721-11726.	7.1	387
38	Subjective responses to emotional stimuli during labeling, reappraisal, and distraction.. Emotion, 2011, 11, 468-480.	1.8	210
39	The Neural Sociometer: Brain Mechanisms Underlying State Self-esteem. Journal of Cognitive Neuroscience, 2011, 23, 3448-3455.	2.3	177
40	The Neural Correlates of Persuasion: A Common Network across Cultures and Media. Journal of Cognitive Neuroscience, 2010, 22, 2447-2459.	2.3	44
41	Inflammation-Induced Anhedonia: Endotoxin Reduces Ventral Striatum Responses to Reward. Biological Psychiatry, 2010, 68, 748-754.	1.3	452
42	Inflammation and social experience: An inflammatory challenge induces feelings of social disconnection in addition to depressed mood. Brain, Behavior, and Immunity, 2010, 24, 558-563.	4.1	322
43	An fMRI study of cytokine-induced depressed mood and social pain: The role of sex differences. NeuroImage, 2009, 47, 881-890.	4.2	284
