#	ARTICLE	IF	CITATIONS
1	Empagliflozin Improves Insulin Sensitivity of the Hypothalamus in Humans With Prediabetes: A Randomized, Double-Blind, Placebo-Controlled, Phase 2 Trial. <i>Diabetes Care</i> , 2022, 45, 398-406.	8.6	43
2	The German Gestational Diabetes Study (PREG), a prospective multicentre cohort study: rationale, methodology and design. <i>BMJ Open</i> , 2022, 12, e058268.	1.9	5
3	Pre-pregnancy BMI but not mild stress directly influences Interleukin-6 levels and insulin sensitivity during late pregnancy. <i>Frontiers in Bioscience</i> , 2022, 27, 056.	2.1	0
4	Incretin Hypersecretion in Gestational Diabetes Mellitus. <i>Journal of Clinical Endocrinology and Metabolism</i> , 2022, 107, e2425-e2430.	3.6	10
5	Evaluation of parameters for fetal behavioural state classification. <i>Scientific Reports</i> , 2022, 12, 3410.	3.3	4
6	Obesity and Impaired Metabolic Health Increase Risk of COVID-19-Related Mortality in Young and Middle-Aged Adults to the Level Observed in Older People: The LEOSS Registry. <i>Frontiers in Medicine</i> , 2022, 9, .	2.6	17
7	Sex differences in central insulin action: Effect of intranasal insulin on neural food cue reactivity in adults with normal weight and overweight. <i>International Journal of Obesity</i> , 2022, 46, 1662-1670.	3.4	10
8	Erhöhtes mütterliches Stressempfinden bei Gestationsdiabetes während der COVID-19 Pandemie. <i>Diabetologie Und Stoffwechsel</i> , 2022, , .	0.0	1
9	Pregnancy outcome in women with polycystic ovary syndrome in relation to second-trimester testosterone levels. <i>Reproductive BioMedicine Online</i> , 2021, 42, 217-225.	2.4	20
10	Pregnant women do not display impaired memory formation across one night of sleep. <i>Journal of Sleep Research</i> , 2021, 30, e13204.	3.2	2
11	Tracking evoked responses to auditory and visual stimuli in fetuses exposed to maternal high-risk conditions. <i>Developmental Psychobiology</i> , 2021, 63, 5-15.	1.6	1
12	Diminished prefrontal cortex activation in patients with binge eating disorder associates with trait impulsivity and improves after impulsivity-focused treatment based on a randomized controlled IMPULS trial. <i>NeuroImage: Clinical</i> , 2021, 30, 102679.	2.7	24
13	No Effect of Lifestyle Intervention during Third Trimester on Brain Programming in Fetuses of Mothers with Gestational Diabetes. <i>Nutrients</i> , 2021, 13, 556.	4.1	1
14	Body composition in term offspring after maternal gestational diabetes does not predict postnatal hypoglycemia. <i>BMC Pediatrics</i> , 2021, 21, 111.	1.7	5
15	The first prior: From co-embodiment to co-homeostasis in early life. <i>Consciousness and Cognition</i> , 2021, 91, 103117.	1.5	30
16	Magnetoencephalographic signatures of conscious processing before birth. <i>Developmental Cognitive Neuroscience</i> , 2021, 49, 100964.	4.0	18
17	Central Insulin Modulates Dopamine Signaling in the Human Striatum. <i>Journal of Clinical Endocrinology and Metabolism</i> , 2021, 106, 2949-2961.	3.6	24
18	Detection of diabetes from whole-body MRI using deep learning. <i>JCI Insight</i> , 2021, 6, .	5.0	10

#	ARTICLE	IF	CITATIONS
19	Acute relaxation during pregnancy leads to a reduction in maternal electrodermal activity and self-reported stress levels. <i>BMC Pregnancy and Childbirth</i> , 2021, 21, 628.	2.4	2
20	Dynamics of nonlinguistic statistical learning: From neural entrainment to the emergence of explicit knowledge. <i>NeuroImage</i> , 2021, 240, 118378.	4.2	18
21	Competing influences on healthy food choices: Mindsetting versus contextual food cues. <i>Appetite</i> , 2021, 166, 105476.	3.7	6
22	Slow deep breathing modulates cardiac vagal activity but does not affect peripheral glucose metabolism in healthy men. <i>Scientific Reports</i> , 2021, 11, 20306.	3.3	4
23	Maternal eating disorder severity is associated with increased latency of foetal auditory event-related brain responses. <i>European Eating Disorders Review</i> , 2021, 30, 75.	4.1	3
24	Health, pleasure, and fullness: changing mindset affects brain responses and portion size selection in adults with overweight and obesity. <i>International Journal of Obesity</i> , 2020, 44, 428-437.	3.4	22
25	Insulin Action in the Hypothalamus Increases Second-Phase Insulin Secretion in Humans. <i>Neuroendocrinology</i> , 2020, 110, 929-937.	2.5	23
26	Maternal Weight, Weight Gain, and Metabolism are Associated with Changes in Fetal Heart Rate and Variability. <i>Obesity</i> , 2020, 28, 114-121.	3.0	22
27	Magnetoencephalographic signatures of hierarchical rule learning in newborns. <i>Developmental Cognitive Neuroscience</i> , 2020, 46, 100871.	4.0	15
28	Insulin sensitivity predicts cognitive decline in individuals with prediabetes. <i>BMJ Open Diabetes Research and Care</i> , 2020, 8, e001741.	2.8	42
29	A pilot study: Auditory steady-state responses (ASSR) can be measured in human fetuses using fetal magnetoencephalography (fMEG). <i>PLoS ONE</i> , 2020, 15, e0235310.	2.5	4
30	Investigating obesity-associated brain inflammation using quantitative water content mapping. <i>Journal of Neuroendocrinology</i> , 2020, 32, e12907.	2.6	22
31	No modulation of postprandial metabolism by transcutaneous auricular vagus nerve stimulation: a cross-over study in 15 healthy men. <i>Scientific Reports</i> , 2020, 10, 20466.	3.3	15
32	Studying the Effect of Maternal Pregestational Diabetes on Fetal Neurodevelopment Using Magnetoencephalography. <i>Clinical EEG and Neuroscience</i> , 2020, 51, 331-338.	1.7	8
33	Spotlight on the fetus: how physical activity during pregnancy influences fetal health: a narrative review. <i>BMJ Open Sport and Exercise Medicine</i> , 2020, 6, e000658.	2.9	15
34	Brain insulin sensitivity is linked to adiposity and body fat distribution. <i>Nature Communications</i> , 2020, 11, 1841.	12.8	81
35	Central nervous pathways of insulin action in the control of metabolism and food intake. <i>Lancet Diabetes and Endocrinology</i> , 2020, 8, 524-534.	11.4	126
36	Neuroimaging of hypothalamic mechanisms related to glucose metabolism in anorexia nervosa and obesity. <i>Journal of Clinical Investigation</i> , 2020, 130, 4094-4103.	8.2	25

#	ARTICLE	IF	CITATIONS
37	148-OR: Empagliflozin Improves Insulin Sensitivity of the Hypothalamus in Humans with Prediabetes. Diabetes, 2020, 69, 148-OR.	0.6	0
38	150-OR: Brain Insulin Sensitivity Is Modulated by Menstrual Cycle. Diabetes, 2020, 69, 150-OR.	0.6	1
39	102-OR: Detection of Diabetes from Whole-Body Magnetic Resonance Imaging Using Deep Learning. Diabetes, 2020, 69, 102-OR.	0.6	1
40	1324-P: GLP-1 Hypersecretion in Gestational Diabetes. Diabetes, 2020, 69, .	0.6	0
41	1099-P: Effects of Empagliflozin on Glucose Metabolism and Body Fat Composition in Patients with Prediabetes: A Randomized, Double-Blind, Placebo-Controlled Trial. Diabetes, 2020, 69, 1099-P.	0.6	1
42	Neuroendocrinology and brain imaging. Journal of Neuroendocrinology, 2020, 32, e12927.	2.6	0
43	Functional Connectivity Within the Gustatory Network Is Altered by Fat Content and Oral Fat Sensitivity â€“ A Pilot Study. Frontiers in Neuroscience, 2019, 13, 725.	2.8	10
44	Fully Automated Subtraction of Heart Activity for Fetal Magnetoencephalography Data. , 2019, 2019, 5685-5689.		7
45	Changes in event-related brain responses and habituation during child development â€“ A systematic literature review. Clinical Neurophysiology, 2019, 130, 2238-2254.	1.5	5
46	Evaluating Complexity of Fetal MEG Signals: A Comparison of Different Metrics and Their Applicability. Frontiers in Systems Neuroscience, 2019, 13, 23.	2.5	11
47	Heart rate variability categories of fluctuation amplitude and complexity: diagnostic markers of fetal development and its disturbances. Physiological Measurement, 2019, 40, 064002.	2.1	20
48	The Impact of Maternal Eating Disorders on Dietary Intake and Eating Patterns during Pregnancy: A Systematic Review. Nutrients, 2019, 11, 840.	4.1	29
49	Good practice in food-related neuroimaging. American Journal of Clinical Nutrition, 2019, 109, 491-503.	4.7	56
50	Fully Automated R-peak Detection Algorithm (FLORA) for fetal magnetoencephalographic data. Computer Methods and Programs in Biomedicine, 2019, 173, 35-41.	4.7	7
51	Real-time fMRI neurofeedback training to improve eating behavior by self-regulation of the dorsolateral prefrontal cortex: A randomized controlled trial in overweight and obese subjects. NeuroImage, 2019, 191, 596-609.	4.2	58
52	Automated Detection of Fetal Brain Signals with Principal Component Analysis. , 2019, 2019, 6549-6552.		4
53	Neonatal body composition: cross-sectional study in healthy term singletons in Germany. BMC Pediatrics, 2019, 19, 488.	1.7	7
54	Food Meets Brain. , 2019, , 1227-1246.		0
