

Xiaoqing Yang

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/6653937/xiaoqing-yang-publications-by-year.pdf>

Version: 2024-04-29

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
57	A simple cooling structure with precisely-tailored liquid cooling plate for thermal management of large battery module. <i>Applied Thermal Engineering</i> , 2022 , 212, 118575	5.8	0
56	Flexible phase change materials obtained from a simple solvent-evaporation method for battery thermal management. <i>Journal of Energy Storage</i> , 2021 , 44, 103447	7.8	2
55	Ultrareliable Composite Phase Change Material for Battery Thermal Management Derived from a Rationally Designed Phase Changeable and Hydrophobic Polymer Skeleton. <i>ACS Applied Energy Materials</i> , 2021 , 4, 3832-3841	6.1	4
54	Series of solid-solid phase change materials with ultra-high thermal stability and controllable phase change temperature: kilogram-levelled preparation and application investigation. <i>Journal of Energy Storage</i> , 2021 , 36, 102405	7.8	4
53	Experimental study of a novel strategy to construct the battery thermal management module by using tubular phase change material units. <i>Journal of Energy Storage</i> , 2021 , 39, 102585	7.8	11
52	Preparation of mesoporous carbon aerogels via ambient pressure drying using a self-sacrificing melamine-formaldehyde template. <i>Journal of Power Sources</i> , 2021 , 482, 229135	8.9	2
51	Preparation of Quasi-Thermoplastic Phase Change Polymer with Intrinsic Antileakage Performance for Battery Thermal Management. <i>Advanced Materials Interfaces</i> , 2021 , 8, 2100807	4.6	0
50	Preparation of Composite Cooling Boards Composed of Thermal Conductive Silica Gel and Phase Change Materials for Battery Thermal Management. <i>Energy & Fuels</i> , 2021 , 35, 13466-13473	4.1	4
49	Nitrogen, Sulfur, and Phosphorus Codoped Hollow Carbon Microtubes Derived from Silver Willow Blossoms as a High-Performance Anode for Sodium-Ion Batteries. <i>Energy & Fuels</i> , 2021 , 35, 2795-2804	4.1	8
48	A novel thermal management structure using serpentine phase change material coupled with forced air convection for cylindrical battery modules. <i>Journal of Power Sources</i> , 2020 , 468, 228398	8.9	74
47	Custom design of solid-solid phase change material with ultra-high thermal stability for battery thermal management. <i>Journal of Materials Chemistry A</i> , 2020 , 8, 14624-14633	13	51
46	Promotion effect of strong metal-support interaction to thermocatalytic, photocatalytic, and photothermocatalytic oxidation of toluene on Pt/SrTiO. <i>Chemosphere</i> , 2020 , 249, 126096	8.4	15
45	Durability of phase-change-material module and its relieving effect on battery deterioration during long-term cycles. <i>Applied Thermal Engineering</i> , 2020 , 179, 115747	5.8	39
44	Optimization of liquid cooling technology for cylindrical power battery module. <i>Applied Thermal Engineering</i> , 2019 , 162, 114200	5.8	21
43	Experimental investigation on a novel liquid-cooling strategy by coupling with graphene-modified silica gel for the thermal management of cylindrical battery. <i>Applied Thermal Engineering</i> , 2019 , 159, 113885	5.8	28
42	Optimization of the detailed factors in a phase-change-material module for battery thermal management. <i>International Journal of Heat and Mass Transfer</i> , 2019 , 138, 126-134	4.9	64
41	Silica/Carbon Composites with Controllable Nanostructure from a Facile One-Step Method for Lithium-Ion Batteries Application. <i>Advanced Materials Interfaces</i> , 2019 , 6, 1801809	4.6	12

40	Experimental research on the effective heating strategies for a phase change material based power battery module. <i>International Journal of Heat and Mass Transfer</i> , 2019 , 128, 392-400	4.9	37
39	A phase change material with enhanced thermal conductivity and secondary heat dissipation capability by introducing a binary thermal conductive skeleton for battery thermal management. <i>Applied Thermal Engineering</i> , 2019 , 148, 984-991	5.8	96
38	A novel nanosilica-enhanced phase change material with anti-leakage and anti-volume-changes properties for battery thermal management. <i>Energy Conversion and Management</i> , 2018 , 163, 250-259	10.6	110
37	Investigation on the root cause of the decreased performances in the overcharged lithium iron phosphate battery. <i>International Journal of Energy Research</i> , 2018 , 42, 2448-2455	4.5	11
36	A thermal conductive composite phase change material with enhanced volume resistivity by introducing silicon carbide for battery thermal management. <i>Applied Thermal Engineering</i> , 2018 , 144, 551-557	5.8	38
35	Fabrication of In ₂ O ₃ /TiO ₂ nanotube arrays hybrids with homogeneously developed nanostructure for photocatalytic degradation of Rhodamine B. <i>Materials Research Bulletin</i> , 2018 , 106, 197-203	5.1	11
34	Crosslinking-induced spontaneous growth: A novel strategy for synthesizing sandwich-type graphene@Fe ₃ O ₄ dots/amorphous carbon with high lithium storage performance. <i>Chemical Engineering Journal</i> , 2018 , 334, 1614-1620	14.7	53
33	Identification of the Nearby Hydroxyls Role in Promoting HCHO Oxidation over a Pt Catalyst. <i>Industrial & Engineering Chemistry Research</i> , 2018 , 57, 8183-8189	3.9	11
32	Nanoporous Carbon with Hierarchically Fiber-Like Nanostructure for Lithium Ion Batteries Application. <i>Energy Technology</i> , 2018 , 6, 2344-2349	3.5	2
31	Hierarchical porous carbon with ultrahigh surface area from corn leaf for high-performance supercapacitors application. <i>Journal Physics D: Applied Physics</i> , 2017 , 50, 055501	3	26
30	Mesopore-dominant wormhole-like carbon with high supercapacitive performance in organic electrolyte. <i>RSC Advances</i> , 2017 , 7, 15096-15101	3.7	11
29	Experimental investigation on the thermal performance of heat pipe-assisted phase change material based battery thermal management system. <i>Energy Conversion and Management</i> , 2017 , 138, 486-492	10.6	199
28	Investigation on the applicable pore size of nanoporous carbon for electrochemical double-layer formation at different current densities. <i>Electrochimica Acta</i> , 2017 , 241, 189-196	6.7	13
27	Activated Carbon Fibers with Hierarchical Nanostructure Derived from Waste Cotton Gloves as High-Performance Electrodes for Supercapacitors. <i>Nanoscale Research Letters</i> , 2017 , 12, 379	5	25
26	Nitrogen-Doped Mesoporous Carbons for Supercapacitor Electrodes with High Specific Volumetric Capacitance. <i>Langmuir</i> , 2017 , 33, 3975-3981	4	26
25	A thermal management system for rectangular LiFePO ₄ battery module using novel double copper mesh-enhanced phase change material plates. <i>Energy</i> , 2017 , 141, 613-623	7.9	54
24	Fabrication of Fe O Dots Embedded in 3D Honeycomb-Like Carbon Based on Metallo-Organic Molecule with Superior Lithium Storage Performance. <i>Small</i> , 2017 , 13, 1701351	11	40
23	Researches of composite phase change material cooling/resistance wire preheating coupling system of a designed 18650-type battery module. <i>Applied Thermal Engineering</i> , 2017 , 127, 176-183	5.8	28

22	High performance anode of lithium-ion batteries derived from an advanced carbonaceous porous network. <i>Journal of Alloys and Compounds</i> , 2017 , 693, 777-781	5.7	32
21	Effect of high temperature environment on the performance of LiNi _{0.5} Co _{0.2} Mn _{0.3} O ₂ battery. <i>International Journal of Heat and Mass Transfer</i> , 2017 , 104, 743-748	4.9	32
20	Experimental study on a novel battery thermal management technology based on low density polyethylene-enhanced composite phase change materials coupled with low fins. <i>Applied Energy</i> , 2016 , 178, 376-382	10.7	135
19	Activated carbon aerogels with developed mesoporosity as high-rate anodes in lithium-ion batteries. <i>Journal of Materials Science</i> , 2016 , 51, 5565-5571	4.3	33
18	Nitrogen-enriched carbon with extremely high mesoporosity and tunable mesopore size for high-performance supercapacitors. <i>Journal of Power Sources</i> , 2016 , 319, 66-72	8.9	34
17	Preparation of BiOBr/BiVO ₄ composite and its application for photocatalytic degradation under visible light. <i>Materials Research Innovations</i> , 2016 , 20, 230-234	1.9	2
16	An experimental study of thermal management system using copper mesh-enhanced composite phase change materials for power battery pack. <i>Energy</i> , 2016 , 113, 909-916	7.9	113
15	Polystyrene-derived carbon with hierarchical macro/meso/microporous structure for high-rate lithium-ion batteries application. <i>Journal of Materials Science</i> , 2015 , 50, 6649-6655	4.3	19
14	Mesopore-dominant activated carbon aerogels with high surface area for electric double-layer capacitor application. <i>Materials Letters</i> , 2015 , 161, 538-541	3.3	28
13	Carbon aerogel with 3-D continuous skeleton and mesopore structure for lithium-ion batteries application. <i>Materials Chemistry and Physics</i> , 2015 , 149-150, 657-662	4.4	35
12	Electrolytic treatment of industrial circulating cooling water using titanium/ ruthenium/ iridium anode and stainless steel cathode. <i>Desalination and Water Treatment</i> , 2015 , 56, 905-911		3
11	Preparation and thermal conductivity enhancement of composite phase change materials for electronic thermal management. <i>Energy Conversion and Management</i> , 2015 , 101, 278-284	10.6	113
10	Electrochemically active, crystalline, mesoporous covalent organic frameworks on carbon nanotubes for synergistic lithium-ion battery energy storage. <i>Scientific Reports</i> , 2015 , 5, 8225	4.9	243
9	Preparation of Ti mesh supported WO ₃ /TiO ₂ nanotubes composite and its application for photocatalytic degradation under visible light. <i>Materials Letters</i> , 2015 , 145, 216-218	3.3	22
8	Ammonia-assisted semicarbonization: a simple method to introduce micropores without damaging a 3D mesoporous carbon nanonetwork structure. <i>Langmuir</i> , 2014 , 30, 9183-9	4	29
7	Preparation and lithium-storage performance of carbon/silica composite with a unique porous bicontinuous nanostructure. <i>Carbon</i> , 2014 , 77, 275-280	10.4	74
6	A study on structure-performance relationship of overcharged 18650-size Li ₄ Ti ₅ O ₁₂ /LiMn ₂ O ₄ battery. <i>Journal of Thermal Analysis and Calorimetry</i> , 2014 , 118, 1413-1418	4.1	6
5	Nitrogen-Enriched Nanocarbons with a 3-D Continuous Mesopore Structure from Polyacrylonitrile for Supercapacitor Application. <i>Journal of Physical Chemistry C</i> , 2010 , 114, 8581-8586	3.8	221

4	Pore size control of wormholelike mesoporous carbons. <i>Carbon</i> , 2009 , 47, 916-918	10.4	36
3	Preparation of activated ordered mesoporous carbons with a channel structure. <i>Langmuir</i> , 2008 , 24, 2967-9	4	38
2	The porous structures of activated carbon aerogels and their effects on electrochemical performance. <i>Journal of Power Sources</i> , 2008 , 185, 589-594	8.9	93
1	Polydopamine-based materials applied in Li-ion batteries: a review. <i>Journal of Materials Science</i> , 1	4.3	4
