## Benjamin Schuster-Bckler

## List of Publications by Year in Descending Order

**Source:** https://exaly.com/author-pdf/6650699/benjamin-schuster-bockler-publications-by-year.pdf

Version: 2024-04-09

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

21
papers

3,309
citations

16
papers

| #                        | Paper   | IF                                 | Citations                   |
|--------------------------|---|------------------------------------|-----------------------------|
| 21                       | Cell-free DNA TAPS provides multimodal information for early cancer detection. <i>Science Advances</i> , <b>2021</b> , 7, eabh0534  | 14.3                               | 1                           |
| 20                       | Cytosine Methylation Affects the Mutability of Neighboring Nucleotides in Germline and Soma. <i>Genetics</i> , <b>2020</b> , 214, 809-823   | 4                                  | 8                           |
| 19                       | Bisulfite-free direct detection of 5-methylcytosine and 5-hydroxymethylcytosine at base resolution. <i>Nature Biotechnology</i> , <b>2019</b> , 37, 424-429   | 44.5                               | 135                         |
| 18                       | BEARscc determines robustness of single-cell clusters using simulated technical replicates. <i>Nature Communications</i> , <b>2018</b> , 9, 1187  | 17.4                               | 16                          |
| 17                       | The effects of mutational processes and selection on driver mutations across cancer types. <i>Nature Communications</i> , <b>2018</b> , 9, 1857   | 17.4                               | 59                          |
| 16                       | DNA Replication and associated repair pathways are involved in the mutagenesis of methylated cytosine. <i>DNA Repair</i> , <b>2018</b> , 62, 1-7  | 4.3                                | 15                          |
| 15                       | Single cell RNA-seq reveals profound transcriptional similarity between Barrettfs oesophagus and oesophageal submucosal glands. <i>Nature Communications</i> , <b>2018</b> , 9, 4261  | 17.4                               | 37                          |
| 14                       | Mutational signature distribution varies with DNA replication timing and strand asymmetry. <i>Genome Biology</i> , <b>2018</b> , 19, 129  | 18.3                               | 56                          |
|                          |   |                                    |                             |
| 13                       | DNA Modifications: Naturally More Error Prone?. <i>Trends in Genetics</i> , <b>2018</b> , 34, 627-638   | 8.5                                | 16                          |
| 13                       | DNA Modifications: Naturally More Error Prone?. <i>Trends in Genetics</i> , <b>2018</b> , 34, 627-638  The importance of p53 pathway genetics in inherited and somatic cancer genomes. <i>Nature Reviews Cancer</i> , <b>2016</b> , 16, 251-65  | 31.3                               | 93                          |
|                          | The importance of p53 pathway genetics in inherited and somatic cancer genomes. <i>Nature Reviews</i>   |                                    |                             |
| 12                       | The importance of p53 pathway genetics in inherited and somatic cancer genomes. <i>Nature Reviews Cancer</i> , <b>2016</b> , 16, 251-65  5-hydroxymethylcytosine marks regions with reduced mutation frequency in human DNA. <i>ELife</i> ,   | 31.3                               | 93                          |
| 12                       | The importance of p53 pathway genetics in inherited and somatic cancer genomes. <i>Nature Reviews Cancer</i> , <b>2016</b> , 16, 251-65  5-hydroxymethylcytosine marks regions with reduced mutation frequency in human DNA. <i>ELife</i> , <b>2016</b> , 5,  Chromatin organization is a major influence on regional mutation rates in human cancer cells.   | 31.3                               | 93                          |
| 12<br>11<br>10           | The importance of p53 pathway genetics in inherited and somatic cancer genomes. <i>Nature Reviews Cancer</i> , <b>2016</b> , 16, 251-65  5-hydroxymethylcytosine marks regions with reduced mutation frequency in human DNA. <i>ELife</i> , <b>2016</b> , 5,  Chromatin organization is a major influence on regional mutation rates in human cancer cells. <i>Nature</i> , <b>2012</b> , 488, 504-7  | 31.3<br>8.9<br>50.4                | 93<br>22<br>451             |
| 12<br>11<br>10           | The importance of p53 pathway genetics in inherited and somatic cancer genomes. <i>Nature Reviews Cancer</i> , <b>2016</b> , 16, 251-65  5-hydroxymethylcytosine marks regions with reduced mutation frequency in human DNA. <i>ELife</i> , <b>2016</b> , 5,  Chromatin organization is a major influence on regional mutation rates in human cancer cells. <i>Nature</i> , <b>2012</b> , 488, 504-7  Dosage sensitivity shapes the evolution of copy-number varied regions. <i>PLoS ONE</i> , <b>2010</b> , 5, e9474   | 31.3<br>8.9<br>50.4<br>3.7         | 93<br>22<br>451<br>76       |
| 12<br>11<br>10<br>9<br>8 | The importance of p53 pathway genetics in inherited and somatic cancer genomes. <i>Nature Reviews Cancer</i> , <b>2016</b> , 16, 251-65  5-hydroxymethylcytosine marks regions with reduced mutation frequency in human DNA. <i>ELife</i> , <b>2016</b> , 5,  Chromatin organization is a major influence on regional mutation rates in human cancer cells. <i>Nature</i> , <b>2012</b> , 488, 504-7  Dosage sensitivity shapes the evolution of copy-number varied regions. <i>PLoS ONE</i> , <b>2010</b> , 5, e9474  Protein interactions in human genetic diseases. <i>Genome Biology</i> , <b>2008</b> , 9, R9  Large-scale screening for novel low-affinity extracellular protein interactions. <i>Genome Research</i> , | 31.3<br>8.9<br>50.4<br>3.7<br>18.3 | 93<br>22<br>451<br>76<br>94 |

## LIST OF PUBLICATIONS

| 4 | Pfam: clans, web tools and services. <i>Nucleic Acids Research</i> , <b>2006</b> , 34, D247-51              | 20.1 | 1784 |
|---|---|------|------|
| 3 | Visualizing profile-profile alignment: pairwise HMM logos. <i>Bioinformatics</i> , <b>2005</b> , 21, 2912-3 | 7.2  | 34   |
| 2 | HMM Logos for visualization of protein families. <i>BMC Bioinformatics</i> , <b>2004</b> , 5, 7             | 3.6  | 176  |
| 1 | Widespread impact of DNA replication on mutational mechanisms in cancer                                     |      | 4    |
